SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) 30,000 + 10 x 1,000 = Rs 40,000 (1). (ii) 25 x 1,000 = Rs 25,000 (1). (iii) Loss of Rs 15,000 (1). (iv) 30,000/(25 - 10) = 2,000 cakes (1); break-even is where revenue equals total cost (1).	1+1+1+2

	OR: Operations (1); Finance (1); HR (1); Marketing (1); Coordination (1).	1+1+1+1+1

Mistakes to avoid:

- **Revenue** is money received from sales; **profit** = revenue - expenses. A loss occurs when expenses exceed revenue. Do not treat revenue as profit.
- Fixed costs (rent) do not change with output; variable costs (raw materials, packaging) rise with output. Total cost = fixed + variable cost.
- Break-even is where revenue equals total cost; units = fixed cost / (price - variable cost per unit).
- A business plan is not fixed once written; it is a dynamic roadmap revised when conditions change.
- A mortgage is a loan taken against property, a chawl is a multi-storey tenement of single-room units, and a unicorn is a startup valued above 1 billion dollars.

- Success needs finance, human resources, operations and marketing, not just a great idea; match names with facts (Lijjat 1959, Oberoi - hotels, Chettiars - Tamil Nadu).

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
