ANSWER KEY & MARKING SCHEME SET 1

Chapters 1–4: **The Problem of Choice (Economics), The Price Puzzle (Economics), Shaping the Earth's Surface (Geography), Atmosphere and Climate (Geography)** | Class 9 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(a)** planned	Central control
2	**(b)** excess supply and falling price	Surplus
3	**(a)** Cave - arch - stack	Erosion sequence
4	**(d)** Thermosphere	Ionosphere
5	**(d)** A is false but R is true.	A false, R true
6	**(b)** falls	Expectations
7	**(b)** Dense population and weak buildings	Population density
8	**(a)** Both A and R are true and R is the correct explanation of A.	Moisture-laden
9	**(c)** Choices involve costs, so facts reduce waste	Evidence-based choice
10	**(d)** A is false but R is true.	A false, R true
11	**(c)** mitigation measure	Preparedness
12	**(b)** land breeze	Land to sea
13	**(a)** Both A and R are true and R is the correct explanation of A.	Spending an hour on play means giving up the next best use of that hour (such as study), so opportunity cost exists without money.
14	**(a)** Both A and R are true and R is the correct explanation of A.	Quantity demanded exceeds quantity supplied at a low price, so a shortage appears and price tends to rise.
15	**(a)** Both A and R are true and R is the correct explanation of A.	Collision and compression of the crust at a convergent boundary folded the sediments into the Himalaya.

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	It creates jobs (1); It reduces unemployment (1).	1+1
17	Cut tariff (1); Offer packages to fill rooms (1).	1+1
18	Used contouring and bunding (1); Built dams and canals (1).	1+1
19	Absorbs X-rays and short UV (1); Few molecules absorb high energy (1).	1+1
20	Needs depend on situation (1); A mobile phone is a need for a delivery worker, a want for a child (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Household: share between food and savings (1); Firm: workers versus machines (1); Government: schools versus roads (1).	1+1+1
22	Competition lowers prices (1); Quality and features improve (1); Consumers benefit (1).	1+1+1
23	Waves constantly erode and deposit (1); Human activity removes sand (1); Sea-level rise (1).	1+1+1
24	Roots hold soil (1); Reduce flow speed (1); Trap silt (1).	1+1+1
	OR: New technology reduces cost of machines (1); It encourages automation (1); Skilled labour demand rises (1).	1+1+1
25	Schedule 150-2, 100-4, 50-6 (1); Increase of 4 kg (1); Downward-sloping demand curve (1).	1+1+1
	OR: Desert: physical due to temperature swings (1); Forest: chemical and biological due to moisture (1); Climate decides (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks

26	(i) She gives up 10 kg of wheat (100 - 90) (1). (ii) 90 - 70 = 20 kg of wheat (1). (iii) No; this point lies outside the PPC, so it cannot be produced with the given resources (1). (iv) She gives up 40 kg wheat for 25 kg barley, i.e. 40/25 = 1.6 kg wheat per kg barley (1); the cost rises because the resources are not equally suited to producing both goods (1).	1+1+1+2
27	Melting and heavy rain (1); Weak moraine or ice dam (1); Sudden outburst (1); Loss of life and hydel projects (1); Monitoring, early warning (1).	1+1+1+1+1
	OR: Heavy rain and western disturbances (1); Rivers already high (1); Weak embankments (1); Construction near rivers and silt (1); Repair, desilting, early warnings (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapters 1–4: **The Problem of Choice (Economics), The Price Puzzle (Economics), Shaping the Earth's Surface (Geography), Atmosphere and Climate (Geography)** | Class 9 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(b)** Both A and R are true but R is not the correct explanation of A.	Both true but different layers
2	**(a)** Both A and R are true and R is the correct explanation of A.	Time has alternative uses
3	**(d)** excess demand of 6	12 - 6
4	**(a)** GLOF	Moraine dam
5	**(d)** A is false but R is true.	A false, R true
6	**(d)** cost of labour influences technique	Labour cost matters
7	**(c)** related-goods effect on supply	Supply response
8	**(a)** wave erosion	Stacks and cliffs
9	**(c)** thermosphere	Ionosphere
10	**(a)** 1.2 kg wheat	30/25 = 1.2
11	**(a)** Both A and R are true and R is the correct explanation of A.	Substitutes
12	**(d)** Sand dune	Wind deposition
13	**(a)** Both A and R are true and R is the correct explanation of A.	Almost all weather occurs in the troposphere, so the stratosphere gives smooth, cloud-free flying.
14	**(b)** Both A and R are true but R is not the correct explanation of A.	Both statements are true (private enterprise and government participation co-exist), but the timing of the Survey does not explain why India is mixed.
15	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true but the second statement about complements does not explain why tea and coffee are substitutes.

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	Below equilibrium, market price is already higher (1); It then has no effect (1).	1+1
17	Slopes limit farming (1); Steps reduce erosion and hold water (1).	1+1
18	Rainfall may be concentrated (1); Poor drainage and silt (1).	1+1
19	Time and attention are limited (1); Every use of money or time means giving up another (1).	1+1
20	Demand needs both willingness and ability (1); Purchasing power is money value of goods one can buy (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Stratosphere has no weather (1); Forecasts need troposphere data (1); Cloud and rain occur there (1).	1+1+1
22	Shows efficient combinations (1); Shows trade-offs (1); Helps set priorities (1).	1+1+1
23	Cost rises (1); Supply falls (1); Price rises (1).	1+1+1
24	Plant windbreaks (1); Control overgrazing (1); Improve farming (1).	1+1+1
	OR: Rain varies by place (1); Local drainage and rivers (1); Better decisions (1).	1+1+1
25	Parks, roads, street lights (1); Difficult to charge users (1); Little profit for firms (1).	1+1+1
	OR: Markets set prices by demand and supply (1); Government corrects exploitation (1); Together they keep markets fair (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks

26	(i) Rs 100 and 12 kg, where demand equals supply (1). (ii) Excess demand (shortage) of 18 - 6 = 12 kg (1). (iii) Excess supply (surplus) of 18 - 6 = 12 kg (1). (iv) In (ii) price tends to rise because buyers compete for scarce mangoes; in (iii) price tends to fall because sellers cut prices to clear the unsold stock; both movements push the market back to Rs 100 (2).	1+1+1+2
27	Plates and boundaries (1); Convergent forms Himalaya (1); Ring of Fire (1); India's plate pushes into Eurasia (1); Dense population increases loss (1).	1+1+1+1+1
	OR: Agriculture depends on rain (1); Reservoirs and rivers fill (1); Rural income and food prices (1); Floods and drought risks (1); Irrigation and storage reduce dependence (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 3

Chapters 1–4: **The Problem of Choice (Economics), The Price Puzzle (Economics), Shaping the Earth's Surface (Geography), Atmosphere and Climate (Geography)** | Class 9 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(b)** Both A and R are true but R is not the correct explanation of A.	Both true; R describes one type, not full reason
2	**(a)** Both A and R are true and R is the correct explanation of A.	Crossing the sea
3	**(c)** Points on the curve use all resources efficiently	Interpretation
4	**(d)** A is false but R is true.	A false: it is ineffective
5	**(c)** glaciation	U-shaped
6	**(c)** Using solar energy	Clean energy
7	**(a)** trade-off with opportunity cost	Choice with forgone benefits
8	**(d)** lower profit discourages production	Incentive
9	**(b)** oasis	Desert water
10	**(c)** land warmer than sea	Day
11	**(c)** the bridge's benefit of 4 units	Best alternative forgone
12	**(a)** Both A and R are true and R is the correct explanation of A.	Free-rider
13	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true but unrelated: one deals with plates moving apart, the other with plates moving together.
14	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true but R explains why temperature rises in the stratosphere, not why it falls in the troposphere.
15	**(c)** A is true but R is false.	Wants keep growing, so A is true; resources are limited (scarce) with alternative uses, so R is false.

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	Cuts and weakens slopes (1); Disturbs drainage (1).	1+1
17	Better forecasts (1); Helps plan crops and water (1).	1+1
18	Future needs and growth depend on saving and investment (1); Sustainability needs balanced use (1).	1+1
19	Fish stocks fall (1); Less catch in coming years (1).	1+1
20	Wind direction varies (1); Sand supply and vegetation differ (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Hot material rises (1); Cool material sinks (1); Plates dragged along (1).	1+1+1
22	Sowing is delayed (1); Crop yield falls (1); Food prices and rural incomes affected (1).	1+1+1
23	Reviews sectors and inflation (1); Points out challenges (1); Helps allocate limited funds (1).	1+1+1
24	Off-season demand low (1); Festival demand high (1); Revenue maximisation (1).	1+1+1
	OR: Store water as ice (1); Release slowly in summer (1); Feed rivers (1).	1+1+1
25	IMD: winter, summer, monsoon, post-monsoon (1); Rtus are six, two months each (1); Both reflect the annual cycle (1).	1+1+1
	OR: Competition may lower prices (1); But public goods and equity may be neglected (1); Hence regulation is needed (1).	1+1+1

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
26	(i) The Ring of Fire (1). (ii) Convection currents in the mantle (1). (iii) Convergent boundary (1). (iv) The Indian plate collided with the Eurasian (continental) plate at a convergent boundary; neither could sink easily, so the crust crumpled and folded upward, forming fold mountains (2).	1+1+1+2
27	Contouring, bunding, terracing (1); Zabo system (1); Check dams (1); Modern monitoring and policy (1); Combined approach works best (1).	1+1+1+1+1
	OR: Greenhouse gases rise (1); Warming, floods, droughts (1); Impact on health and farming (1); Reduce carbon footprint (1); Collective policies (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
