THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 3

Chapter 7: **Temperature and its Measurement** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A steel spoon kept in hot tea becomes hot after some time because of: 1

(a) evaporation **(b)** magnetism **(c)** freezing **(d)** conduction

2. A clinical thermometer is used to measure: 1

(a) the temperature of ice **(b)** boiling water temperature

(c) body temperature **(d)** room temperature

3. Heat flows from: 1

(a) hot to cold objects **(b)** cold to hot objects

(c) both ways always **(d)** neither

4. A thermos flask keeps liquids hot or cold for long as it: 1

(a) is made of iron **(b)** reduces heat transfer

(c) has a big opening **(d)** makes heat

5. The range of a clinical thermometer is about: 1

(a) 100 °C to 200 °C **(b)** 0 °C to 100 °C **(c)** 35 °C to 42 °C **(d)** -10 °C to 110 °C

6. When a hot object and a cold object are kept in contact, finally: 1

(a) hot object gets hotter **(b)** cold object gets colder

(c) they reach the same temperature **(d)** no change

7. Which thermometer measures the highest and lowest temperature of a day? 1

(a) clinical thermometer **(b)** maximum-minimum thermometer

(c) household thermometer only **(d)** ruler

8. A laboratory thermometer has a range of about: 1

(a) 35 °C to 42 °C **(b)** 100 °C to 300 °C **(c)** 0 °C to 10 °C **(d)** -10 °C to 110 °C

9. The transfer of heat through a solid from the hotter part to the colder part is: 1

(a) evaporation **(b)** conduction **(c)** melting **(d)** radiation

10. Temperature can also be measured without contact by a: 1

(a) digital infrared thermometer **(b)** clock

(c) ruler **(d)** balance

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. How does a woollen sweater keep us warm? 2

12. Why is a kink present in a clinical thermometer? 2

13. State the direction of flow of heat. 2

14. What is the normal body temperature in °C? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Describe an experiment to show that metals are good conductors of heat. 3

16. Why does a sick child need her body temperature measured instead of being estimated by touch? 3

17. Give three situations where the measurement of temperature is important. 3

OR

Mention three examples of good conductors and three of insulators. 3

18. What is a fever? How is it measured? 3

OR

Why is mercury used in thermometers? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Give reasons: 5

(a) pans have plastic handles,
(b) woollen clothes in winter,
(c) metal spoon becomes hot,
(d) ice does not melt quickly when covered with a blanket,
(e) thermos flask.

OR

What is conduction? Explain with a metal spoon in a hot cup of tea. 5

20. Describe the scale of the Celsius thermometer and mark the freezing and boiling points. 5

OR

Write a note on the precautions in the use of a clinical thermometer and for disinfecting it. 5

END OF QUESTION PAPER — Total: 40 Marks
