THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 2

Chapter 8: **A Journey through States of Water** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The temperature of boiling water stays at 100 °C because: 1

(a) water is cold **(b)** thermometer breaks

(c) heat is used for changing water to steam **(d)** the beaker is hot

2. Why is it better to water plants in the evening? 1

(a) less evaporation **(b)** no reason **(c)** plants sleep **(d)** more heat

3. Which clothes will dry first? 1

(a) kept in the fridge **(b)** kept in a bag

(c) folded in the shade **(d)** spread in the Sun on a windy day

4. The effect of increased temperature on evaporation is to: 1

(a) decrease it **(b)** increase it **(c)** no change **(d)** stop it

5. Why do we get water droplets under a vessel's lid while cooking? 1

(a) condensation of steam **(b)** rusting

(c) melting **(d)** leakage

6. A tumbler of ice water has droplets on its outside. These come from: 1

(a) melted ice **(b)** water inside the tumbler

(c) the glass **(d)** air's water vapour

7. Water on a leaf evaporates faster on: 1

(a) a foggy day **(b)** a rainy day **(c)** a hot, dry day **(d)** a cold, damp day

8. Why is steam burning more severe than hot water burning? 1

(a) it is wet **(b)** steam carries extra heat

(c) it is colourless **(d)** it is cold

9. Hot water in a closed vessel produces droplets on the lid because: 1

(a) lid melts **(b)** lid leaks

(c) vapour condenses on the cooler lid **(d)** water boils

10. The three states of water differ in: 1

(a) colour only **(b)** smell

(c) taste **(d)** arrangement and movement of particles

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why do ponds not freeze entirely in winter? 2

12. Why does dew form on grass at night? 2

13. Why does a pond dry faster in summer than in winter? 2

14. How is steam different from hot water? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. A beaker of water is heated and the temperature noted every minute: 30, 45, 60, 75, 90, 100, 100, 100. Explain the readings. 3

16. Describe how ice, water and steam differ in shape and volume. 3

17. Compare freezing and condensation. 3

OR

Why do clothes dry faster in winter at noon than at night? 3

18. Explain the term 'water table' and how it can fall. 3

OR

How does the Sun support life through the water cycle? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Discuss the importance of the water cycle for living beings and for the environment. 5

OR

Explain, using particle ideas, how ice, water and steam differ. 5

20. Explain the heating curve of ice from -10 °C to steam at 110 °C in words. 5

OR

Explain the experiment to prove that water vapour is present in air using ice and a glass. 5

END OF QUESTION PAPER — Total: 40 Marks
