THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 2

Chapter 9: **Methods of Separation in Everyday Life** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Iron filings can be separated from sand by using a: 1

(a) magnet **(b)** sieve **(c)** fan **(d)** filter paper

2. Which of these is separated by using a sieve? 1

(a) wheat flour and bran **(b)** sand and iron filings

(c) salt and sugar **(d)** tea and water

3. The method of allowing a heavier insoluble substance to settle at the bottom of a liquid is: 1

(a) sedimentation **(b)** sieving **(c)** filtration **(d)** evaporation

4. Cream is separated from milk by: 1

(a) evaporation **(b)** winnowing **(c)** sieving **(d)** churning

5. A farmer separates grain from straw using: 1

(a) filtration **(b)** threshing **(c)** condensation **(d)** evaporation

6. Pouring out the clear liquid after sedimentation is called: 1

(a) churning **(b)** sieving **(c)** decantation **(d)** winnowing

7. Tea leaves are separated from tea by using a: 1

(a) magnet **(b)** strainer **(c)** hammer **(d)** fan

8. To get clean water from muddy water, the correct order is: 1

(a) filtration, winnowing **(b)** sedimentation, decantation, filtration

(c) evaporation only **(d)** sieving only

9. Separating insoluble solids from a liquid with filter paper is: 1

(a) filtration **(b)** handpicking **(c)** winnowing **(d)** churning

10. A mixture of chalk powder and water settles when kept undisturbed. This is called: 1

(a) winnowing **(b)** sieving **(c)** evaporation **(d)** sedimentation

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. What is winnowing? 2

12. What is churning? 2

13. Define sedimentation and decantation. 2

14. How would you separate sand from iron filings? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how muddy water is made clear for drinking. 3

16. Write the methods of separating solids from solids. 3

17. How is sea salt prepared in salt pans? 3

OR

Why do we use different methods for different mixtures? 3

18. Write the methods of separating solids from liquids. 3

OR

What are the steps in making tea clear of leaves? 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe handpicking, winnowing, sieving and threshing with examples. 5

OR

Explain how a mixture of oil and water can be separated. 5

20. Explain evaporation and condensation and how they are used to separate mixtures. 5

OR

Explain why different methods are chosen for separating mixtures with examples of three types. 5

END OF QUESTION PAPER Total: 40 Marks
