THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 2

Chapter 9: **Methods of Separation in Everyday Life** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which of these changes is physical and reversible? 1

(a) rusting **(b)** cooking of rice
(c) evaporation of salt solution **(d)** burning of paper

2. To separate cream from milk, a dairy uses a: 1

(a) centrifuge **(b)** fan **(c)** magnet **(d)** sieve

3. A mixture of kerosene and water can be separated by: 1

(a) sieving **(b)** separating funnel
(c) winnowing **(d)** magnet

4. Which of the following mixtures can be separated by decantation after settling? 1

(a) salt and water **(b)** sand and water
(c) alcohol and water **(d)** sugar and water

5. A mixture of rice, stones and husk is separated by: 1

(a) filtration **(b)** winnowing and handpicking
(c) evaporation **(d)** magnet

6. Heavier particles in muddy water settle first by: 1

(a) sedimentation **(b)** evaporation **(c)** filtration **(d)** condensation

7. Which of the following cannot be separated by filtration? 1

(a) mud and water **(b)** chalk and water **(c)** sugar and water **(d)** sand and water

8. A student wants to recover copper sulphate crystals from solution. She should: 1

(a) sieve **(b)** filter
(c) evaporate part of water and cool **(d)** magnet

9. Tea powder in a cup of tea is separated using: 1

(a) filtration **(b)** magnet **(c)** sieving **(d)** winnowing

10. A mixture of salt and iron filings is separated by: 1

(a) sieving **(b)** filtration only
(c) winnowing **(d)** magnet then dissolving and evaporating

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Explain why separation methods depend on the properties of components. 2

12. How can you separate mustard seeds from sand? 2

13. How can a mixture of sugar and sand be separated? 2

14. Why is the mixture of water and alcohol not separated by decantation? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how a tea strainer, a sieve and filter paper are similar and different. 3

16. How does a washing of rice grains separate small stones? 3

17. Explain how threshing differs from winnowing. 3

OR

Why is a mixture of oil and water separated by decantation but not salt and water? 3

18. Describe how a student can purify a sample of water with sand, gravel and cloth filter. 3

OR

How would you separate a mixture of iron nails and coloured beads? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain how the traditional salt-making process in India uses the Sun's heat. 5

OR

Explain the difference between a solution, suspension and mixture of solids using examples. 5

20. Discuss methods for cleaning a village pond water for drinking. 5

OR

Describe an activity to show that sand is insoluble but common salt is soluble. 5

END OF QUESTION PAPER — Total: 40 Marks
