THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 3

Chapter 9: **Methods of Separation in Everyday Life** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Why is it better to wash vegetables in running water than in standing water? 1

(a) makes them sweet **(b)** makes them cold
(c) carries away dirt **(d)** makes them hot

2. For separating coarse sand and fine sand, we use: 1

(a) sieving **(b)** decantation **(c)** filtration **(d)** evaporation

3. Which separation uses the difference in weight? 1

(a) winnowing **(b)** filtration **(c)** evaporation **(d)** magnetism

4. Why does muddy water become clearer when kept overnight? 1

(a) air enters **(b)** particles settle **(c)** water evaporates **(d)** salt dissolves

5. For purifying muddy water, alum is added to make particles: 1

(a) float **(b)** dissolve **(c)** evaporate **(d)** settle faster

6. A mixture of sand and sugar can be separated by: 1

(a) magnet **(b)** dissolving sugar and filtering
(c) winnowing **(d)** handpicking

7. In a flour mill, bran is separated from flour by: 1

(a) magnet **(b)** filtration **(c)** winnowing only **(d)** sieving

8. Which is the correct order in clear drinking water preparation? 1

(a) boiling, sedimentation
(b) sedimentation, decantation, filtration, boiling
(c) filtration, sedimentation
(d) decantation only

9. Which of these is not a method of separating solid from solid? 1

(a) sieving **(b)** magnetic separation
(c) winnowing **(d)** evaporation

10. Why is a magnet used in some food industries? 1

(a) to remove iron pieces **(b)** to cook
(c) to cool **(d)** to add taste

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. What is the role of the funnel in filtration? 2

12. Why do we add alum to muddy water? 2

13. Why is winnowing done in a place with wind? 2

14. Describe a method to recover water from salt water. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. What is crystallisation? How can we get salt crystals? 3

16. Explain how the condensation of steam can give pure water. 3

17. What is the effect of stirring on the rate of dissolving? 3

OR

Give three examples of mixtures in the kitchen and say how each is separated. 3

18. How is rice separated from the water after cooking? 3

OR

Why is a funnel used in filtration? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe how pure water can be obtained from sea water with a flask, tube and beaker. 5

OR

Explain the importance of removing impurities from flour and grains in a food factory. 5

20. Explain the principle of each: winnowing, magnetic separation, sedimentation, evaporation, sieving. 5

OR

Describe how to get pure sugar crystals from sugar cane juice (simple method). 5

END OF QUESTION PAPER — Total: 40 Marks
