CLASS 6 — SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 10: **Living Creatures: Exploring their Characteristics** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A candle burns, melts, gives out waste gases and its flame responds to wind. Why is it still non-living? 1

(a) it makes light
(b) it melts
(c) it has no cells and no growth or reproduction
(d) it is hot

2. A tree, a bird and a bacterium are given. Which is a unicellular organism? 1

(a) tree **(b)** bacterium **(c)** bird **(d)** none

3. A dry seed lies unchanged in a packet for months but sprouts after being watered. This shows that: 1

(a) sprouting is random
(b) a living thing can stay inactive until conditions suit it
(c) water makes seeds alive from stone
(d) seeds are non-living

4. A student observes a crystal growing in a saturated solution. Which statement is true? 1

(a) the crystal grows by outside deposition, not by cell division
(b) it respires
(c) it is living
(d) it reproduces

5. Two groups of seeds are kept: Group A in water, group B dry. Only A sprouts. What is the conclusion? 1

(a) sprouting is random **(b)** water is needed for germination
(c) dry seeds are dead **(d)** seeds do not need water

6. A tadpole's tail disappears as it grows. This is an example of: 1

(a) reproduction **(b)** response to light
(c) change in body during growth **(d)** death

7. Which pair of observations would suggest that a dry-looking object is a living seed? 1

(a) it is hard and dry **(b)** it breaks when pressed
(c) it is brown and small **(d)** it swells and sprouts in water

8. In the experiment above, what is the controlled variable? 1

(a) water **(b)** germination
(c) dry state **(d)** type of seeds and temperature

9. Which characteristic makes 'excretion' essential for life? 1

(a) it makes food **(b)** it makes light
(c) accumulated wastes are toxic **(d)** it helps in growth

10. Which of these cannot be taken as proof of life when used alone? 1

(a) movement **(b)** respiration
(c) growth from inside **(d)** reproduction

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. A student claims that a river is living because it flows and changes shape. Rebut the claim. 2

12. Why do dead leaves carry out no life process? 2

13. A student says 'all moving things are living'. Give two counterexamples. 2

14. Why do biologists use several characteristics rather than one to define life? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. A student claims that mushrooms are plants. Give three reasons why they are not. 3

16. Why can't we say that a seed is dead because it does not respire visibly? 3

17. Give three examples of how living things depend on each other. 3

OR

Design an experiment to show that germinating seeds produce heat. 3

18. A potted plant placed sideways soon curves upward. What does this show? 3

OR

How does the study of cells help us to define life? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Design an investigation to show that seeds need water, air and suitable temperature to germinate. Describe set-ups and results. 5

OR

Discuss the importance of responses to stimuli in the survival of plants and animals with five examples. 5

20. Discuss with examples why it can be hard to decide whether a dry seed, a crystal and a flowing river are living. 5

OR

Explain the cell theory in simple words and its importance in biology. 5

END OF QUESTION PAPER — Total: 40 Marks
