THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 10: **Living Creatures: Exploring their Characteristics** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. In which of the following does the development take place inside the mother's body? 1

(a) hen **(b)** dog **(c)** snake **(d)** frog

2. Which of the following best explains why plants are able to survive without moving? 1

(a) they are heavy **(b)** they make their own food
(c) they eat animals **(d)** they eat soil

3. A student plots height of a plant (cm) against days: 2, 4, 7, 11, 16. The growth is: 1

(a) decreasing **(b)** constant
(c) zero **(d)** increasing each day

4. Which characteristic is best used to differentiate a young plant from a toy plant? 1

(a) size **(b)** shape **(c)** colour **(d)** growth

5. Which of the following organisms is a decomposer that feeds on dead matter? 1

(a) rose **(b)** lion **(c)** mushroom **(d)** cow

6. Between a mango tree and a hen, which has the longer life span? 1

(a) same **(b)** hen **(c)** depends on size **(d)** mango tree

7. Which of the following is a long-term response of plants to the environment? 1

(a) bending towards light in minutes **(b)** an insect catch
(c) folding Mimosa leaf **(d)** shedding leaves in autumn

8. Organisms like amoeba reproduce mainly by: 1

(a) seeds **(b)** laying eggs
(c) giving birth **(d)** splitting into two

9. Which of the following is not a response to a stimulus? 1

(a) a fish hiding **(b)** a ball rolling down
(c) a plant bending **(d)** a cat jumping

10. Which of these would be least useful to decide whether an object is alive? 1

(a) respiration **(b)** colour **(c)** growth **(d)** response

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. How is the sleeping of a seed dormancy different from death? 2

12. Why are some plants like the Venus flytrap said to respond quickly? 2

13. Explain why plants usually do not move from place to place. 2

14. Explain why a human baby grows but a toy doesn't. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Why do living things need to maintain a constant internal environment? 3

16. How is movement of a snail different from that of a car? 3

17. Why do many organisms die when environments change too fast? 3

OR

Describe the observations that tell you a beetle larva is living. 3

18. Explain the role of excretion in aquatic and land animals. 3

OR

Explain why reproduction is not necessary for survival of an individual but for the species. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Analyse the table: Object A grows, respires, responds, reproduces. B moves, uses fuel, makes noise. C grows by deposit, nothing else. Classify each with reasons. 5

OR

Describe how one can use observations and simple tools to compare the growth of two plants over two weeks. 5

20. Describe an experiment to show that plants respire at night and discuss the result. 5

OR

Evaluate the statement: 'Everything that grows is living.' 5

END OF QUESTION PAPER — Total: 40 Marks
