CLASS 7 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 1: **Geographical Diversity of India** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A traveller moves from Shimla to Jaisalmer to Kochi. Which sequence of landscapes does she most likely see? 1

(a) plateau, glacier, desert **(b)** coast, plateau, desert
(c) mountains, desert, coast **(d)** desert, glacier, island

2. The Deccan Trap is formed of 1

(a) alluvium **(b)** lava rocks **(c)** glacial deposits **(d)** coral

3. Which of the following describes a rain shadow area? 1

(a) region with much rain
(b) glacier
(c) coastal belt
(d) region with little rain on the leeward side of mountains

4. Given that Narmada flows west while the Godavari flows east, the plateau must 1

(a) slope in different directions and have a rift valley for the Narmada
(b) be a delta
(c) have no slope
(d) be flat

5. Which statement explains the high population in the Ganga delta? 1

(a) lack of rivers
(b) fertile land and water but risk of floods
(c) harsh desert
(d) glaciers

6. An archipelago is 1

(a) a lake **(b)** a single island
(c) a group of islands **(d)** a desert

7. A farmer wants to grow wheat with irrigation from perennial rivers. The best region is 1

(a) Northern Plains **(b)** Thar Desert **(c)** Ladakh **(d)** Lakshadweep

8. A student sees a map showing very sparse settlement in northern Rajasthan and Ladakh. The common reason is 1

(a) harsh climate and water scarcity **(b)** many rivers
(c) many ports **(d)** fertile soil

9. Mangroves along the Sundarbans protect the coast from 1

(a) storms and erosion **(b)** earthquakes
(c) droughts **(d)** glaciers

10. Coral islands like Lakshadweep are low-lying. The main threat from climate change is 1

(a) earthquakes **(b)** rising sea levels
(c) glaciers **(d)** volcanoes

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why does India have varied relief? 2

12. How do terraces help in mountains? 2

13. Why are wetlands important? 2

14. Why are peninsular rivers rain-fed? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Compare the Himalayan and peninsular rivers with reasons. 3

16. Analyse the causes of flood and drought in different regions. 3

17. Explain the significance of wetlands such as Chilika. 3

OR

Analyse how relief affects population distribution. 3

18. Examine the effects of climate change on coasts and islands. 3

OR

Analyse the role of geography in shaping food habits. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Critically examine how the physical diversity of India has influenced its culture and economy. 5

OR

Explain the contrast between east-flowing and west-flowing rivers with reasons. 5

20. Analyse the relation between the Himalayas, monsoon and the river systems. 5

OR

Assess the role of rivers in India's history and economy. 5
