THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 2

Chapter 1: **Geographical Diversity of India** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which pairing of region and activity is best? 1

(a) Himalayan slopes - apple orchards **(b)** Ladakh - jute
(c) Lakshadweep - wheat **(d)** Thar - rice paddies

2. A map shows high contour lines close together. This indicates 1

(a) flat plain **(b)** steep slope **(c)** sea **(d)** gentle slope

3. If the Western Ghats did not exist, the Deccan interior would probably 1

(a) become drier **(b)** receive more monsoon rain
(c) have no rivers **(d)** be a rainforest

4. A delta is missing on the Narmada because 1

(a) it is very short
(b) it is dry
(c) it has no water
(d) it flows through a rift valley and ends in an estuary

5. Which of these would you expect to be least populated? 1

(a) Kerala coast **(b)** Ganga plain
(c) high Himalayan zones **(d)** Delta region

6. The Himalayas are still rising. A likely consequence is 1

(a) decrease in rivers **(b)** no change
(c) more deserts **(d)** frequent earthquakes and landslides

7. Which feature explains the flood risk in the Northern Plains? 1

(a) steep slope **(b)** no rain
(c) high altitude **(d)** gentle slope and heavy monsoon rain

8. A student claims all rivers of India are snow-fed. The best correction is 1

(a) all rivers are rain-fed **(b)** peninsular rivers depend mainly on rain
(c) all are glacier-fed **(d)** none have water

9. Which statement correctly links relief and rivers? 1

(a) Rivers rising in the Himalayas flow all year but peninsular rivers are rain-fed
(b) Peninsular rivers are perennial from glaciers
(c) no link
(d) Himalayan rivers are rain-fed only

10. India's standard meridian helps 1

(a) all of the country follow one time **(b)** create several time zones

(c) measure rain **(d)** end day and night

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is the Deccan soil dark? 2

12. How does altitude affect farming? 2

13. Why do east-coast rivers form deltas but not west-coast rivers? 2

14. How does the rain shadow effect work? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. Examine the role of the Western Ghats in India's rainfall pattern. 3

16. Explain why the Peninsular Plateau is rich in minerals. 3

17. Examine the reasons for development of ports on both coasts. 3

OR

Assess the importance of the Himalayas for India. 3

18. Evaluate adaptation by hill farmers. 3

OR

Evaluate the importance of the Northern Plains for national food security. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Compare the physical and human geography of the Thar and the Ganga delta. 5

OR

Discuss how relief influences transport and communication networks. 5

20. Evaluate the importance and conservation of the Himalayan ecosystem. 5

OR

Explain the major physical divisions of India with one distinctive feature of each. 5

END OF QUESTION PAPER Total: 40 Marks
