THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 2

Chapter 2: **Understanding the Weather** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A city shows a rise in mean night temperatures over decades. A likely cause is 1

(a) urban heat island and climate change **(b)** more lakes
(c) more forests **(d)** fewer buildings

2. Which of the following measure could reduce loss of life during cyclones? 1

(a) ignoring signs **(b)** no information
(c) early warnings and evacuation **(d)** late warnings

3. If humidity rises at constant temperature and the air nears 100 per cent, the likely result is 1

(a) no vapour **(b)** cloud or fog formation
(c) drier air **(d)** clear skies

4. Why is a rain gauge placed in an open area? 1

(a) to avoid trees and buildings blocking rain
(b) for wind
(c) for noise
(d) for shade

5. How does the Sun's heating of the Earth drive the water cycle? 1

(a) stops water **(b)** evaporates water and moves the air
(c) makes ice **(d)** makes wind stop

6. Weather data for a month shows 0 mm rain, high temperatures and low humidity. The likely season is 1

(a) monsoon **(b)** cyclone **(c)** dry summer **(d)** winter fog

7. Why is a thermometer placed in a shaded, ventilated box? 1

(a) to cool it
(b) to hide it
(c) to measure air temperature without direct sunlight
(d) to heat it

8. The relative humidity is 50 per cent. If the temperature falls, relative humidity 1

(a) stays the same **(b)** falls **(c)** becomes zero **(d)** rises

9. The wind vane at an airport points to the west. This means the wind is blowing from the 1

(a) south **(b)** north **(c)** west **(d)** east

10. Why are satellite images useful for cyclone warnings? 1

(a) they create wind **(b)** they measure soil

(c) they collect rain **(d)** they track cloud systems over the sea

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is a barometer useful to sailors? 2

12. How can citizens use IMD alerts? 2

13. Why is relative humidity high at night? 2

14. Why does cloud cover reduce daily range? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. Examine why the Himalayas have snow while the plains have rain. 3

16. Examine the effect of vegetation on local humidity and temperature. 3

17. Examine how clouds influence temperature in a day. 3

OR

Evaluate the accuracy of traditional weather signs. 3

18. Explain how urbanisation affects local weather. 3

OR

Evaluate the importance of weather instruments in schools. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Discuss weather hazards and ways to reduce their impact. 5

OR

Explain the scientific basis of land and sea breezes and monsoon winds. 5

20. Compute and interpret mean temperature and range for a week of given data and explain the weather pattern. 5

OR

Evaluate how weather knowledge can reduce risks for farmers. 5

END OF QUESTION PAPER Total: 40 Marks
