THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — MATHS · EASY LEVEL CHAPTER TEST SET 3

Chapter 7: **Probability** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Easy level: direct, single-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The probability of getting a 7 on a single throw of a standard die is: 1

(a) $\frac{1}{6}$ **(b)** 0 **(c)** $\frac{1}{2}$ **(d)** -1

2. The number of outcomes when two coins are tossed together is: 1

(a) 3 **(b)** 5 **(c)** 6 **(d)** 4

3. If $P(E) = \frac{1}{5}$, then $P(\text{not } E)$ is: 1

(a) $\frac{3}{5}$ **(b)** $\frac{1}{5}$ **(c)** $\frac{4}{5}$ **(d)** $\frac{2}{3}$

4. A coin is tossed 200 times and a head appears 90 times. The experimental probability of a head is: 1

(a) $\frac{3}{7}$ **(b)** $\frac{9}{20}$ **(c)** $\frac{11}{20}$ **(d)** $\frac{1}{2}$

5. A fair die is rolled once. The probability of getting a number less than 3 is: 1

(a) $\frac{2}{3}$ **(b)** $\frac{1}{4}$ **(c)** $\frac{1}{3}$ **(d)** $\frac{1}{6}$

6. A bag contains 4 red and 7 blue balls. A ball is drawn at random. The probability that it is blue is: 1

(a) $\frac{4}{11}$ **(b)** $\frac{7}{12}$ **(c)** $\frac{8}{11}$ **(d)** $\frac{7}{11}$

7. A bag has 3 red, 2 blue and 10 green balls. The probability of drawing a green ball is: 1

(a) $\frac{2}{3}$ **(b)** $\frac{1}{3}$ **(c)** $\frac{3}{4}$ **(d)** $\frac{1}{2}$

8. A ticket is drawn from tickets numbered 1 to 15. The probability that the number is a multiple of 5 is: 1

(a) $\frac{1}{5}$ **(b)** $\frac{4}{5}$ **(c)** $\frac{1}{6}$ **(d)** $\frac{2}{5}$

9. The probability of getting a number less than 7 on a single throw of a die is: 1

(a) 1 **(b)** 2 **(c)** $\frac{1}{2}$ **(d)** $\frac{1}{6}$

10. The number of outcomes when a coin is tossed three times is: 1

(a) 10 **(b)** 9 **(c)** 7 **(d)** 8

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. A coin is tossed 80 times and shows heads 35 times. Find the experimental probability of heads and of tails. 2

12. A fair die is rolled. Find the probability of getting a perfect square. 2

13. A bag contains 4 red and 11 white balls. Find the probability of drawing a white ball. 2

14. A coin is tossed 250 times and shows heads 120 times. Find the experimental probability of heads and of tails. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. A bag contains 4 red and 14 blue balls. A ball is drawn at random. Find $P(\text{red})$ and $P(\text{not red})$. 3

16. A die was thrown 80 times and the number 5 appeared 12 times. Find the experimental probability of getting 5, and of not getting 5. 3

17. A ticket is drawn at random from tickets numbered 1 to 50. Find the probability that it shows a multiple of 10. 3

OR

A bag contains 10 red and 5 blue balls. A ball is drawn at random. Find $P(\text{red})$ and $P(\text{not red})$. 3

18. A die was thrown 200 times and the number 2 appeared 36 times. Find the experimental probability of getting 2, and of not getting 2. 3

OR

A ticket is drawn at random from tickets numbered 1 to 45. Find the probability that it shows a multiple of 9. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. A bag contains 2 red, 9 blue and 4 green balls. Find $P(\text{red})$, $P(\text{blue})$, $P(\text{green})$ and show that they add up to 1. 5

OR

A fair die is rolled once. Find 5
(i) $P(\text{the number } 5)$,
(ii) $P(\text{a number less than } 3)$ and
(iii) $P(\text{the number } 5 \text{ or a number less than } 3)$ using the favourable outcomes.

20. A bag contains 5 red, 6 blue and 9 green balls. Find $P(\text{red})$, $P(\text{blue})$, $P(\text{green})$ and show that they add up to 1. 5

OR

A die is rolled. Find the probability of getting a number less than 7 and of getting 0. 5

END OF QUESTION PAPER — **Total: 40 Marks**
