CLASS 10 — SCIENCE · EASY LEVEL CHAPTER TEST SET 2

Chapter 7: **How do Organisms Reproduce?** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Easy level: direct, single-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Ovule develops into a 1

(a) stamen **(b)** leaf **(c)** fruit **(d)** seed

2. The organ in which the baby grows is the 1

(a) ovary **(b)** uterus **(c)** vas deferens **(d)** oviduct

3. Planaria shows 1

(a) pollination **(b)** fertilisation **(c)** puberty **(d)** regeneration

4. Petals are usually 1

(a) hard **(b)** green only

(c) brightly coloured **(d)** underground

5. The tube connecting the ovary to the uterus is the 1

(a) oviduct **(b)** vas deferens **(c)** urethra **(d)** ureter

6. Asexual reproduction involves 1

(a) one parent **(b)** two parents **(c)** gametes **(d)** pollination

7. Flowers which have both stamens and pistil are called 1

(a) vegetative **(b)** bisexual **(c)** unisexual **(d)** sterile

8. Embryo gets nutrition through the 1

(a) uterus wall only **(b)** ovary **(c)** vagina **(d)** placenta

9. Which is NOT an asexual method? 1

(a) Budding **(b)** Spore formation **(c)** Fragmentation **(d)** Fertilisation

10. Pollen grains are carried by 1

(a) only soil **(b)** wind, insects and water

(c) only roots **(d)** none

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Name two parts of a flower that are male reproductive parts. 2

12. Name the male and female sex organs in humans. 2

13. Name the asexual method seen in yeast. 2

14. What is pollination? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Name any three parts of a flower. 3

16. Give two changes seen in boys and two in girls during puberty. 3

17. What is a gamete? Name the male and female gametes in humans. 3

OR

State three functions of a flower. 3

18. Define self-pollination and cross-pollination. 3

OR

Why does Plasmodium divide by multiple fission? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe spore formation in Rhizopus. 5

OR

Describe the human female reproductive system. 5

20. Describe regeneration with an example. 5

OR

Explain the development of the embryo in humans after fertilisation. 5

END OF QUESTION PAPER — Total: 40 Marks
