THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 3

Chapter 13: **Our Environment** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Discarded polythene in a field makes the soil 1

(a) rich in humus **(b)** fertile **(c)** more porous **(d)** infertile

2. Removal of snakes from a grassland food chain will 1

(a) increase the frog population **(b)** not affect any organism
(c) decrease the frogs **(d)** remove grass

3. Excessive use of fertilisers and pesticides leads to 1

(a) pollution and biomagnification **(b)** better ecosystem
(c) more decomposers **(d)** no effect

4. Burning of plastic releases 1

(a) helium **(b)** toxic gases **(c)** oxygen **(d)** nitrogen

5. In a food web, the same organism can occupy 1

(a) more than one trophic level **(b)** only one level
(c) decomposer level only **(d)** no level

6. Chemicals that cannot be broken by microorganisms are 1

(a) organic **(b)** natural
(c) biodegradable **(d)** non-biodegradable

7. Which of the following is not a biodegradable material? 1

(a) Wooden stick **(b)** Jute rope **(c)** Fruit peel **(d)** Aluminium foil

8. The trophic level occupied by humans eating rice is 1

(a) third **(b)** fourth **(c)** first **(d)** second

9. A rise in pesticide in a lake water makes fish unfit to eat due to 1

(a) respiration **(b)** photosynthesis **(c)** biomagnification **(d)** digestion

10. To reduce the harm of waste, the first step is to 1

(a) reduce its production **(b)** burn it
(c) bury it **(d)** flush it

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. What is the difference between a grazing food chain and decomposer chain? 2

12. Why are the decomposers called the cleaners of the ecosystem? 2

13. Why is it a better practice to use cloth or jute bags instead of plastic bags? 2

14. Why is the use of fertilisers and pesticides in excess dangerous? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. How does the removal of a herbivore like a deer affect the grass and the tiger? 3

16. What is the role of a food web in the stability of an ecosystem? 3

17. In a pond, a bird eats fish which eat zooplankton. Identify the trophic levels. 3

OR

State the causes and effects of ozone layer depletion in brief. 3

18. Differentiate between producers and consumers on the basis of mode of nutrition and energy source. 3

OR

How do the activities of humans harm the environment? Give three examples. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Draw a grassland food web (in words) with at least five organisms and explain how it provides stability. 5

OR

Compare natural and artificial ecosystems with respect to energy source, human dependence, biodiversity and stability. Give two examples of each. 5

20. What are the problems caused by non-biodegradable waste? Explain with plastics, DDT and glass, and suggest a plan for a school to reduce waste. 5

OR

Using an example, explain the idea that 'every organism in an ecosystem is important'. 5

END OF QUESTION PAPER — Total: 40 Marks
