ANSWER KEY & MARKING SCHEME SET 1

Chapter 13: **Saving the Gharial** | Class 8 English_Gulmohar | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** Janaki Lenin	Janaki Lenin writes on Indian wildlife and conservation.
2	**(c)** Chambal River	He watched the display there.
3	**(b)** two	Floods and nets claimed the rest.
4	**(b)** Romulus Whitaker	The author describes her husband's efforts.
5	**(c)** clashing snouts like swords	Their teeth may even break.
6	**(d)** floods and fishing nets	Some were washed away; others got tangled in nets.
7	**(c)** fish-eating crocodile	Its slender snout is made for catching fish.
8	**(c)** 50	She lays around fifty in a deep sand nest.
9	**(a)** feed	Trapped animals could not catch food.
10	**(c)** snapping up fish	The shape helps in catching fish.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	The author is Janaki Lenin (1). She describes Romulus Whitaker's efforts to save the gharial (1).	1+1
12	They clash their snouts like swords (1) and may even break their teeth (1).	1+1
13	A programme begun in 1974 with United Nations support (1) involving surveys, captive breeding and release of animals into rivers (1).	1+1
14	It uses the narrow snout to catch fish (1), its main food (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	He develops a ghara at adolescence (1). It helps him make a buzz-snort (1). He also claps his jaws underwater and clashes snouts with rivals (1).	1+1+1
16	Only two of seven released gharials survived (1). Floods and nets undid the work (1). Releasing animals is not enough without a safe habitat (1).	1+1+1
17	Words such as conserve, habitat, ecosystem, captive (1). Meaning of one, e.g. conserve = protect (1). Use in context (1).	1+1+1
	OR: Females compete for good nest sites (1). They lay about fifty eggs in deep sand (1). They camouflage the nests to guard against predators like hyenas (1).	1+1+1
18	It depends on a clean, flowing river with sand banks and fish (1). Its decline signals damage to the river (1). Protecting it protects the whole ecosystem (1).	1+1+1
	OR: Fear and lack of understanding make people hostile (1). They may kill or trap animals (1). Knowledge and care can change this attitude (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Ghara develops at adolescence (1). Buzz-snort attracts females (1). It also warns rivals (1). Underwater jaw-clap observed in the Chambal (1). Snout fights like swords, teeth may break (1).	2+2+1
	OR: Slender snout for fish (1). Sand banks for nesting (1). Camouflaged nests (1). Parental care (1). Dependence on flowing, clean water (1).	2+2+1
20	Females compete for sites (1). About fifty eggs in deep sand (1). Nests camouflaged against hyenas (1). Mother digs up nest for hatchlings (1). Both parents guard the young (1).	2+2+1
	OR: Seven gharials were released (1). Floods washed many away (1). Others were caught in nets (1). Two survived (1). Shows habitat must be safe before release (1).	2+2+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option

attempted. Deduct up to ½ mark for missing units or figures where required.

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 2

Chapter 13: **Saving the Gharial** | Class 8 English_Gulmohar | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** protect eggs from predators like hyenas	Hidden nests are safer.
2	**(a)** river	Its fate mirrors the river ecosystem.
3	**(a)** pot	A pot-like growth (ghara) appears on the male's snout.
4	**(b)** digs up the nest to free them	Her digging helps the young emerge.
5	**(a)** Sri Lanka	India, Bangladesh and Nepal are covered.
6	**(c)** an adolescent male gharial	It develops when the male reaches adolescence.
7	**(a)** Both parents guard the babies	Hatchlings may even climb onto the male's head.
8	**(d)** protect and preserve	Conservation protects nature.
9	**(c)** attract females and warn rival males	It is a mating and warning signal.
10	**(c)** 1974	It started with United Nations support.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	They lay about fifty eggs in deep sand (1) and camouflage the nests against predators such as hyenas (1).	1+1
12	Dams, fishing nets and monsoon floods destroyed its habitat (1), reducing the range from 20,000 to 200 square km (1).	1+1
13	It is a bulbous, pot-like growth on the snout (1) that appears in a male at adolescence (1).	1+1
14	They dig up the nest (1) to free the hatchlings (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Mothers dug up nests to free hatchlings (1). Both parents guarded the young (1). Hatchlings sometimes climbed onto the male's head (1).	1+1+1
16	It grows only on adolescent males (1). It produces the buzz-snort (1). The sound attracts females and warns rivals (1).	1+1+1
17	Gharials get tangled in them (1). Trapped animals cannot feed (1). Many die before they can be freed (1).	1+1+1
	OR: The nest may have been the last recorded in Bangladesh (1). The species was in danger (1). Rearing the young in captivity gave them a chance to survive (1).	1+1+1
18	The mother frees them from the sand nest (1). Both parents guard them (1). The young may rest on the father's head (1).	1+1+1
	OR: Gharial conservation covers several countries (1). Rivers cross borders (1). Cooperation is needed to protect the species (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Team tired after a trek (1). Found a female guarding eggs (1). Probably the last recorded nest in Bangladesh (1). Eggs collected for captive rearing (1). Aim: to save the species (1).	2+2+1
	OR: Gharials eat fish and nest on sand (1). Dams and nets damage this system (1). A dying river means fewer fish and nests (1). Gharial decline warns of a sick river (1). Saving rivers saves the species and people (1).	2+2+1
20	Started in 1974 with UN support (1). Surveys and captive breeding (1). Releases into rivers (1). Limits: only two of seven survived at Satkosia (1). Need for habitat protection (1).	2+2+1
	OR: Greeting and opening (1). Facts on gharial and decline (1). Causes: dams, nets (1). What can be done (1). Closing appeal (1).	2+2+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 3

Chapter 13: **Saving the Gharial** | Class 8 English_Gulmohar | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** the natural home of an animal or plant	It is where a species lives.
2	**(d)** Padma in Bangladesh	This may have been the last nest recorded in Bangladesh.
3	**(d)** releasing animals into rivers	Reared gharials were released.
4	**(a)** kept in confinement	Animals are bred under human care.
5	**(b)** tired after a long trek	They had walked a long way.
6	**(c)** 200 square km	Habitat loss caused the shrinking.
7	**(d)** rounded and swollen	The ghara is a rounded knob.
8	**(d)** to rear the young in captivity	Captive rearing could save the species.
9	**(c)** volcanic eruptions	Dams, nets and floods are named; volcanoes are not.
10	**(a)** competing	Rivals compete for mates and territory.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Only two of the seven survived (1). Floods washed some away and fishing nets trapped others (1).	1+1
12	It helps make a buzz-snort (1) that attracts females and warns rival males (1).	1+1
13	They found a female guarding her eggs (1) and collected the eggs for captive rearing (1).	1+1
14	A habitat is the natural home of a plant or animal (1). A suitable sentence, e.g. 'Dams destroyed the gharial's habitat' (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	It began in 1974 with United Nations support (1). It carried out surveys and captive breeding (1). Reared animals were released into rivers (1).	1+1+1
16	Many years of work have been put in (1). Yet the gharial's survival remains uncertain (1). Habitat protection is still needed (1).	1+1+1
17	Camouflage means hiding by blending with surroundings (1). Females camouflage nests in sand (1). It protects eggs from hyenas (1).	1+1+1
	OR: Dams changed and blocked the rivers (1). Fishing nets trapped the animals (1). Together with floods, they cut the range from 20,000 to 200 square km (1).	1+1+1
18	It is long and slender (1). This shape lets it snap sideways at fish (1). Fish are its chief food (1).	1+1+1
	OR: To inform about the gharial's life (1). To show the threat from human activity (1). To encourage care for rivers and wildlife (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Dams altered rivers (1). Fishing nets trapped gharials (1). Monsoon floods washed away young (1). Nesting sites lost (1). Human pressure grew (1).	2+2+1
	OR: Female guards eggs (1). Mother digs up nest for hatchlings (1). Both parents guard babies (1). Young climb on the male's head (1). This shows that fear of wildlife is misplaced (1).	2+2+1
20	Protect habitats, not just animals (1). Gharial survival mirrors river health (1). Release without safe rivers fails (1). Understanding replaces fear (1). Collective action is necessary (1).	2+2+1
	OR: Habitat protection first (1). Long-term effort needed (1). Use science and observation (1). Local people matter (1). Every river and species deserves care (1).	2+2+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
