THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 3

Chapter 6: **Control and Coordination** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Sex hormones begin to be secreted during: 1

(a) infancy **(b)** old age **(c)** birth **(d)** puberty

2. Vomiting, salivation and blood pressure are regulated by: 1

(a) forebrain **(b)** cerebellum **(c)** medulla **(d)** cerebrum

3. The bending of tendrils is due to: 1

(a) no growth
(b) faster growth on the contact side
(c) less water
(d) faster growth on the side away from contact

4. Thyroxine needs which element for its synthesis? 1

(a) iron **(b)** chlorine **(c)** iodine **(d)** sodium

5. Sudden pulling of leg on touching a thorn is controlled by: 1

(a) cerebrum **(b)** pons **(c)** cerebellum **(d)** spinal cord

6. Roots growing toward a water source show: 1

(a) chemotropism **(b)** phototropism **(c)** geotropism **(d)** hydrotropism

7. An endocrine gland that also has a digestive function is: 1

(a) pancreas **(b)** thyroid **(c)** pituitary **(d)** adrenal

8. Sensory neurons carry impulse: 1

(a) only in the brain **(b)** from receptors to the spinal cord/brain
(c) from brain to muscles **(d)** to glands

9. Plant hormones are transported by: 1

(a) blood **(b)** bile
(c) diffusion from cell to cell **(d)** nerves

10. Which is NOT true of hormones? 1

(a) They are transported by blood **(b)** They are carried by nerves
(c) They act on specific target cells **(d)** They are secreted in small amounts

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. How is the secretion of insulin regulated? 2

12. How does the nervous system protect the body in danger? 2

13. Why does the sensitive plant droop on touch? Is it growth? 2

14. Differentiate between the cerebrum and cerebellum. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how hydrotropism and geotropism help roots. 3

16. Compare the structure of sensory and motor neurons. 3

17. Why is the brain called the central processing unit of the body? 3

OR

Why is the pituitary called the master gland? Name three hormones of the pituitary. 3

18. Why is the spinal cord injury serious? 3

OR

State the effect of undersecretion and oversecretion of growth hormone. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Compare the nervous and endocrine systems; explain why both are needed. 5

OR

Explain why plants can respond without a nervous system. Give two ways. 5

20. Explain coordination in plants with tropic and nastic movements and hormones. 5

OR

Explain the role of the spinal cord and the protection of the central nervous system. 5

END OF QUESTION PAPER — Total: 40 Marks
