CLASS 10 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 3

Chapter 7: **How do Organisms Reproduce?** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The thick, richly supplied lining of the uterus prepares for 1

(a) egg production **(b)** implantation of the embryo
(c) sperm production **(d)** digestion

2. Which pair is correctly matched? 1

(a) Yeast - fission only **(b)** Hydra - budding
(c) Rhizopus - fragmentation **(d)** Amoeba - budding

3. Which structure develops into the fruit wall? 1

(a) Anther **(b)** Stigma **(c)** Ovary wall **(d)** Style

4. If the egg is fertilised, menstruation 1

(a) gets heavier **(b)** occurs as usual **(c)** does not occur **(d)** occurs twice

5. Which cannot reproduce by regeneration? 1

(a) Human beings **(b)** Hydra **(c)** Some sea stars **(d)** Planaria

6. The stalk of a flower is the 1

(a) filament **(b)** style **(c)** sepal **(d)** pedicel

7. Release of the egg from the ovary into the oviduct is 1

(a) ovulation **(b)** implantation **(c)** fertilisation **(d)** pollination

8. Which does NOT contribute to genetic variation in sexual reproduction? 1

(a) Binary fission **(b)** Cross-pollination
(c) Copying errors in DNA **(d)** Gamete fusion

9. Why do many flowers produce a large amount of pollen? 1

(a) Much pollen is wasted before reaching a stigma
(b) it blocks the stigma
(c) it lowers fruit production
(d) pollen is edible

10. Which is a secondary sexual character in girls? 1

(a) Broad shoulders only **(b)** Breast development
(c) Beard **(d)** Deep voice

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. What would happen to the embryo if the placenta did not form? 2

12. How does the process of budding in yeast differ from that in Hydra? 2

13. Which part of the flower becomes the seed and which becomes the fruit after fertilisation? 2

14. Why does the thickness of the uterine lining increase in the second half of the menstrual cycle? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Distinguish between a seed and a fruit. 3

16. What is the importance of the umbilical cord and placenta together? 3

17. What are the advantages of the female reproductive organs' having a special muscular uterus? 3

OR

Distinguish between unisexual and bisexual flowers with an example for each. 3

18. How do the roles of testosterone and oestrogen differ at puberty? 3

OR

Compare the roles of the ovary and the testis. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain the process of DNA copying and its importance to variation and survival of species. 5

OR

Explain the changes during puberty in boys and girls and the hormones responsible. 5

20. Describe the human male reproductive system and give the function of each part. 5

OR

Describe the structure of a seed and conditions needed for germination with the changes in a seedling. 5

END OF QUESTION PAPER — Total: 40 Marks
