ANSWER KEY & MARKING SCHEME SET 1

Chapter 4: **The Age of Industrialisation (History)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** James Watt	Patented 1781
2	**(c)** workers for jobs	Corrupt practices
3	**(d)** 1912	Jamshedpur
4	**(a)** gomasthas	Supervised weavers
5	**(b)** London	Merchant finishers
6	**(b)** show the place of manufacture and the quality	Branding
7	**(a)** women who depended on hand spinning	Fear of unemployment
8	**(c)** growth of small-scale units	Handlooms persisted
9	**(b)** James Hargreaves	1764
10	**(c)** late 18th century	Industrial revolution

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Swadeshi was the movement to use Indian-made goods and boycott foreign goods (1); It increased the demand for Indian cloth and helped Indian mills (1).	1+1
12	The spinning jenny, invented by James Hargreaves in 1764, speeded up the spinning process (1); It reduced labour demand because one worker could turn several spindles (1).	1+1
13	The Company wanted to eliminate competition, control costs and ensure regular supply of cloth (1); Gomasthas supervised weavers so that they could not sell to other buyers (1).	1+1
14	Labour was plentiful and cheap, and demand for many goods was seasonal (1); Machines were costly to install and repair, so owners found hand labour more profitable (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Proto-industrialisation was the early phase of industrialisation in Europe before factories (1); Merchants gave raw materials to peasants and artisans in villages to produce goods (1); The goods were sold in international markets, with the finished product collected by merchants (1).	1+1+1
16	Mill workers lived in crowded and unhygienic conditions (1); They worked long hours for low wages (1); Jobbers demanded bribes, and jobs were not secure (1).	1+1+1
17	Weavers in many villages left to settle in other villages where they could find other buyers (1); Some weaver families collaborated with peasants to resist the Company's officials (1); Weavers also refused to take advances and closed their looms in protest (1).	1+1+1
	OR: Manufacturers used labels showing the place of manufacture and the quality, e.g. 'Made in Manchester' (1); Pictures of Indian gods and goddesses on labels and calendars attracted buyers (1); Indian manufacturers used nationalist messages in ads to ask people to buy Indian products (1).	1+1+1
18	Handloom weavers produced fine, specialised cloth such as saris and bordered cloth that mills could not copy (1); They adopted the fly shuttle to raise productivity (1); They bought cheap mill yarn, so handloom cloth production even expanded in the twentieth century (1).	1+1+1
	OR: Richard Arkwright created the cotton mill (1); James Watt improved Newcomen's steam engine, making it more efficient (1); The spinning jenny of James Hargreaves speeded up spinning (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Jobbers were old, trusted workers employed by mill owners to recruit workers (1); They brought people from their villages and helped them settle in the city (1); They demanded money and gifts in return for jobs (1); Workers lived in crowded conditions and worked long hours (1); The number of factory workers rose from 584,000 in 1901 to 2.4 million in 1946 (1).	1+1+1+1+1

	OR: Advertisements made products seem desirable and necessary (1); Manufacturers put labels on goods showing the place of manufacture and quality (1); Pictures of Indian gods and goddesses on labels and calendars appealed to buyers (1); Calendars could be used even by people who could not read (1); Indian advertisers used nationalist messages to promote Swadeshi goods (1).	1+1+1+1+1
20	Dwarkanath Tagore made money in the China trade and invested in shipping, mining and plantations (1); Dinshaw Petit and Jamsetjee Tata made fortunes in the China trade (1); Seth Hukumchand set up the first Indian jute mill in Calcutta in 1917 (1); G.D. Birla's family also grew through business (1); Many early entrepreneurs got capital from trade, opium and raw cotton exports (1).	1+1+1+1+1
	OR: Indian mills faced competition from cheap Manchester goods (1); Tariffs on imported cloth were low, so mills had little protection (1); Mills at first produced coarse yarn and had difficulty in making fine cloth (1); Capital was limited and the colonial government favoured British interests (1); Labour recruitment depended on jobbers who took bribes (1).	1+1+1+1+1

Mistakes to avoid:

- Saying industrialisation began only with factories; **proto-industrialisation** (production for a world market by merchants and rural producers) came first.
- Mixing up the roles of the **stapler** (sorts wool by fibre) and the **fuller** (gathers cloth by pleating).
- Confusing **gomasthas** (Company's paid servants who supervised weavers) with **jobbers** (workers' recruiters in factories).
- Giving wrong dates: the first cotton mill in Bombay was **1854**, and the first jute mill in Bengal **1855**.
- Writing that machines replaced all hand labour in Britain; in reality most industries still used **hand labour** in the nineteenth century.
- Attributing the improved steam engine to Newcomen alone; **James Watt** improved Newcomen's engine and patented it in 1781.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 4: **The Age of Industrialisation (History)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** seasonal demand and cheap labour	Cheap workers
2	**(a)** Calcutta in 1917	Marwari businessman
3	**(d)** iron and steel works	Jamshedpur
4	**(c)** European companies' monopoly	Colonial trade
5	**(c)** Handloom weavers bought the yarn	Strategy
6	**(d)** Indian gods and goddesses	Appeal to Indians
7	**(d)** industrial production for an international market before factories	Merchants and rural craftsmen
8	**(c)** competition from cheap imported Manchester cloth	Competition
9	**(c)** 1854	By Indian entrepreneurs
10	**(c)** selling to other buyers and leaving the villages	Resistance

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Gomasthas were paid servants of the East India Company appointed to supervise weavers (1); They collected cloth, checked its quality and prevented weavers from dealing with other buyers (1).	1+1
12	Advertisements make products appear desirable and necessary (1); They help create new consumers and shape their tastes (1).	1+1
13	Under the putting-out system merchants gave raw material to rural households to produce goods (1); The merchants then collected the finished goods and paid for the work (1).	1+1
14	Cheap machine-made Manchester cloth flooded the Indian market (1); Indian handloom weavers lost buyers and many were ruined (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Small workshops and household units made up a large share of industrial output (1); They met local demand with cheap and specialised goods (1); Handloom weavers and other artisans continued to find buyers (1).	1+1+1
16	In towns, trade and crafts guilds were powerful and restricted new entrants and production (1); So merchants moved to villages where peasants and artisans had small land and sought extra income (1); Rural labour was cheaper and not controlled by guilds (1).	1+1+1
17	The Swadeshi movement of the early twentieth century urged people to boycott foreign cloth (1); The demand for Indian-made cloth and yarn rose (1); Indian mills expanded and industrialists supported the national movement (1).	1+1+1
	OR: Jobbers were trusted old workers employed to recruit new workers from villages (1); They found jobs for recruits, helped them settle in the city (1); They also demanded money and favours and so became powerful (1).	1+1+1
18	Growth of the market for goods depended on creating consumers (1); Advertisements, labels and calendars popularised products (1); Producers also shaped taste through appeals to religion and nationalism (1).	1+1+1
	OR: Indians exported raw cotton and opium to China and made money (1); This capital was later invested in mills and industries (1); Dwarkanath Tagore and Dinshaw Petit made fortunes from the China trade (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	The Swadeshi movement made people boycott foreign cloth (1); The demand for Indian mill cloth and yarn increased (1); Indian mills expanded, particularly in Bombay and Ahmedabad (1); Industrialists supported the national movement (1); It also gave handloom weavers a market (1).	1+1+1+1+1

	OR: Factory workers came from nearby districts and villages (1); They worked long hours for low wages (1); Jobbers controlled recruitment and took bribes (1); Jobs were seasonal, and workers often returned to villages for farming (1); Women were also employed, but conditions were hard and living space was cramped (1).	1+1+1+1+1
20	Proto-industrialisation is the phase of industrial production for the international market that was not factory-based (1); Merchants gave raw material to peasants and artisans in villages (1); Production was done at home, with the whole family working (1); Merchants moved to the countryside as town guilds were powerful (1); It prepared the ground for factory production in Europe (1).	1+1+1+1+1
	OR: Mills made yarn which handloom weavers used (1); Weavers adopted fly shuttle looms and increased productivity (1); They made fine, specialised cloth that mills could not copy (1); Handloom cloth production expanded in the twentieth century (1); So the two sectors co-existed, with small units serving local demand (1).	1+1+1+1+1

Mistakes to avoid:

- Saying industrialisation began only with factories; **proto-industrialisation** (production for a world market by merchants and rural producers) came first.
- Mixing up the roles of the **stapler** (sorts wool by fibre) and the **fuller** (gathers cloth by pleating).
- Confusing **gomasthas** (Company's paid servants who supervised weavers) with **jobbers** (workers' recruiters in factories).
- Giving wrong dates: the first cotton mill in Bombay was **1854**, and the first jute mill in Bengal **1855**.
- Writing that machines replaced all hand labour in Britain; in reality most industries still used **hand labour** in the nineteenth century.
- Attributing the improved steam engine to Newcomen alone; **James Watt** improved Newcomen's engine and patented it in 1781.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 4: **The Age of Industrialisation (History)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** peasants and artisans in villages	Rural production
2	**(a)** 1861	Gujarat
3	**(a)** 1855	Bengal
4	**(b)** Surat, Masulipatam, Hooghly	Old ports
5	**(c)** Richard Arkwright	1730s onwards
6	**(c)** shipping, mining and plantations	Bengal entrepreneur
7	**(c)** Thomas Newcomen	Early engine
8	**(b)** John Kay	Weaving device
9	**(a)** middlemen who recruited workers	Recruited labour
10	**(d)** trade with China	Opium trade

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Stapliers sorted wool according to its fibre and fullers gathered the cloth by pleating (1); They were specialists in the preparation of woollen cloth before it was sold (1).	1+1
12	Jamsetji Tata set up the Tata Iron and Steel Company (1); Seth Hukumchand set up the first Indian jute mill in Calcutta in 1917 (1).	1+1
13	Jobbers were people employed by industrialists to recruit workers for the mills (1); They got jobs for new recruits, helped them settle in the city and often took money in return (1).	1+1
14	Proto-industrialisation was industrial production for an international market before the coming of factories (1); It was carried out in villages by peasants and artisans working for merchants (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Indian handloom weavers needed yarn and mills sold it to them (1); Spinning machines were simpler than weaving machines, and Manchester dominated cloth (1); So the early mills specialised in coarse yarn (1).	1+1+1
16	Labour was plentiful in Britain, so wages were low (1); Machines were costly to install and repair (1); Demand for many goods was seasonal and fashion changed, requiring varied hand-made goods (1).	1+1+1
17	Dwarkanath Tagore, Dinshaw Petit, Jamsetjee Tata and Seth Hukumchand were early industrialists (1); Many made money through trade with China, shipping or the opium trade (1); They invested in mills, mining, shipping and steel (1).	1+1+1
	OR: The first cotton mill in India was set up in Bombay in 1854 (1); The first jute mill came up in Bengal in 1855 and an Ahmedabad mill in 1861 (1); Local merchants who earned from trade with China supplied the capital (1).	1+1+1
18	Manchester cloth was machine-made and therefore cheaper (1); It flooded the Indian market after the British government removed duties on it (1); Indian handloom cloth could not compete and many weavers lost their livelihood (1).	1+1+1
	OR: The Company appointed paid gomasthas to supervise weavers, collect supplies and examine quality (1); It prevented Company weavers from dealing with other buyers by giving them advances (1); Thus it eliminated competition and control over prices (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	The first factories in England came up in the 1730s (1); Richard Arkwright created the cotton mill (1); The spinning jenny made spinning faster, and James Watt improved the steam engine (1); Cotton and iron were the leading industries (1); The scale of production grew, and new cities such as Manchester developed (1).	1+1+1+1+1

	OR: The first cotton mill was set up in Bombay in 1854 (1); The first jute mill came up in Bengal in 1855 (1); An Ahmedabad cotton mill started in 1861 (1); Indian merchants provided the capital from trade with China (1); Tata Iron and Steel started production in 1912 (1).	1+1+1+1+1
20	Before the Company, Indian textiles were traded from Surat, Masulipatam and Hooghly (1); The Company monopolised the trade and tried to remove competition (1); It appointed gomasthas to supervise weavers and forced them to sell only to it (1); Old ports such as Surat declined as new ports such as Bombay and Calcutta grew (1); Later British machine-made goods destroyed the market of Indian weavers (1).	1+1+1+1+1
	OR: Labour was cheap and plentiful in Victorian Britain (1); Machines were costly to buy and repair (1); Demand for goods was seasonal in many trades such as gas works and book binding (1); Fashion changed, so varied hand-made goods were needed (1); The upper classes preferred hand-made goods as symbols of class (1).	1+1+1+1+1

Mistakes to avoid:

- Saying industrialisation began only with factories; **proto-industrialisation** (production for a world market by merchants and rural producers) came first.
- Mixing up the roles of the **stapler** (sorts wool by fibre) and the **fuller** (gathers cloth by pleating).
- Confusing **gomasthas** (Company's paid servants who supervised weavers) with **jobbers** (workers' recruiters in factories).
- Giving wrong dates: the first cotton mill in Bombay was **1854**, and the first jute mill in Bengal **1855**.
- Writing that machines replaced all hand labour in Britain; in reality most industries still used **hand labour** in the nineteenth century.
- Attributing the improved steam engine to Newcomen alone; **James Watt** improved Newcomen's engine and patented it in 1781.
