ANSWER KEY & MARKING SCHEME SET 1

Chapter 4: **The Age of Industrialisation (History)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** Britain	18th century
2	**(b)** the place of manufacture and the manufacturer	Branding
3	**(a)** Tata Steel	1912
4	**(c)** Gujarat	Textile city
5	**(d)** Indian textiles	Trade
6	**(a)** rural families	Cottage production
7	**(a)** Parsi industrialist	Tata group
8	**(c)** varied, specialised hand-made goods	Variety
9	**(b)** women	Cottage
10	**(c)** attract and create buyers	Market

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	A label is a tag on a product showing the maker and the place of production (1); It assures buyers about quality (1).	1+1
12	A handloom is a hand-operated loom on which cloth is woven (1); Handloom weavers used cotton and silk yarn (1).	1+1
13	Industrialisation is the shift from hand production to large-scale machine production in factories (1); It began in Britain in the late eighteenth century (1).	1+1
14	Proto-industrialisation was industrial production for distant markets before factories (1); It was done in villages by peasants and artisans for merchants (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Jamsetji Tata set up iron and steel works (1); Seth Hukumchand set up the first Indian jute mill in Calcutta (1); Dwarkanath Tagore and Dinshaw Petit were pioneers in the China trade (1).	1+1+1
16	Long working hours (1); Low wages and insecure jobs (1); Crowded and unhygienic living conditions (1).	1+1+1
17	Jobbers recruited workers from villages (1); They helped new workers settle in the city (1); They often took money from the workers (1).	1+1+1
	OR: The spinning jenny of James Hargreaves (1); The cotton mill of Richard Arkwright (1); The improved steam engine of James Watt (1).	1+1+1
18	They attracted Indian buyers who respected the gods (1); They gave products a sacred and trusted look (1); They made products popular even among people who could not read (1).	1+1+1
	OR: The Company forced weavers to sell only to it (1); Gomasthas imposed low prices and punished them (1); Cheap Manchester cloth took away their market (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Proto-industrialisation was industrial production for an international market before factories (1); Merchants gave raw materials to rural households (1); Peasants and artisans produced goods at home (1); Merchants collected the finished goods and sold them (1); It began because town guilds restricted production (1).	1+1+1+1+1
	OR: The Company appointed gomasthas to supervise weavers (1); Weavers were given advances and forced to sell only to the Company (1); They were not allowed to deal with other buyers (1); Gomasthas fixed low prices and punished weavers (1); This reduced weavers' bargaining power (1).	1+1+1+1+1
20	Jobbers were trusted workers employed by mill owners to recruit labour (1); They brought workers from their villages (1); They helped new workers to settle in the city (1); They took money or gifts for giving jobs (1); They became powerful in mills (1).	1+1+1+1+1

	OR: Industrialisation began in Britain in the late eighteenth century (1); Richard Arkwright created the cotton mill (1); James Watt improved the steam engine (1); The spinning jenny made spinning faster (1); Cotton and iron became leading industries and cities like Manchester grew (1).	1+1+1+1+1

Mistakes to avoid:

- Saying industrialisation began only with factories; **proto-industrialisation** (production for a world market by merchants and rural producers) came first.
- Mixing up the roles of the **stapler** (sorts wool by fibre) and the **fuller** (gathers cloth by pleating).
- Confusing **gomasthas** (Company's paid servants who supervised weavers) with **jobbers** (workers' recruiters in factories).
- Giving wrong dates: the first cotton mill in Bombay was **1854**, and the first jute mill in Bengal **1855**.
- Writing that machines replaced all hand labour in Britain; in reality most industries still used **hand labour** in the nineteenth century.
- Attributing the improved steam engine to Newcomen alone; **James Watt** improved Newcomen's engine and patented it in 1781.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 4: **The Age of Industrialisation (History)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** Marwari businessman	Jute mill
2	**(b)** China	Capital
3	**(d)** popularise products even among people who could not read	Advertising
4	**(c)** machine production under one roof	Mass production
5	**(c)** handloom weavers	Raw material
6	**(a)** several threads at the same time	Invention
7	**(a)** 1854	Bombay Spinning
8	**(b)** paid servants of the Company who supervised weavers	Weavers' supervisors
9	**(c)** Bengal	Entrepreneur
10	**(a)** Indian handloom weavers	Competition

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Yarn is thread spun from cotton, wool or jute (1); Weavers use yarn to weave cloth (1).	1+1
12	A gomastha was a paid servant of the East India Company who supervised weavers (1); He collected cloth and checked its quality (1).	1+1
13	A mill is a factory where cotton, jute or wool is spun or woven by machines (1); The first Indian cotton mill started in Bombay in 1854 (1).	1+1
14	A factory is a building where goods are produced by machines under one roof (1); Workers are employed for wages (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	The East India Company controlled the trade (1); New ports such as Bombay and Calcutta grew (1); European monopoly ended Indian merchants' control (1).	1+1+1
16	The cotton mill at Bombay in 1854 (1); The jute mill in Bengal in 1855 (1); The Ahmedabad cotton mill in 1861 (1).	1+1+1
17	Labels on products (1); Calendars with images of gods (1); Advertisements in newspapers and magazines (1).	1+1+1
	OR: Indian handloom weavers lost buyers (1); Many weavers lost their income (1); Raw cotton exports from India increased (1).	1+1+1
18	Boycott of foreign cloth (1); Use of Indian-made goods (1); Growth of Indian mills (1).	1+1+1
	OR: Surat on the Gujarat coast (1); Masulipatam on the Coromandel coast (1); Hooghly in Bengal (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Dwarkanath Tagore invested in shipping, mining and plantations (1); Dinshaw Petit and Jamsetjee Tata made money in the China trade (1); Jamsetji Tata later set up iron and steel works (1); Seth Hukumchand set up the first Indian jute mill in 1917 (1); Marwari and Parsi merchants played a major role (1).	1+1+1+1+1
	OR: Cheap machine-made cloth from Manchester entered the Indian market (1); It was cheaper than handloom cloth (1); Indian weavers lost buyers and many gave up weaving (1); India began to export raw cotton to Britain (1); The earlier prosperity of ports and weaving centres declined (1).	1+1+1+1+1
20	Indian textiles were famous in Europe for their fine quality (1); They were traded from ports like Surat, Masulipatam and Hooghly (1); Indian and foreign merchants bought cloth from weavers (1); Weavers sold to many buyers and had bargaining power (1); European companies later tried to control this trade (1).	1+1+1+1+1

	OR: The Swadeshi movement urged people to boycott foreign cloth (1); Demand for Indian cloth rose (1); Indian mills expanded and made profits (1); Industrialists supported the national movement (1); Handloom weavers also gained (1).	1+1+1+1+1

Mistakes to avoid:

- Saying industrialisation began only with factories; **proto-industrialisation** (production for a world market by merchants and rural producers) came first.
- Mixing up the roles of the **stapler** (sorts wool by fibre) and the **fuller** (gathers cloth by pleating).
- Confusing **gomasthas** (Company's paid servants who supervised weavers) with **jobbers** (workers' recruiters in factories).
- Giving wrong dates: the first cotton mill in Bombay was **1854**, and the first jute mill in Bengal **1855**.
- Writing that machines replaced all hand labour in Britain; in reality most industries still used **hand labour** in the nineteenth century.
- Attributing the improved steam engine to Newcomen alone; **James Watt** improved Newcomen's engine and patented it in 1781.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 4: **The Age of Industrialisation (History)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** workers	Middlemen
2	**(a)** Bengal	1855
3	**(a)** Britain	19th century
4	**(a)** hand labour	Economic
5	**(c)** factories and mills	Power
6	**(b)** cotton mills	England
7	**(b)** of one's own country	Indian goods
8	**(a)** woven by hand on a loom	Craft
9	**(d)** handloom workers	Craft
10	**(d)** ports of the Indian textile trade	Trade ports

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	An advertisement is a public notice that promotes a product (1); It makes people want to buy it (1).	1+1
12	A jobber is a person employed by a mill owner to recruit workers (1); He often took money or favours from the workers (1).	1+1
13	Swadeshi means use of goods made in one's own country (1); It involved boycott of foreign cloth (1).	1+1
14	Steam power is energy obtained by heating water to produce steam to drive machines (1); James Watt improved the steam engine (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Production was for an international market (1); It was done in villages by peasants and artisans (1); Merchants supplied the raw material and collected the product (1).	1+1+1
16	Labour was cheap and plentiful (1); Machines were costly to install and repair (1); Demand for many goods was seasonal (1).	1+1+1
17	To run factories and mills (1); To drive locomotives and ships (1); To pump water out of mines (1).	1+1+1
	OR: It appointed gomasthas to supervise weavers (1); It gave advances to bind weavers (1); It prevented them from selling to other buyers (1).	1+1+1
18	Competition from cheap British imports (1); Little protection through tariffs (1); Shortage of capital and skilled labour (1).	1+1+1
	OR: Goods are produced faster and in large quantity (1); Production costs fall (1); Goods are of uniform quality (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Handloom weavers made fine, specialised cloth that mills could not produce (1); They adopted the fly shuttle to raise productivity (1); They bought cheap mill yarn (1); Handloom cloth production expanded in the twentieth century (1); Some of them found buyers in the Indian market (1).	1+1+1+1+1
	OR: In Britain, labour was plentiful and wages were low (1); Machines were costly to buy and repair (1); Many trades had seasonal demand (1); Fashion changed often and needed varied goods (1); Upper classes preferred hand-made goods (1).	1+1+1+1+1
20	The first cotton mill in Bombay was set up in 1854 (1); The first jute mill came up in Bengal in 1855 (1); The Ahmedabad cotton mill began in 1861 (1); Indian merchants who earned from the China trade provided capital (1); TISCO began production in 1912 (1).	1+1+1+1+1

	OR: Advertisements aimed to make products desirable and create new consumers (1); Labels showed the place of manufacture and quality (1); Images of gods were printed on labels and calendars (1); Calendars were used even by those who could not read (1); Later Indian advertisers used nationalist messages (1).	1+1+1+1+1

Mistakes to avoid:

- Saying industrialisation began only with factories; **proto-industrialisation** (production for a world market by merchants and rural producers) came first.
- Mixing up the roles of the **stapler** (sorts wool by fibre) and the **fuller** (gathers cloth by pleating).
- Confusing **gomasthas** (Company's paid servants who supervised weavers) with **jobbers** (workers' recruiters in factories).
- Giving wrong dates: the first cotton mill in Bombay was **1854**, and the first jute mill in Bengal **1855**.
- Writing that machines replaced all hand labour in Britain; in reality most industries still used **hand labour** in the nineteenth century.
- Attributing the improved steam engine to Newcomen alone; **James Watt** improved Newcomen's engine and patented it in 1781.
