CLASS 10 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 6: **Resources and Development (Geography)** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A farmer ploughs along the contour lines in the Western Ghats. This reduces 1

(a) water run-off and soil loss **(b)** rainfall
(c) air humidity **(d)** crop diversity

2. Which international summit gave sustainable development a global agenda? 1

(a) Bandung conference **(b)** the Berlin conference
(c) the Rio Earth Summit of 1992 **(d)** Bretton Woods

3. Assertion (A): Resources are unevenly distributed across India. Reason (R): Planning at national, state and local levels is necessary. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

4. Water contains hydrogen and oxygen, which can be energy sources, but we lack technology to use them. Water in this sense is 1

(a) stock **(b)** developed resource
(c) waste **(d)** reserve

5. Which statement about stock is correct? 1

(a) it is in use
(b) it is renewable only
(c) it is part of reserves
(d) it cannot be used because the technology is not available

6. Assertion (A): Shelter belts help in dry areas of Gujarat and Rajasthan. Reason (R): They reduce the speed of the wind and check soil blowing. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

7. Assertion (A): Mining causes land degradation in Jharkhand. Reason (R): Deforestation accompanies mining and leaves deep scars. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

8. Which soil is best suited for cotton? 1

(a) arid soil **(b)** black soil **(c)** alluvial soil **(d)** laterite soil

9. **Assertion (A):** Contour ploughing helps in soil conservation on slopes. 1
Reason (R): Ploughing along the contour lines decelerates the flow of water down the slopes.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** The Rio de Janeiro Earth Summit took place in 1992. 1
Reason (R): Agenda 21 aims at achieving global sustainable development through combating environmental damage, poverty and disease.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. How can planning reduce regional imbalance? 2

12. Why is renewable not always unlimited? 2

13. Why does sheet erosion go unnoticed? 2

14. Why do some regions with high resource wealth remain poor? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain the role of community in resource management. 3

16. Examine why renewable resources also need conservation. 3

17. Explain how technology can lead to resource creation or loss. 3

OR

Explain how soil type influences crop choices. 3

18. Evaluate 'Resources are what people make of them'. 3

OR

Explain how contour bunding helps in Western Ghats. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** A farmer in a hilly district of Uttarakhand finds that after heavy rain, running water has cut deep channels through his sloping field, making it unfit for cultivation. His neighbour has made steps on the slope and sowed crops in strips, with a row of trees at the field edge. 5
(i) Name the type of erosion described.
(ii) What are such badly cut lands called?
(iii) Name the method of making steps on slopes.
(iv) Explain how strip cropping and shelter belts help prevent soil erosion.

20. Discuss the relationship between land, population and economic development in India. 5

OR

Discuss why soil is a vital resource. 5

END OF QUESTION PAPER — Total: 40 Marks
