ANSWER KEY & MARKING SCHEME SET 1

Chapter 7: **Forest and Wildlife Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** local communities in protecting forests	Participation
2	**(c)** International Union for Conservation of Nature	Red Data Book
3	**(c)** 8%	47,000 plant species and 81,000 faunal species
4	**(a)** habitat destruction	Human pressure
5	**(a)** Sundarbans	Delta forest
6	**(a)** Tehri	Seed saving
7	**(b)** poaching and loss of habitat	Threats
8	**(d)** 1973	Tiger conservation
9	**(a)** Bhairodev Dakav Sonchuri	Their own sanctuary
10	**(a)** Corbett National Park	Uttarakhand

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Protected forests are protected from further depletion (1); They form almost one-third of the total forest area (1).	1+1
12	Project Tiger was launched in 1973 to protect tigers whose numbers had fallen sharply (1); It set up tiger reserves such as Corbett, Sunderbans and Manas (1).	1+1
13	Reserved forests are forests permanently protected for timber and forest produce, with no grazing or hunting (1); They form more than half of the total forest area (1).	1+1
14	Unclassed forests are other forests and wastelands belonging to the government, individuals and communities (1); They are not classified as reserved or protected (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	By protecting habitats through national parks and sanctuaries (1); By laws such as the 1972 Act and species projects like Project Tiger (1); By involving people in conservation, as in JFM (1).	1+1+1
16	In Alwar, villagers declared 1,200 hectares of forest as the Bhairodev Dakav 'Sonchuri' (1); They made their own rules and banned hunting (1); They protected the wildlife from outsiders (1).	1+1+1
17	Mining clears vegetation and pollutes land and water (1); The Buxa Tiger Reserve in West Bengal is threatened by dolomite mining (1); It has disturbed the habitat of species such as Indian elephants (1).	1+1+1
	OR: It was launched in 1973 to protect the tiger (1); Tiger reserves were created in various states (1); It aims to maintain viable tiger populations and protect their habitat (1).	1+1+1
18	The 1972 Act provided for protection of wild animals, birds and plants (1); It banned hunting and listed protected species (1); It set up national parks, sanctuaries and Project Tiger (1).	1+1+1
	OR: Big river valley projects submerge large forest areas (1); Since 1952, thousands of sq. km of forest were cleared for them (1); Tribals lose habitats and wildlife loses homes (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Reserved forests form more than half of the forest area and are the most valuable (1); Protected forests form about one-third and are guarded against depletion (1); Together they form permanent forest estates (1); Unclassed forests are other forests and wastelands owned by the government, individuals and communities (1); Madhya Pradesh has the largest area under permanent forests (1).	1+1+1+1+1
	OR: Large river valley projects submerge forests and displace tribals (1); Mining clears vegetation and pollutes land and water (1); Roads and railways cut up habitats (1); Expansion of agriculture takes forest land (1); Wildlife loses habitat and many species are threatened (1).	1+1+1+1+1

20	Project Tiger was launched in 1973 to save the tiger (1); Tiger numbers had fallen from 55,000 to 1,827 (1); Tiger reserves like Corbett, Sunderbans, Manas and Periyar were set up (1); The Wildlife Protection Act of 1972 banned hunting and protected habitats (1); It also set up national parks and sanctuaries (1).	1+1+1+1+1
	OR: Forests purify air, regulate rainfall and protect soil (1); They store water and prevent floods (1); They are home to a wide variety of wildlife (1); They provide timber, fuel, food, fodder and medicines (1); Many people depend on them for living (1).	1+1+1+1+1

Mistakes to avoid:

- Saying reserved and protected forests have the same status; **reserved** forests are the most valuable (more than half of forest land), **protected** almost one-third.
- Believing the Forest Department alone runs **JFM**; it needs village institutions, and the programme began in **Odisha (1988)**.
- Writing that Project Tiger started in **1972** (the year of the Wildlife Protection Act); it was launched in **1973**.
- Confusing the **Chipko movement** (resisting felling in the Himalayas) with the **Beej Bachao Andolan** (saving traditional seeds, Tehri).
- Treating **sacred groves** as government-protected areas; they are protected by community belief.
- Blaming only one cause for loss of forests; expansion of agriculture, large development projects, mining, grazing and fuel wood all contribute.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 7: **Forest and Wildlife Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** extinct species	Lost species
2	**(b)** more than half of the total forest area	Most protected
3	**(b)** Odisha	1988
4	**(a)** the Himalayas	Against deforestation
5	**(d)** Madhya Pradesh	About 75%
6	**(c)** the government as well as private individuals and communities	Other forests
7	**(c)** blue sheep	Asiatic elephant, gharial
8	**(d)** 47,000	Flowering plants about 15,000
9	**(d)** extinct species	Examples Asiatic cheetah
10	**(b)** one-horned rhinoceros	Assam

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Endemic species are those found only in some particular areas (1); Examples are the Andaman wild pig and the Nicobar pigeon (1).	1+1
12	Corbett National Park in Uttarakhand (1); Kaziranga National Park in Assam (1).	1+1
13	Joint Forest Management involves local communities in the protection and management of degraded forests (1); It began in Odisha in 1988, and villagers share the benefits (1).	1+1
14	The Indian Wildlife (Protection) Act of 1972 provided legal protection to habitats and banned hunting (1); It listed protected species and set up national parks and sanctuaries (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Chipko movement in the Himalayas saw people hug trees to prevent felling (1); Beej Bachao Andolan in Tehri saved traditional seeds and promoted crop diversity (1); Both show that local communities can conserve resources (1).	1+1+1
16	Forests provide timber, fuel, food, fodder and medicines (1); They regulate rainfall, protect soil and water (1); Forest-dwelling people depend on them for their livelihood (1).	1+1+1
17	Reserved forests are permanently protected and form over half of forest area (1); Protected forests are guarded against depletion, about one-third (1); Unclassed forests are other forests and wastelands owned by government, private persons and communities (1).	1+1+1
	OR: The Asiatic cheetah became extinct due to hunting and loss of habitat (1); Its prey base declined (1); It is now no longer found in India (1).	1+1+1
18	Endangered species are in danger of extinction, e.g., black buck, crocodile, Indian wild ass (1); Vulnerable species are likely to move into the endangered category if causal factors continue, e.g., blue sheep, Asiatic elephant, Gangetic dolphin (1); Both need protection to survive (1).	1+1+1
	OR: Tigers are at the top of the food chain (1); Their decline from 55,000 in the early 1900s to 1,827 in 1973 showed danger (1); Protecting them preserves the whole forest ecosystem (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Tiger numbers fell from 55,000 in the early 1900s to 1,827 in 1973 (1); Poaching for trade in skins and bones, loss of habitat and decline of prey caused it (1); Project Tiger was launched in 1973 (1); Tiger reserves were established across the country (1); Protecting tigers also protects the forests and their other species (1).	1+1+1+1+1
	OR: Reduce use of forest produce and avoid wastage (1); Support conservation projects and join community protection (1); Avoid buying wildlife products and report poaching (1); Plant trees and keep sacred groves (1); Spread awareness and respect laws (1).	1+1+1+1+1

20	Forest area has decreased due to expansion of agriculture and shifting cultivation (1); River valley projects and mining have cleared forests (1); Colonial railways, ships and commercial forestry also reduced forests (1); Hunting, poaching and overgrazing reduce wildlife (1); Fires, pollution and development projects add to the loss (1).	1+1+1+1+1
	OR: Some communities protect sacred groves for religious reasons (1); Mundas and Santhals worship mahua and kadamba trees (1); Odisha and Bihar tribes worship tamarind and mango trees (1); Many Indians revere peepal and banyan (1); Such traditions protect trees and wildlife without law (1).	1+1+1+1+1

Mistakes to avoid:

- Saying reserved and protected forests have the same status; **reserved** forests are the most valuable (more than half of forest land), **protected** almost one-third.
- Believing the Forest Department alone runs **JFM**; it needs village institutions, and the programme began in **Odisha (1988)**.
- Writing that Project Tiger started in **1972** (the year of the Wildlife Protection Act); it was launched in **1973**.
- Confusing the **Chipko movement** (resisting felling in the Himalayas) with the **Beej Bachao Andolan** (saving traditional seeds, Tehri).
- Treating **sacred groves** as government-protected areas; they are protected by community belief.
- Blaming only one cause for loss of forests; expansion of agriculture, large development projects, mining, grazing and fuel wood all contribute.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

ANSWER KEY & MARKING SCHEME SET 3

Chapter 7: **Forest and Wildlife Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** endangered species	Number reduced critically
2	**(d)** population level is considered normal for survival, such as cattle, sal and pine	Cattle, sal, pine, rodents
3	**(d)** taxol	Anti-cancer drug
4	**(a)** forest patches protected by communities	Traditional conservation
5	**(c)** 1972	Protected habitats
6	**(d)** Andaman wild pig	Mithun, Nicobar pigeon
7	**(a)** rare species	May become vulnerable
8	**(d)** reserved and protected forests	Maintained for timber
9	**(c)** almost one-third of the total forest area	Protected from further depletion
10	**(a)** Asiatic lion	Gujarat

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Biodiversity is the variety of plants, animals and micro-organisms living in an area (1); India is one of the world's richest countries in biodiversity, with about 8 per cent of the recorded species (1).	1+1
12	The Chipko movement was a campaign in the Himalayas, where villagers hugged trees to stop their felling (1); Women played a leading role in it (1).	1+1
13	Extinct species are those which are no longer found in the areas they used to live in (1); Examples are the Asiatic cheetah and the pink head duck (1).	1+1
14	A sacred grove is a patch of forest left untouched by the community for religious reasons (1); Trees and wildlife in it are protected, e.g., in Chota Nagpur (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	JFM began in Odisha in 1988 (1); Local communities manage and protect degraded forests with the forest department (1); In return villagers get benefits such as non-timber produce (1).	1+1+1
16	Habitat destruction through expansion of agriculture, mining and big projects (1); Hunting, poaching and over-exploitation (1); Pollution, forest fires and overgrazing also reduce biodiversity (1).	1+1+1
17	The Himalayan yew is a medicinal plant found in Himachal Pradesh and Arunachal Pradesh (1); Taxol from its bark and needles is used for cancer treatment (1); Thousands of trees dried up due to overextraction, so it was listed as threatened (1).	1+1+1
	OR: Large areas of forest were cleared for agriculture after independence and in colonial times (1); Shifting cultivation also converted forest into farmland (1); Over 26,000 sq. km of forest was converted to cultivation between 1951 and 1980 (1).	1+1+1
18	The IUCN classifies species into normal, endangered, vulnerable, rare, endemic and extinct (1); Normal species have normal population levels, like cattle, sal and pine (1); Endangered, vulnerable and rare species face different degrees of danger, and extinct species are no longer found (1).	1+1+1
	OR: Some communities protect patches of forest as sacred groves (1); Trees and wildlife in them are not harmed (1); This protects species and local biodiversity (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Joint Forest Management started in Odisha in 1988 (1); Villagers protect forests and share the produce (1); In Alwar villagers protected a forest as Bhairodev Dakav 'Sonchuri' (1); Chipko and Beej Bachao were people's movements (1); Sacred groves are traditional community conservation (1).	1+1+1+1+1

	OR: British rulers cleared forests for railways and ship-building (1); They promoted commercial forestry and plantations (1); Large areas were cleared for agriculture (1); Hunting of animals like tigers was encouraged (1); Forests came under state control and communities lost their rights (1).	1+1+1+1+1
20	India has about 8 per cent of the world's species (1); It has over 47,000 plant species and many animals (1); IUCN categories are normal, endangered, vulnerable, rare, endemic and extinct (1); Normal species include cattle, sal and pine (1); Endangered ones include black buck and Indian rhino, and extinct ones include the Asiatic cheetah (1).	1+1+1+1+1
	OR: Endemic species live only in limited areas, so habitat loss threatens them (1); Rare species have small populations (1); Hunting, pollution and development reduce them further (1); Examples are the Andaman wild pig and Nicobar pigeon (1); Protection of habitats is key to their survival (1).	1+1+1+1+1

Mistakes to avoid:

- Saying reserved and protected forests have the same status; **reserved** forests are the most valuable (more than half of forest land), **protected** almost one-third.
- Believing the Forest Department alone runs **JFM**; it needs village institutions, and the programme began in **Odisha (1988)**.
- Writing that Project Tiger started in **1972** (the year of the Wildlife Protection Act); it was launched in **1973**.
- Confusing the **Chipko movement** (resisting felling in the Himalayas) with the **Beej Bachao Andolan** (saving traditional seeds, Tehri).
- Treating **sacred groves** as government-protected areas; they are protected by community belief.
- Blaming only one cause for loss of forests; expansion of agriculture, large development projects, mining, grazing and fuel wood all contribute.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
