ANSWER KEY & MARKING SCHEME SET 1

Chapter 7: **Forest and Wildlife Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** large-scale felling of trees for sleepers	Railways needed timber
2	**(d)** Madhya Pradesh	About 75 per cent of its forest is permanent estate
3	**(a)** Indian one-horned rhinoceros	Kaziranga in Assam
4	**(d)** they are found only in a limited area	Loss of that area wipes them out
5	**(c)** forests gave them water, fuel and fodder for survival	They declared the Bhairodev Dakav 'Sonchuri'
6	**(b)** the rich biodiversity	Mining clears forests and pollutes
7	**(a)** Madhya Pradesh	It is a tiger reserve
8	**(d)** loss of habitat for wildlife	Expansion of agriculture reduced forests
9	**(b)** Andaman wild pig	Found only in the Andaman Islands
10	**(a)** Periyar	Periyar Tiger Reserve

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Dams submerge forest habitats and alter river flows (1); Animals lose homes and migration routes (1).	1+1
12	They show which species are in most danger (1); This helps decide which species to protect first (1).	1+1
13	People protect these groves for religious reasons (1); Rare plants and animals survive within them (1).	1+1
14	Poaching is organised and profitable because of high prices for skins and bones (1); Forests are large and hard to guard (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Forests absorb carbon dioxide (1); They release water vapour and influence rainfall (1); They moderate temperature and protect soil (1).	1+1+1
16	Species keep the ecosystem balanced (1); Many are sources of food and medicines (1); Losing species affects other species and future generations (1).	1+1+1
17	Reserved forests are permanently protected, over half of forest area (1); Protected forests are guarded from further depletion, about one-third (1); Reserved forests are more strictly protected, with no grazing or hunting (1).	1+1+1
	OR: JFM started in Odisha in 1988 (1); Villagers protect degraded forest land (1); They get a share of the produce (1).	1+1+1
18	Loss of habitat leaves species without food and shelter (1); Small and isolated populations die out (1); Endemic species are especially at risk (1).	1+1+1
	OR: Tribes gather honey, fruits, bamboo and medicinal plants (1); They sell forest produce for income (1); Forests supply fuel and building materials (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Villagers in Alwar protected their forest as Bhairodev Dakav 'Sonchuri' (1); Sacred groves are protected for religious reasons (1); Chipko and Beej Bachao were people's movements (1); JFM involves villagers and forest officials (1); Community care strengthens conservation (1).	1+1+1+1+1
	OR: Forests give timber, food, medicines and fuel (1); They protect soil and water (1); They maintain climate and rainfall (1); Wildlife keeps the ecological balance (1); Tourism and forest produce give income (1).	1+1+1+1+1
20	Reserved forests cover over half the forest area (1); Protected forests cover about one-third (1); Both are permanent forest estates owned by the government (1); Unclassed forests are owned by government, individuals and communities (1); Madhya Pradesh has the largest permanent area (1).	1+1+1+1+1
	OR: State control protects forests but excludes local people (1); Community management gives local ownership (1); Alwar and JFM show good results (1); Both need cooperation (1); A balanced partnership is best (1).	1+1+1+1+1

Mistakes to avoid:

- Saying reserved and protected forests have the same status; **reserved** forests are the most valuable (more than half of forest land), **protected** almost one-third.
- Believing the Forest Department alone runs **JFM**; it needs village institutions, and the programme began in **Odisha (1988)**.
- Writing that Project Tiger started in **1972** (the year of the Wildlife Protection Act); it was launched in **1973**.
- Confusing the **Chipko movement** (resisting felling in the Himalayas) with the **Beej Bachao Andolan** (saving traditional seeds, Tehri).
- Treating **sacred groves** as government-protected areas; they are protected by community belief.
- Blaming only one cause for loss of forests; expansion of agriculture, large development projects, mining, grazing and fuel wood all contribute.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 7: **Forest and Wildlife Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** extinct	They are not found in places they were known to live
2	**(a)** soil erosion	Bare land erodes
3	**(a)** unclassed forests	Other forests and wastelands
4	**(b)** its bark and needles were over-extracted for taxol	It is used for cancer treatment
5	**(d)** afforestation	Afforestation adds forest
6	**(a)** Asiatic lion	Gir in Gujarat
7	**(d)** Beej Bachao Andolan	It revived crop varieties
8	**(b)** Wildlife (Protection) Act of 1972	The Act was passed in 1972
9	**(c)** Chipko movement	Women took the lead
10	**(a)** reserved forest	Reserved forests are most valuable

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	A tiger needs large territory and enough prey (1); Shrinking forests reduce its range and food (1).	1+1
12	Taxol made from its bark and needles is used to treat cancer (1); This importance led to over-extraction (1).	1+1
13	Reserved forests were created to protect timber and forest produce permanently (1); No grazing or hunting is allowed in them (1).	1+1
14	Villagers get a share of forest produce (1); They earn income and protect the forest in return (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	The British cleared forests for railways, ships and plantations (1); They promoted agriculture and revenue from timber (1); Villagers' rights over forests were curtailed and hunting increased (1).	1+1+1
16	Women led the Chipko movement by hugging trees (1); They collect fuel and fodder and know forests well (1); They take part in forest committees and protection (1).	1+1+1
17	Dams submerge forest areas (1); Tribals lose their homes and livelihood (1); Wildlife loses habitat and migration routes (1).	1+1+1
	OR: Awareness makes people stop poaching and buying wildlife goods (1); Campaigns encourage tree planting (1); Informed citizens support conservation laws (1).	1+1+1
18	Tiger reserves were created in different states (1); Habitat is protected from human disturbance (1); Poaching is controlled and tiger numbers monitored (1).	1+1+1
	OR: Tigers need large areas with prey and cover (1); Shrinking and fragmented habitat reduces numbers (1); Poaching adds to the decline (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Tigers and rhinos are protected by laws and reserves (1); Local people help prevent poaching (1); JFM and eco-tourism give income (1); Awareness stops demand for wildlife products (1); Cooperation between government and people saves species (1).	1+1+1+1+1
	OR: The Himalayan yew gives taxol, a cancer drug (1); Its bark and needles were over-extracted (1); Thousands of trees dried up (1); It became a threatened species (1); Conservation requires sustainable harvesting and awareness (1).	1+1+1+1+1
20	Project Tiger started in 1973 with reserves across India (1); It aimed to protect tigers and habitat (1); The Wildlife Act of 1972 banned hunting and protected habitats (1); It set up national parks and sanctuaries (1); Together they helped recover some species (1).	1+1+1+1+1

	OR: The British cleared forests for railways and ships (1); They promoted plantations and timber trade (1); Forests came under state control (1); Local rights of use were curtailed (1); Hunting of tigers and other animals increased (1).	1+1+1+1+1

Mistakes to avoid:

- Saying reserved and protected forests have the same status; **reserved** forests are the most valuable (more than half of forest land), **protected** almost one-third.
- Believing the Forest Department alone runs **JFM**; it needs village institutions, and the programme began in **Odisha (1988)**.
- Writing that Project Tiger started in **1972** (the year of the Wildlife Protection Act); it was launched in **1973**.
- Confusing the **Chipko movement** (resisting felling in the Himalayas) with the **Beej Bachao Andolan** (saving traditional seeds, Tehri).
- Treating **sacred groves** as government-protected areas; they are protected by community belief.
- Blaming only one cause for loss of forests; expansion of agriculture, large development projects, mining, grazing and fuel wood all contribute.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 7: **Forest and Wildlife Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** sacred groves	Patches of forest left untouched
2	**(d)** Manas	Manas Tiger Reserve
3	**(a)** poaching for trade in skins and bones	Tiger numbers fell to 1,827 in 1973
4	**(c)** vulnerable	Example: blue sheep
5	**(a)** protect the tiger and its habitat	Tiger habitat was shrinking
6	**(c)** Wildlife (Protection) Act of 1972	It listed protected species
7	**(a)** forest protection together with local income	Villagers share benefits
8	**(c)** habitat of plants and animals	Submergence destroys habitats
9	**(c)** the Himalayas	Women hugged trees
10	**(b)** tribal and forest-dwelling people	Forest products give income

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Shifting cultivation clears forest for crops and moves on after a few years (1); With rising population, fallow periods shortened and forest did not recover (1).	1+1
12	They may soon become endangered if causes continue (1); Early protection can prevent their decline (1).	1+1
13	Local people use forests daily and know them well (1); Their cooperation makes protection effective (1).	1+1
14	Chipko showed that local people could resist felling by hugging trees (1); It made the public aware of the value of forests (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Local communities know and use forests sustainably (1); Sacred groves and community forests exist (1); Their cooperation makes conservation effective (1).	1+1+1
16	Endangered species are in danger of extinction (1); Vulnerable species are likely to become endangered if causes continue (1); Example: black buck is endangered, and blue sheep is vulnerable (1).	1+1+1
17	Villagers help to protect the forest (1); The forest department provides guidance and benefits (1); Both share forest produce and income (1).	1+1+1
	OR: Mining clears forests for open pits (1); It pollutes land and water (1); It disturbs wildlife, as dolomite mining threatens Buxa Tiger Reserve (1).	1+1+1
18	The 1972 Act was needed as wildlife populations were falling (1); It banned hunting and protected habitats (1); It created national parks and sanctuaries (1).	1+1+1
	OR: Hunting and loss of habitat reduced the cheetah (1); Its prey declined (1); It is now extinct in India (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Dams submerge forests and displace tribals (1); Mining clears vegetation and pollutes (1); Agriculture and roads cut up habitats (1); Wildlife loses food, shelter and corridors (1); Species decline or move out (1).	1+1+1+1+1
	OR: Forests supply food, medicine and materials (1); Wildlife and plants maintain ecosystems (1); Taxol from the yew treats cancer (1); Tribals depend on forests for living (1); Loss of biodiversity harms human welfare (1).	1+1+1+1+1
20	IUCN classifies species as normal, endangered, vulnerable, rare, endemic and extinct (1); Habitat loss from agriculture and mining threatens species (1); Dams, poaching and pollution add to the loss (1); Overgrazing and fires also cause depletion (1); Classification guides conservation (1).	1+1+1+1+1
	OR: Endemic species occur in limited areas such as Andaman wild pig (1); Their loss from the area means total loss (1); Extinct species are no longer found, like the cheetah (1); Causes include hunting and habitat loss (1); Conservation aims to prevent more extinctions (1).	1+1+1+1+1

Mistakes to avoid:

- Saying reserved and protected forests have the same status; **reserved** forests are the most valuable (more than half of forest land), **protected** almost one-third.
- Believing the Forest Department alone runs **JFM**; it needs village institutions, and the programme began in **Odisha (1988)**.
- Writing that Project Tiger started in **1972** (the year of the Wildlife Protection Act); it was launched in **1973**.
- Confusing the **Chipko movement** (resisting felling in the Himalayas) with the **Beej Bachao Andolan** (saving traditional seeds, Tehri).
- Treating **sacred groves** as government-protected areas; they are protected by community belief.
- Blaming only one cause for loss of forests; expansion of agriculture, large development projects, mining, grazing and fuel wood all contribute.
