THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 1

Chapter 7: **Forest and Wildlife Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** Odisha in 1988	State resolution of 1988
2	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
3	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
4	**(a)** sacred grove	Religious protection
5	**(d)** treating forests mainly as sources of timber and revenue	Railways and ships needed timber
6	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
7	**(d)** A is false but R is true.	A false; R true
8	**(d)** A is false but R is true.	A false; R true
9	**(a)** Both A and R are true and R is the correct explanation of A.	Belief in nature worship protects the groves from felling; R explains A.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are community conservation efforts, but R does not explain A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Roots hold soil and prevent erosion (1); Forests absorb rain and release water slowly (1).	1+1
12	Tigers keep prey populations in balance (1); Their presence shows a healthy forest (1).	1+1
13	Local people have a stake in the forest (1); They make rules and monitor use (1).	1+1
14	Villagers protect forests and benefit from produce (1); Degraded forests have recovered (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Laws like the 1972 Act protect species and habitats (1); Communities guard forests and sacred groves (1); Together they strengthen conservation (1).	1+1+1
16	Tigers need large forests and prey (1); Rhinos live in grasslands such as Kaziranga (1); Both face poaching but laws and reserves protect them (1).	1+1+1
17	Tribes gather honey, fruit, bamboo and medicines (1); Forest produce is sold for income (1); Forests supply fuel and fodder (1).	1+1+1
	OR: Forests absorb carbon dioxide and release oxygen (1); They clean the air (1); This is why they are called the lungs of the earth (1).	1+1+1
18	Categories identify species at risk (1); Policies prioritise endangered ones (1); They help plan protection and monitoring (1).	1+1+1
	OR: They are untouched forest patches (1); People protect them for religious reasons (1); Rare plants and animals survive within them (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Reserved, protected and unclassed forests (1). (ii) Reserved forests (1). (iii) Protected forests (1). (iv) Forests and wildlife maintain ecological balance, keep air, water and soil healthy, and preserve biodiversity and genetic diversity on which agriculture and fisheries depend (2).	1+1+1+2

20	Villagers in Sariska, Alwar, Rajasthan, declared 1,200 hectares of forest as the Bhairodev Dakav 'Sonchuri' and made their own rules against hunting (1); Joint Forest Management began in Odisha in 1988, with local communities protecting degraded forest and sharing the produce (1); The Chipko movement in the Himalayas saved forests when villagers, especially women, hugged trees (1); The Beej Bachao Andolan in Tehri conserved traditional seeds and crop diversity (1); Sacred groves, protected for religious reasons, show that communities can conserve cheaply and effectively (1).	1+1+1+1+1
	OR: Expansion of agriculture and shifting cultivation: over 26,000 sq. km of forest were converted to cultivation between 1951 and 1980 (1); Colonial railways, ship building and commercial forestry, and later large river valley projects and mining, cleared or submerged forest and polluted habitats (1); Hunting, poaching, overgrazing, forest fires and over-exploitation reduced animal numbers; the tiger fell from about 55,000 in the early 1900s to 1,827 in 1973 (1); Environmental pollution and unequal access to forest produce added to the pressure (1); Measures include the Wildlife Protection Act 1972, national parks and sanctuaries, Project Tiger, afforestation, and involving local communities through Joint Forest Management (1).	1+1+1+1+1

Mistakes to avoid:

- Saying reserved and protected forests have the same status; **reserved** forests are the most valuable (more than half of forest land), **protected** almost one-third.
- Believing the Forest Department alone runs **JFM**; it needs village institutions, and the programme began in **Odisha (1988)**.
- Writing that Project Tiger started in **1972** (the year of the Wildlife Protection Act); it was launched in **1973**.
- Confusing the **Chipko movement** (resisting felling in the Himalayas) with the **Beej Bachao Andolan** (saving traditional seeds, Tehri).
- Treating **sacred groves** as government-protected areas; they are protected by community belief.
- Blaming only one cause for loss of forests; expansion of agriculture, large development projects, mining, grazing and fuel wood all contribute.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERY

ANSWER KEY & MARKING SCHEME SET 2

Chapter 7: **Forest and Wildlife Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
2	**(a)** normal, vulnerable, endangered, extinct	Categories of IUCN
3	**(b)** pink head duck	Not seen in recent times
4	**(a)** vulnerable	Declining but not yet endangered
5	**(b)** mahua and kadamba	Traditional reverence
6	**(c)** normal species	Their populations are at normal levels
7	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
8	**(c)** reserved and protected forests	Owned by the government
9	**(c)** A is true but R is false.	A is true. Under JFM the members get intermediary benefits like non-timber forest products, so R is false.
10	**(d)** A is false but R is true.	Reserved forests are regarded as the most valuable, so A is false; R is true.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Laws need enforcement and local support (1); Without people's cooperation poaching and encroachment continue (1).	1+1
12	Hunting and loss of habitat reduced the cheetah and its prey (1); It was last seen in India in the twentieth century (1).	1+1
13	Dams change water flow and submerge forests (1); Riverside plants and animals lose their habitat (1).	1+1
14	Local people know the plants and animals well (1); Their practices, like sacred groves, protect species (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	They submerge or clear large areas of forest (1); Tribals are displaced and lose livelihood (1); Wildlife and ecology suffer, while the projects provide power, water and minerals (1).	1+1+1
16	Shifting cultivation clears patches by burning (1); Short fallow periods stop recovery (1); Large forest areas were lost (1).	1+1+1
17	They make people aware of wildlife value (1); They discourage buying wildlife goods (1); They promote tree planting and support for laws (1).	1+1+1
	OR: Forests absorb carbon dioxide (1); They influence rainfall (1); Protection helps maintain climate balance (1).	1+1+1
18	Networks kill animals for skins and bones (1); Illegal trade is profitable and hard to stop (1); It threatens tigers and rhinos (1).	1+1+1
	OR: JFM gave villagers a role in forest care (1); They share the produce and benefits (1); It shifted governance from state-only to partnership (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Odisha (1). (ii) Local (village) institutions or committees (1). (iii) Non-timber forest products or a share in the timber (1). (iv) It involves local communities who depend on the forest, so they protect it, restore degraded land and check illegal felling, which reduces the burden on the Department (2).	1+1+1+2
20	Many communities protect sacred groves and revere trees: Mundas and Santhals of Chota Nagpur worship mahua and kadamba, and tribes in Odisha and Bihar worship tamarind and mango (1); Such beliefs conserve species and habitats without any cost to the state (1); Modern law, like the Wildlife Protection Act, protects whole habitats and species and can be enforced against poachers (1); Beliefs work at local level while law covers large areas (1); Together they strengthen conservation because people follow what they hold sacred and what the law backs (1).	1+1+1+1+1

	OR: Women led the Chipko movement by hugging trees to stop felling in the Himalayas (1); Women collect fuel and fodder and know the forest well, so their cooperation is vital (1); Local people guard sacred groves and run community forests such as in Alwar (1); They take part in Joint Forest Management committees (1); Such participation makes conservation practical and sustainable (1).	1+1+1+1+1

Mistakes to avoid:

- Saying reserved and protected forests have the same status; **reserved** forests are the most valuable (more than half of forest land), **protected** almost one-third.
- Believing the Forest Department alone runs **JFM**; it needs village institutions, and the programme began in **Odisha (1988)**.
- Writing that Project Tiger started in **1972** (the year of the Wildlife Protection Act); it was launched in **1973**.
- Confusing the **Chipko movement** (resisting felling in the Himalayas) with the **Beej Bachao Andolan** (saving traditional seeds, Tehri).
- Treating **sacred groves** as government-protected areas; they are protected by community belief.
- Blaming only one cause for loss of forests; expansion of agriculture, large development projects, mining, grazing and fuel wood all contribute.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

ANSWER KEY & MARKING SCHEME SET 3

Chapter 7: **Forest and Wildlife Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** reserved	The most valuable forest category
2	**(c)** Gir - Asiatic lion	Gir is the lion's home
3	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
4	**(b)** local ownership and care of the forest	People protect what benefits them
5	**(c)** the entire food chain of the forest	Tigers are top predators
6	**(d)** Gir - Kerala	Gir is in Gujarat
7	**(c)** rising population of a threatened species	Recovery of numbers
8	**(a)** strict laws along with local community involvement	Both law and people matter
9	**(a)** Both A and R are true and R is the correct explanation of A.	These provisions are what the Act did; R explains A.
10	**(a)** Both A and R are true and R is the correct explanation of A.	The steep fall in numbers was the reason for launching the project; R explains A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Development projects need land, which often means forests (1); Conservation wants the same land untouched (1).	1+1
12	Tourists bring income for protection (1); Local people gain jobs and support conservation (1).	1+1
13	Hunting bans do not help if habitats vanish (1); Protected habitat gives food, shelter and breeding places (1).	1+1
14	Their numbers are already small (1); Any hunting or habitat loss can wipe them out (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	They fill special roles in their local ecosystems (1); Their loss disturbs the food web (1); They increase biodiversity value (1).	1+1+1
16	Laws ban hunting and trade but need local support to work (1); People protect forests they depend on (1); Together they stop poaching and encroachment (1).	1+1+1
17	Chipko showed community resistance can save trees (1); Women played a key role (1); It inspired other movements (1).	1+1+1
	OR: Careful planning and environmental assessment (1); Compensation and afforestation (1); Protecting habitats and corridors (1).	1+1+1
18	The British cleared forests for railways, ships and plantations (1); Shifting cultivation was restricted and forests came under the state (1); Large areas of habitat vanished and hunting increased (1).	1+1+1
	OR: Forest fires destroy trees and wildlife (1); Grazing removes seedlings and compacts soil (1); Both lead to degradation (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) The Chipko movement (1). (ii) 1973 (1). (iii) Poaching or trade in tiger skins and bones, shrinking habitat (any one) (1). (iv) Local belief treats them as forests of gods and goddesses, so they are left untouched and preserve rare species and old forest patches (2).	1+1+1+2
20	India has about 8 per cent of the world's recorded species and over 47,000 plant species, making it one of the richest biodiversity countries (1); Biodiversity maintains ecosystems that purify air and water, protect soil and regulate climate (1); It supplies food, medicines such as taxol from the Himalayan yew, fibres and raw materials (1); Forest-dwelling people depend on it for their livelihood (1); Its loss threatens future generations globally as well as in India (1).	1+1+1+1+1

	OR: The IUCN classifies species as normal, endangered, vulnerable, rare, endemic and extinct (1); Endangered species such as the black buck and Indian rhino are in danger of extinction and need urgent habitat protection (1); Vulnerable species like blue sheep and the Gangetic dolphin may become endangered if causes continue, so they need monitoring (1); Rare and endemic species like the Andaman wild pig have small or restricted populations and need habitat protection (1); Classification helps governments to decide where to focus resources (1).	1+1+1+1+1

Mistakes to avoid:

- Saying reserved and protected forests have the same status; **reserved** forests are the most valuable (more than half of forest land), **protected** almost one-third.
- Believing the Forest Department alone runs **JFM**; it needs village institutions, and the programme began in **Odisha (1988)**.
- Writing that Project Tiger started in **1972** (the year of the Wildlife Protection Act); it was launched in **1973**.
- Confusing the **Chipko movement** (resisting felling in the Himalayas) with the **Beej Bachao Andolan** (saving traditional seeds, Tehri).
- Treating **sacred groves** as government-protected areas; they are protected by community belief.
- Blaming only one cause for loss of forests; expansion of agriculture, large development projects, mining, grazing and fuel wood all contribute.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
