ANSWER KEY & MARKING SCHEME SET 1

Chapter 8: **Water Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** underground tanks	Rajasthan
2	**(c)** water	Efficient
3	**(a)** irrigation, hydroelectricity and flood control	Uses
4	**(b)** Sutlej	Punjab
5	**(b)** rooftop harvesting	Meghalaya
6	**(c)** river	Barrier
7	**(d)** man-made waterway	Irrigation
8	**(c)** Gujarat	Narmada
9	**(c)** Odisha	Mahanadi
10	**(d)** Karnataka	Mysuru

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Water scarcity is a shortage of usable water for people's needs (1); It is caused by overuse, pollution and uneven distribution (1).	1+1
12	A johad is a small earthen check dam that stores monsoon run-off (1); It helps recharge groundwater in Rajasthan (1).	1+1
13	Hydroelectric power is electricity produced from the energy of falling water (1); Dams like Bhakra-Nangal generate it (1).	1+1
14	Rainwater harvesting is collecting and storing rainwater (1); It recharges groundwater (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Tankas (1); Johads (1); Khadins, kuls and rooftop harvesting (1).	1+1+1
16	Growing population (1); Over-use and pollution (1); Industrialisation and unequal distribution (1).	1+1+1
17	Sringaverapura near Allahabad (1); Dams and lakes of Chandragupta Maurya's time (1); Bhopal Lake and Hauz Khas tank (1).	1+1+1
	OR: It is a 200-year-old system in Meghalaya (1); Bamboo pipes carry spring water to plants (1); Water is supplied drop by drop and little is wasted (1).	1+1+1
18	People are displaced (1); Forests and farmland are submerged (1); Livelihoods and ecology are damaged (1).	1+1+1
	OR: Water evaporates from seas (1); It condenses and falls as rain (1); It flows back through rivers to the sea (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	India has only 4 per cent of the world's water but 16 per cent of its people (1); Demand has increased with population (1); Irrigation and industry use large quantities (1); Groundwater is over-extracted (1); Pollution reduces usable water (1).	1+1+1+1+1
	OR: Tankas store roof rainwater in Bikaner, Phalodi and Barmer (1); Johads store run-off and recharge groundwater (1); Khadins keep soil moisture for crops (1); These are cheap and suit dry regions (1); Villagers maintain them together (1).	1+1+1+1+1
20	Ancient India had dams, lakes and canals (1); Sringaverapura had floodwater harvesting (1); Bhopal Lake was built in the eleventh century (1); Hauz Khas tank was made in the fourteenth century (1); These supplied water for farms and cities (1).	1+1+1+1+1
	OR: Multipurpose projects are dams built for many uses (1); They provide irrigation (1); They produce hydroelectric power (1); They help in flood control (1); They supply water for homes and industry (1).	1+1+1+1+1

Mistakes to avoid:

- Saying water scarcity is caused only by **low rainfall**; over-use, unequal access, pollution and population growth also cause it.
- Matching projects to the wrong rivers: **Hirakud** (Mahanadi), **Bhakra-Nangal** (Sutlej-Beas), **Sardar Sarovar** (Narmada).
- Writing that Mahatma Gandhi called dams the 'temples of modern India'; the phrase is **Jawaharlal Nehru's**.
- Describing multi-purpose projects as only for **irrigation**; they also give power, flood control, water supply and navigation.
- Mixing traditional systems: **tankas** (Rajasthan), **kuls/guls** (Western Himalayas), **bamboo drip** (Meghalaya), **inundation channels** (Bengal flood plains).
- Forgetting that dams have **disadvantages** as well: sedimentation, displacement and damage to aquatic habitats.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 8: **Water Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** deposit of silt	In reservoirs
2	**(a)** recharge groundwater	Benefits
3	**(d)** a store of water	Behind dam
4	**(d)** Uttarakhand	Bhagirathi
5	**(a)** saves water	Conservation
6	**(c)** supply of water to crops	Farming
7	**(d)** the Sardar Sarovar dam	Protest
8	**(a)** availability of clean water	Health
9	**(d)** small check dam	Rajasthan
10	**(a)** salty	Oceans

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Irrigation is supplying water to crops through canals, wells and tube wells (1); It is needed where rainfall is low or uncertain (1).	1+1
12	A dam is a barrier across flowing water that stores it (1); The stored water is used for irrigation, power and supply (1).	1+1
13	Groundwater is the water stored beneath the earth's surface in rocks and soil (1); It is drawn through wells and tube wells (1).	1+1
14	A tanka is an underground tank for storing rainwater (1); It is common in Rajasthan, e.g., Bikaner and Barmer (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Villagers build johads and tankas (1); They make rules to share water (1); They keep the structures clean (1).	1+1+1
16	Canals carry water for irrigation (1); They distribute river water to fields (1); They lose water by seepage and evaporation (1).	1+1+1
17	Water becomes unfit to drink (1); It causes diseases (1); It harms fish and crops (1).	1+1+1
	OR: Water table falls (1); Wells and tube wells dry up (1); Deeper boring is needed and costs rise (1).	1+1+1
18	Tankas store rooftop water (1); Johads and khadins hold run-off (1); These suit the dry climate (1).	1+1+1
	OR: Bhakra-Nangal dam (1); Hirakud dam (1); Sardar Sarovar and Tehri dams (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Rivers cross state borders (1); Dams reduce downstream flow (1); States demand larger shares (1); Krishna-Godavari is an example (1); Disputes need negotiation or tribunals (1).	1+1+1+1+1
	OR: Meghalaya uses bamboo drip irrigation (1); Shillong harvests rooftop rain (1); Gendathur in Karnataka has rooftop units (1); Himalayan guls or kuls carry water (1); Tamil Nadu made harvesting compulsory (1).	1+1+1+1+1
20	Dams displace people and submerge forests (1); Silt reduces storage capacity (1); They change river flow (1); They affect fish and wildlife (1); They may cause disputes between states (1).	1+1+1+1+1
	OR: Repair leaks and avoid waste (1); Use drip and sprinkler irrigation (1); Harvest rainwater (1); Reuse and recycle water (1); Protect rivers from pollution (1).	1+1+1+1+1

Mistakes to avoid:

- Saying water scarcity is caused only by **low rainfall**; over-use, unequal access, pollution and population growth also cause it.
- Matching projects to the wrong rivers: **Hirakud** (Mahanadi), **Bhakra-Nangal** (Sutlej-Beas), **Sardar Sarovar** (Narmada).
- Writing that Mahatma Gandhi called dams the 'temples of modern India'; the phrase is **Jawaharlal Nehru's**.
- Describing multi-purpose projects as only for **irrigation**; they also give power, flood control, water supply and navigation.

- Mixing traditional systems: **tankas** (Rajasthan), **kuls/guls** (Western Himalayas), **bamboo drip** (Meghalaya), **inundation channels** (Bengal flood plains).
- Forgetting that dams have **disadvantages** as well: sedimentation, displacement and damage to aquatic habitats.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 8: **Water Resources (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** water circulation	Cycle
2	**(c)** water below the surface	Wells
3	**(b)** collecting and storing rainwater	Practice
4	**(d)** life and development	Basic need
5	**(c)** bamboo drip irrigation	Local
6	**(c)** falling water table	Depletion
7	**(a)** displacement of people	Problem
8	**(a)** power from water	Dams
9	**(a)** too much water	Excess
10	**(b)** shortage of water	Problem

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Sedimentation is the deposit of silt in a reservoir (1); It reduces the water storage capacity of a dam (1).	1+1
12	A reservoir is the artificial lake formed behind a dam (1); It stores water for use in dry months (1).	1+1
13	Displacement is the forced movement of people from their homes (1); Large dams submerge villages and displace people (1).	1+1
14	Drip irrigation supplies water drop by drop to plant roots (1); It saves water, as in Meghalaya's bamboo system (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Displacement of people (1); Loss of forests and farmland (1); Sedimentation and effect on fish and rivers (1).	1+1+1
16	Drinking and household use (1); Irrigation of crops (1); Industry and power generation (1).	1+1+1
17	Repair leaking taps (1); Use drip irrigation (1); Harvest and reuse water (1).	1+1+1
	OR: Irrigation of fields (1); Generation of hydroelectricity (1); Flood control and water supply (1).	1+1+1
18	It lies beneath the earth's surface (1); It is drawn through wells and tube wells (1); It is recharged by rain (1).	1+1+1
	OR: Rain is collected from roofs (1); It is stored in tanks or drums (1); It is used for household needs and recharge (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Irrigation takes most of the water used (1); Multiple cropping needs more water (1); The Green Revolution increased use (1); Tube wells draw groundwater (1); This lowers water tables (1).	1+1+1+1+1
	OR: Dams store water for irrigation (1); They produce electricity (1); They help control floods (1); They supply cities with water (1); They support industry and agriculture (1).	1+1+1+1+1
20	The Narmada Bachao Andolan opposed the Sardar Sarovar Dam (1); Tribals and farmers feared displacement (1); It raised questions about resettlement (1); It highlighted environmental damage (1); It influenced thinking on big dams (1).	1+1+1+1+1
	OR: Groundwater is drawn by tube wells (1); Over-extraction lowers the water table (1); Wells dry up (1); Recharge is slow (1); Rainwater harvesting can restore it (1).	1+1+1+1+1

Mistakes to avoid:

- Saying water scarcity is caused only by **low rainfall**; over-use, unequal access, pollution and population growth also cause it.
- Matching projects to the wrong rivers: **Hirakud** (Mahanadi), **Bhakra-Nangal** (Sutlej-Beas), **Sardar Sarovar** (Narmada).
- Writing that Mahatma Gandhi called dams the 'temples of modern India'; the phrase is **Jawaharlal Nehru's**.
- Describing multi-purpose projects as only for **irrigation**; they also give power, flood control, water supply and navigation.
- Mixing traditional systems: **tankas** (Rajasthan), **kuls/guls** (Western Himalayas), **bamboo drip** (Meghalaya), **inundation channels** (Bengal flood plains).

- Forgetting that dams have **disadvantages** as well: sedimentation, displacement and damage to aquatic habitats.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
