THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 2

Chapter 8: **Water Resources (Geography)** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Critics argued that dams are ecologically harmful because they 1

(a) generate power
(b) create jobs
(c) attract tourists
(d) submerge forests and affect fish and river flow

2. Why do urban areas have low groundwater recharge? 1

(a) concrete surfaces prevent percolation **(b)** too many rivers
(c) too many forests **(d)** too much rain

3. Which is the best way to recharge groundwater? 1

(a) sinking more tube wells **(b)** deforestation
(c) open-cast mining **(d)** rainwater harvesting

4. Assertion (A): Sedimentation lowers the capacity of a dam. Reason (R): Silt collects in the reservoir. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

5. Assertion (A): Large dams cause displacement of people. Reason (R): Reservoirs submerge villages and farmland. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

6. Which of these is a step in the hydrological cycle? 1

(a) evaporation **(b)** printing **(c)** mining **(d)** farming

7. Which rainwater harvesting practice was made compulsory in all buildings in Tamil Nadu? 1

(a) open canals **(b)** tankas
(c) large dams **(d)** rooftop rainwater harvesting

8. A state plans a dam that will submerge tribal villages. A likely issue is 1

(a) flood control **(b)** more irrigation
(c) cheaper power **(d)** displacement of people

9. **Assertion (A):** The Sardar Sarovar Dam is built over the Narmada river in Gujarat. 1
Reason (R): The Sardar Sarovar project benefits only the state of Gujarat.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** Dams do not affect the natural flow of rivers. 1
Reason (R): Damming causes poor sediment flow and excessive sedimentation at the bottom of the reservoir.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. How do traditional systems reflect local knowledge? 2

12. Why do large dams cause social conflict? 2

13. Why is reuse of water important for cities? 2

14. Why is conservation a shared responsibility? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Analyse how water scarcity differs from drought. 3

16. Explain how traditional knowledge can complement modern projects. 3

17. Explain the effect of urbanisation on water supply. 3

OR

Explain why decentralised water management is promoted. 3

18. Explain how climate change threatens water. 3

OR

Explain how agriculture can reduce water use. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** In the semi-arid and arid regions of Rajasthan, particularly Bikaner, Phalodi and Barmer, almost all houses traditionally had underground tanks or tankas for storing drinking water. Rooftop rainwater was collected in them and, in some houses, tanks were as large as a big room. Today, many households have shifted to piped water from the Indira Gandhi Canal. 5
(i) What are tankas?
(ii) Which water was stored in them?
(iii) Name the region of Rajasthan mentioned in the passage.
(iv) Why is rainwater harvesting important in arid regions?

20. Evaluate people's movements against dams. 5

OR

Evaluate the role of government and citizens in water conservation. 5

END OF QUESTION PAPER — Total: 40 Marks
