# THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

## CLASS 10 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 8: **Water Resources (Geography)** | RBSE Pattern | Session 2026–27

**Time: 1 Hour 30 Minutes** Name: _____ Roll No.: _____ **Maximum Marks: 40**

**General Instructions:**

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

## SECTION — A (Objective Type Questions) 10 × 1 = 10

*Choose the correct option and write it in your answer book.*

**1.** Which pair is INCORRECT? 1

**(a)** tanka - Assam **(b)** bamboo drip irrigation - Meghalaya
**(c)** khadin - Rajasthan **(d)** guls - Himalayas

**2.** Assertion (A): Rainwater harvesting suits arid regions. Reason (R): Rain is scarce there and has to be stored. 1

**(a)** Both A and R are true and R is the correct explanation of A.
**(b)** Both A and R are true but R is not the correct explanation of A.
**(c)** A is true but R is false.
**(d)** A is false but R is true.

**3.** A farmer in Rajasthan stores rainwater from the roof in an underground tank. This is a 1

**(a)** kul **(b)** johad **(c)** khadin **(d)** tanka

**4.** A village has dry wells and a falling water table after tube wells spread. The cause is 1

**(a)** over-extraction of groundwater **(b)** new dams
**(c)** dense forests **(d)** heavy rainfall

**5.** A multi-purpose project provides irrigation, power and flood control. A problem it may create is 1

**(a)** no electricity **(b)** fewer floods everywhere
**(c)** no irrigation **(d)** displacement and sedimentation

**6.** Which is an example of sustainable water use? 1

**(a)** dumping waste in rivers **(b)** harvesting and reusing water
**(c)** over-pumping groundwater **(d)** leaving taps leaking

**7.** What most threatens rural water supply? 1

**(a)** over-extraction and drought **(b)** perennial rivers
**(c)** heavy rainfall **(d)** new dams

**8.** Which pair is correct? 1

**(a)** Bhakra - Narmada **(b)** Hirakud - Mahanadi
**(c)** Tehri - Krishna **(d)** Sardar Sarovar - Sutlej

**9.** **Assertion (A):** Rooftop rainwater harvesting is common in Shillong, Meghalaya. 1
**Reason (R):** Shillong faces an acute shortage of water despite being near Cherrapunji and Mawsynram, which receive very heavy rainfall.
Choose the correct option:

**(a)** Both A and R are true and R is the correct explanation of A.
**(b)** Both A and R are true but R is not the correct explanation of A.
**(c)** A is true but R is false.
**(d)** A is false but R is true.

**10.** **Assertion (A):** Kuls or guls are traditional diversion channels of the Western Himalayas. 1
**Reason (R):** Bamboo drip irrigation is practised in Meghalaya.
Choose the correct option:
**(a)** Both A and R are true and R is the correct explanation of A.
**(b)** Both A and R are true but R is not the correct explanation of A.
**(c)** A is true but R is false.
**(d)** A is false but R is true.

## SECTION — B (Very Short Answer Type) — 4 × 2 = 8

*Answer in about 20–30 words each.*

**11.** How does deforestation affect rivers? 2

**12.** Why are interstate water disputes difficult to solve? 2

**13.** Why must urban planning include harvesting? 2

**14.** Why are traditional harvesting structures low-cost? 2

## SECTION — C (Short Answer Type) — 4 × 3 = 12

*Answer in about 40–60 words each.*

**15.** Explain how multipurpose projects help industrial development. 3

**16.** Compare Narmada and Tehri protests. 3

**17.** Explain how industrial effluent reduces water. 3

OR

Explain how forests help water security. 3

**18.** Evaluate 'dams are temples of modern India' in light of costs. 3

OR

Evaluate the role of tribunals in water disputes. 3

## SECTION — D (Long Answer Type) — 2 × 5 = 10

*Answer in about 100–150 words each.*

**19.** **Case study.** Although three-fourths of the world is covered with water and water is renewable through the hydrological cycle, many regions suffer from water scarcity. In India scarcity is caused by a large and growing population, unequal access to water, over-exploitation of groundwater, expanding irrigation and industries using freshwater, and pollution of existing water. 5
(i) Which cycle makes water a renewable resource?
(ii) Give any one cause of water scarcity mentioned.
(iii) Name one traditional method of irrigation used in the hills.
(iv) Suggest two ways in which a household can conserve water.

**20.** Compare large-scale and community-based water projects. 5

OR

Explain how water conflicts arise and can be resolved. 5

## END OF QUESTION PAPER — Total: 40 Marks
