ANSWER KEY & MARKING SCHEME SET 1

Chapter 9: **Agriculture (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** wheat	Wheat is a cereal
2	**(a)** Brazil	A cash crop
3	**(c)** Bewar or Dahiya	Regional names differ
4	**(c)** slash and burn (shifting) cultivation	Practised in north-east India
5	**(a)** land ownership was highly unequal	Landless poor
6	**(d)** jute	Grown in West Bengal and Assam
7	**(d)** plantation farming	Large estate of a single crop
8	**(a)** intensive subsistence farming	Seen in areas of high population pressure
9	**(d)** tea - Assam	Assam is a major tea state
10	**(c)** cotton	Black cotton soil

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Land is scarce and population is dense (1); Farmers use family labour to get the most from small plots (1).	1+1
12	MSP assures a minimum price to farmers (1); Credit helps them buy inputs and avoid moneylenders (1).	1+1
13	Pulses fix atmospheric nitrogen (1); This restores soil fertility for the next crop (1).	1+1
14	The plains have a cool winter and moderate rain (1); Alluvial soil and irrigation support wheat (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Rabi crops are sown in winter and harvested in summer (1); Kharif crops are sown with monsoon and harvested in autumn (1); Wheat is Rabi, rice is Kharif (1).	1+1+1
16	Scattered plots are joined into compact holdings (1); It saves time and cost (1); It allows machines and irrigation (1).	1+1+1
17	Punjab has fertile plains but low rain (1); Canals and tube wells provide irrigation (1); This supports wheat and rice in the Green Revolution (1).	1+1+1
	OR: Plantation crops need large estates and capital (1); They are processed near the estate (1); They are mainly for export or industry (1).	1+1+1
18	Insurance pays farmers in case of crop failure (1); It reduces risk from drought and floods (1); It helps them repay loans (1).	1+1+1
	OR: Rice needs high temperature above 25 degrees Celsius and rainfall above 100 cm (1); Wheat needs a cool growing season and 50 to 75 cm rain (1); Rice is Kharif and wheat is Rabi (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Tea needs warm, moist, frost-free climate in Assam, Darjeeling and the south (1); Coffee grows in Karnataka, Kerala and Tamil Nadu (1); Rubber needs over 200 cm rain and grows in Kerala (1); They earn export income (1); They give jobs to plantation labourers (1).	1+1+1+1+1
	OR: Horticulture gives higher income than grains (1); India grows many fruits and vegetables (1); Dairying under Operation Flood raised milk output (1); Both give jobs to rural people (1); They improve nutrition (1).	1+1+1+1+1
20	The Green Revolution raised wheat and rice output (1); India became self-sufficient in foodgrains (1); But gains were confined to a few states (1); Chemical overuse damaged soil and water (1); Small farmers could not afford inputs (1).	1+1+1+1+1
	OR: Technological reforms are HYV seeds, fertilisers and machines (1); Institutional reforms are land consolidation and abolition of zamindari (1); Kisan Credit Card and crop insurance help farmers (1); MSP gives price support (1); Both types are needed (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing seasons: **rabi** (wheat, gram, mustard, barley, peas), **kharif** (rice, maize, cotton, jute, bajra, jowar) and **zaid** (watermelon, cucumber, fodder).
- Calling ragi, jowar and bajra pulses; they are **millets** (coarse grains). Pulses (tur, moong, urad, gram) fix nitrogen in the soil.
- Saying India is the largest producer of sugarcane or rice; it is the **second** largest producer of both (after Brazil and China respectively).
- Confusing **primitive subsistence** (small plots, hoe, dao; slash and burn) with **intensive subsistence** (high population pressure, high doses of inputs) and with commercial farming.
- Using **Green Revolution** (package technology for foodgrains) and **White Revolution** (Operation Flood, milk) as synonyms.
- Writing that Bhoodan was started by Gandhiji; **Vinoba Bhave** started it after Gandhiji's martyrdom.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 9: **Agriculture (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** donate part of their land to the landless	A voluntary land gift
2	**(c)** to avoid spoilage and reduce transport costs	Perishable produce
3	**(b)** needs high rainfall and temperature	Over 100 cm rain
4	**(c)** Kisan Credit Card	Easy loans for inputs
5	**(b)** use of HYV seeds	Seeds, fertilisers, machines
6	**(a)** minimum support price	Assured price to farmers
7	**(a)** White Revolution	Operation Flood
8	**(b)** restore nitrogen to the soil	Leguminous crops fix nitrogen
9	**(d)** it gives higher income	Fruits and vegetables are valuable
10	**(b)** needs a cool growing season and bright sunshine at ripening	Rabi crop

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Land is divided into small scattered plots (1); It is hard to use machines or irrigate and yield per farmer falls (1).	1+1
12	Cheap imports compete with Indian produce (1); Farmers face price fluctuations but also get export chances (1).	1+1
13	Plantation crops like tea and coffee are produced on large estates (1); They are sold in foreign markets for profit (1).	1+1
14	West Bengal has high rainfall and fertile delta soil (1); Humid climate suits rice (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Subsistence farming is for family needs on small land (1); Commercial farming is for sale using modern inputs (1); Subsistence gives low surplus, commercial gives high yield and income (1).	1+1+1
16	India grows varied fruits and vegetables (1); Horticulture gives higher income (1); It provides jobs and exports (1).	1+1+1
17	HYV seeds give higher yield (1); Fertilisers add nutrients (1); Together they raised output but harmed soil if overused (1).	1+1+1
	OR: It raised milk output through cooperatives (1); Dairy farmers got assured markets (1); India became self-sufficient in milk (1).	1+1+1
18	Cheap imports hurt prices (1); Small farmers lack resources to compete (1); Costs rise and debt increases (1).	1+1+1
	OR: Organic farming avoids chemical inputs (1); It uses compost and natural methods (1); It gives safer food and protects soil (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Rice is a Kharif crop needing heat and high rainfall (1); Wheat is a Rabi crop needing cool weather (1); Cotton needs black soil and warmth (1); Jute needs flood plain soils (1); Sugarcane needs hot, humid weather (1).	1+1+1+1+1
	OR: North India grows wheat and rice with irrigation (1); South India grows rice, millets, spices and plantation crops (1); North has Rabi emphasis, south has plantations (1); Soils and rainfall differ (1); Cropping patterns follow climate (1).	1+1+1+1+1
20	Cotton grows in black soil with high temperature and light rain (1); It needs about 210 frost-free days (1); Jute grows on flood plain soil and needs high temperature and humidity (1); Cotton is a Kharif fibre for textiles and jute is the golden fibre for bags (1); Maharashtra and Gujarat grow cotton, and West Bengal jute (1).	1+1+1+1+1
	OR: Agriculture employs about two-thirds of the population (1); It supplies food and raw material (1); It contributes to exports (1); Rural demand supports industry (1); Its share in GDP has fallen but it remains vital (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing seasons: **rabi** (wheat, gram, mustard, barley, peas), **kharif** (rice, maize, cotton, jute, bajra, jowar) and **zaid** (watermelon, cucumber, fodder).
- Calling ragi, jowar and bajra pulses; they are **millets** (coarse grains). Pulses (tur, moong, urad, gram) fix nitrogen in the soil.
- Saying India is the largest producer of sugarcane or rice; it is the **second** largest producer of both (after Brazil and China respectively).
- Confusing **primitive subsistence** (small plots, hoe, dao; slash and burn) with **intensive subsistence** (high population pressure, high doses of inputs) and with commercial farming.
- Using **Green Revolution** (package technology for foodgrains) and **White Revolution** (Operation Flood, milk) as synonyms.
- Writing that Bhoodan was started by Gandhiji; **Vinoba Bhave** started it after Gandhiji's martyrdom.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 9: **Agriculture (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** rubber	Grown in Kerala
2	**(b)** eastern and southern India	High rainfall areas
3	**(c)** consumers want chemical-free food	Health concerns
4	**(b)** Punjab, Haryana and western Uttar Pradesh	Irrigated wheat areas
5	**(c)** rice - Kharif	Rice is sown with the monsoon
6	**(d)** maize	Used for cattle feed too
7	**(d)** land consolidation	Change in land system
8	**(a)** commercial farming	Modern inputs
9	**(c)** large estates, capital and labour	Single crop on a large area
10	**(b)** ragi	A coarse grain

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Jhumming clears forest by burning it (1); Shortened fallow periods destroy trees and soil (1).	1+1
12	They fetch money in the market (1); This income helps buy inputs and household needs (1).	1+1
13	Rabi crops grow in the dry winter with little rain (1); Irrigation provides the water they need (1).	1+1
14	Gains were concentrated in Punjab, Haryana and western UP (1); Other regions with less irrigation lagged behind (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Vinoba Bhave asked landlords to donate land (1); The land was given to the landless (1); It was voluntary and partly successful (1).	1+1+1
16	Abolition of zamindari (1); Consolidation of holdings (1); Cooperatives, credit and crop insurance (1).	1+1+1
17	It gives easy credit for inputs (1); Interest is low compared with moneylenders (1); It helps farmers avoid debt (1).	1+1+1
	OR: Alternate crops restore soil nutrients (1); Pulses fix nitrogen after cereals (1); It checks pests and improves yield (1).	1+1+1
18	Exports earn foreign exchange (1); Farmers get higher prices (1); Rice, tea, spices and fruits are exported (1).	1+1+1
	OR: Pulses are the main protein for vegetarians (1); They are cheap and widely eaten as dal (1); They also improve soil fertility (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Small holdings, low incomes and debt (1); Dependence on monsoon (1); Competition from cheap imports (1); Credit, insurance, MSP and irrigation help (1); Diversification and cooperatives also help (1).	1+1+1+1+1
	OR: Sugarcane needs hot, humid weather of 21 to 27 degrees Celsius (1); It needs 75 to 100 cm rain or irrigation (1); Uttar Pradesh, Maharashtra and Karnataka are major producers (1); It gives sugar, gur and molasses (1); India ranks second after Brazil (1).	1+1+1+1+1
20	Subsistence farming meets family needs with small plots (1); Commercial farming is for sale with modern inputs (1); Plantation farming is on large estates (1); Subsistence includes jhumming and intensive farming (1); Examples are paddy in Odisha and wheat in Punjab (1).	1+1+1+1+1
	OR: Globalisation exposed farmers to world prices (1); Cheap imports lowered prices (1); Exports of rice, spices and fruits increased (1); Small farmers faced debt (1); Support and diversification are needed (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing seasons: **rabi** (wheat, gram, mustard, barley, peas), **kharif** (rice, maize, cotton, jute, bajra, jowar) and **zaid** (watermelon, cucumber, fodder).
- Calling ragi, jowar and bajra pulses; they are **millets** (coarse grains). Pulses (tur, moong, urad, gram) fix nitrogen in the soil.

- Saying India is the largest producer of sugarcane or rice; it is the **second** largest producer of both (after Brazil and China respectively).
- Confusing **primitive subsistence** (small plots, hoe, dao; slash and burn) with **intensive subsistence** (high population pressure, high doses of inputs) and with commercial farming.
- Using **Green Revolution** (package technology for foodgrains) and **White Revolution** (Operation Flood, milk) as synonyms.
- Writing that Bhoodan was started by Gandhiji; **Vinoba Bhave** started it after Gandhiji's martyrdom.
