THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 9: **Agriculture (Geography)** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Assertion (A): Rice is grown mainly in humid regions with high rainfall. Reason (R): Rice needs annual rainfall above 100 cm and high temperature. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

2. Which season-sowing match is correct? 1

(a) Kharif - June-July **(b)** Zaid - October-December
(c) Kharif - winter **(d)** Rabi - June-July

3. A farmer chooses to grow sugarcane because 1

(a) it needs no sun **(b)** it needs no water
(c) it has no market **(d)** it gives assured price and income

4. Which of these best describes intensive farming? 1

(a) shifting fields **(b)** large area per farmer
(c) low yield **(d)** high yield per unit area from small land

5. Assertion (A): Commercial farming gives higher yields. Reason (R): It uses modern inputs such as HYV seeds, fertilisers and irrigation. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

6. Which statement is correct? 1

(a) India produces no pulses
(b) India only exports pulses
(c) India is the largest producer and consumer of pulses
(d) India is second in pulses

7. A crop requiring a hot and humid climate with temperature 21 to 27 degrees Celsius and 75 to 100 cm rain is 1

(a) sugarcane **(b)** barley **(c)** mustard **(d)** wheat

8. A farmer in the north-east practises jhumming. A likely environmental effect is 1

(a) loss of forest cover **(b)** gain of forest
(c) no effect **(d)** very large yields

9. **Assertion (A):** Rubber is an equatorial crop. 1
Reason (R): Rubber requires a moist and humid climate with rainfall of more than 200 cm and temperature above 25 degrees Celsius.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** Cotton is a kharif crop. 1
Reason (R): Cotton grows well in the drier parts of the black cotton soil of the Deccan plateau.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. How do cash crops impact food security? 2

12. How does Operation Flood help rural women? 2

13. Why is crop diversification needed? 2

14. Why are MSPs controversial? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain the importance of oilseeds for India. 3

16. Analyse why subsistence farmers remain poor. 3

17. Explain how MSP and procurement shape crop patterns. 3

OR

Explain the effect of fertiliser overuse. 3

18. Evaluate the Green Revolution's impact on environment and equity. 3

OR

Explain why plantation labour has issues. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** Tea is an example of plantation agriculture. The tea plant grows well in tropical and subtropical climates with deep, fertile, well-drained soil rich in humus. Tea bushes require a warm and moist frost-free climate all through the year, and frequent showers evenly distributed over the year ensure continuous growth of tender leaves. Tea is labour-intensive and picking is done by hand. 5
(i) What kind of farming is tea cultivation?
(ii) Name one soil requirement for tea.
(iii) Name two tea-producing states.
(iv) Why is tea cultivation called labour-intensive?

20. Compare agriculture in north and south India. 5

OR

Analyse how climate and soil shape cropping patterns. 5

END OF QUESTION PAPER — Total: 40 Marks
