THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 10: **Minerals and Energy Resources (Geography)** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Tidal energy can be harnessed in India mainly in 1

(a) the Deccan plateau **(b)** the Thar desert

(c) the Gulf of Khambhat and Gulf of Kuchchh **(d)** Himalayan valleys

2. India's high-grade iron ore is exported mainly to 1

(a) Greenland **(b)** Japan and South Korea

(c) Antarctica **(d)** Iceland

3. A country with much coal but poor hydel potential will mainly rely on 1

(a) geothermal power **(b)** thermal power **(c)** hydel power **(d)** tidal power

4. Which of these is an energy-saving act? 1

(a) burning wood **(b)** switching off unused lights

(c) idling cars **(d)** leaving appliances on

5. Which is a limitation of wind power? 1

(a) it needs strong and steady winds **(b)** it needs water

(c) it needs oil **(d)** it needs coal

6. Which resource is both a mineral and an energy source? 1

(a) coal **(b)** mica **(c)** copper **(d)** bauxite

7. Assertion (A): Hydroelectricity is a renewable source of energy. Reason (R): It depends on the water cycle. 1

(a) Both A and R are true and R is the correct explanation of A.

(b) Both A and R are true but R is not the correct explanation of A.

(c) A is true but R is false.

(d) A is false but R is true.

8. The Neyveli lignite is used mainly for 1

(a) thermal power generation **(b)** making steel

(c) making cement **(d)** making fertiliser

9. **Assertion (A):** Placer deposits contain minerals such as gold, silver, tin and platinum. 1

Reason (R): Placer deposits occur as alluvial deposits in sands of valley floors and base of hills, and the minerals are not corroded by water.

Choose the correct option:

(a) Both A and R are true and R is the correct explanation of A.

(b) Both A and R are true but R is not the correct explanation of A.

(c) A is true but R is false.

(d) A is false but R is true.

10. **Assertion (A):** Biogas plants using cattle dung are called Gobar gas plants. 1
Reason (R): Monazite sands of Kerala are rich in thorium.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why are hydroelectric projects controversial? 2

12. Why do power cuts affect industry? 2

13. Why is energy conservation as important as production? 2

14. Why are renewable energy sources preferred? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how tidal and geothermal energies are limited. 3

16. Compare Mumbai High and Digboi oilfields. 3

17. Explain the relation between minerals and regional development. 3

OR

Evaluate the safety of nuclear power. 3

18. Evaluate the claim that minerals are the backbone of industry. 3

OR

Explain how transport affects energy demand. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** Coal is the most abundantly available fossil fuel in India. Lignite is a low-grade brown coal with high moisture content, found at Neyveli in Tamil Nadu. Bituminous coal is the most popular coal in commercial use. Anthracite is the highest quality hard coal. Gondwana coal is a little over 200 million years old while Tertiary coal is about 55 million years old. 5
(i) Which is the highest quality coal?
(ii) Where are the principal lignite reserves?
(iii) Which coal is most popular in commercial use?
(iv) Why does lignite give less energy than anthracite?

20. Explain the challenges of energy security for India. 5

OR

Explain how India's coal and oil geography shapes economy. 5

END OF QUESTION PAPER — Total: 40 Marks
