ANSWER KEY & MARKING SCHEME SET 1

Chapter 11: **Manufacturing Industries (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** cheap and constant power	Bauxite
2	**(a)** electronic capital of India	IT hub
3	**(d)** a good conductor	Properties
4	**(a)** Gujarat, Tamil Nadu, Uttar Pradesh, Punjab and Kerala	Producers
5	**(d)** Delhi, Gurugram, Mumbai, Chennai	Hubs
6	**(d)** Rishra in 1855	Bengal
7	**(a)** cooperative sector	Sugar mills in Maharashtra
8	**(d)** sugarcane must be crushed soon after harvest	Raw material
9	**(d)** Maharashtra and Gujarat	Black soil region
10	**(b)** Andhra Pradesh	Port-based plant

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Cement is essential for construction such as houses, factories, bridges and dams (1); The first plant was in Chennai in 1904 and limestone is the main raw material (1).	1+1
12	Consumer industries produce goods for direct use by consumers (1); Sugar, toothpaste, paper and soaps are examples (1).	1+1
13	Industrial pollution is the contamination of air, water, land and noise by industrial activity (1); It harms the environment and health (1).	1+1
14	On the basis of raw material, industries are agro-based and mineral-based (1); Agro-based include cotton, jute and sugar, mineral-based include iron and steel and cement (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Fertiliser industries produce nitrogenous, phosphatic and potash fertilisers (1); Gujarat, Tamil Nadu, Uttar Pradesh, Punjab and Kerala are major (1); They are needed for the Green Revolution crops (1).	1+1+1
16	Iron and steel is the basic industry because machines, tools and construction need steel (1); It supplies other industries (1); Its production is a measure of development (1).	1+1+1
17	Manufacturing modernises agriculture and creates jobs (1); It reduces dependence on agriculture and eliminates unemployment and poverty (1); It brings foreign exchange by exports and helps regional balance (1).	1+1+1
	OR: Heavy industries use bulky raw materials, e.g., iron and steel (1); Light industries use light raw materials and produce light goods, e.g., electrical industries (1); This classification depends on the weight of raw material and product (1).	1+1+1
18	Public sector industries are owned by government (1); Private sector industries are owned by individuals or companies (1); Joint sector are run by the state with private firms, and cooperative sector by producers (1).	1+1+1
	OR: Aluminium is light, corrosion-resistant and a good conductor (1); Smelting needs cheap and constant power (1); It is made from bauxite and used in aircraft and utensils (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Jute is located along the Hugli (1); The first jute mill was at Rishra in 1855 (1); Sugar mills are in Maharashtra, Uttar Pradesh and the south (1); Many sugar mills are cooperatives (1); Both are agro-based and face competition and old technology (1).	1+1+1+1+1

	OR: Aluminium smelting needs bauxite and cheap power (1); It is light and corrosion resistant (1); Chemical industries make fertilisers, paints and drugs (1); They are in Gujarat, Tamil Nadu and Maharashtra (1); Both support other industries (1).	1+1+1+1+1
20	The first successful mill was in Mumbai in 1854 (1); Mills are in Maharashtra and Gujarat (1); Weaving is in the decentralised sector (1); Problems are power cuts, old machinery and low productivity (1); Competition from synthetics is also a problem (1).	1+1+1+1+1
	OR: Industries provide jobs (1); They add to GDP and exports (1); They modernise farming (1); They reduce regional gaps (1); They supply goods to consumers (1).	1+1+1+1+1

Mistakes to avoid:

- Placing **Jamshedpur** in Odisha or West Bengal; TISCO is located in **Jharkhand**.
- Mixing classifications: industries by **raw material** (agro-based, mineral-based), by **ownership** (public, private, joint, cooperative) and by **role** (basic, consumer).
- Giving the wrong dates: first successful cotton mill in **Mumbai in 1854**; first jute mill in **1855** at Rishra near Kolkata.
- Saying sugar mills are shifting north; they are moving to **south and west** because of higher sucrose content and a longer crushing season.
- Listing only air pollution as industrial pollution; also note **water** (thermal, effluents), **noise** and **land** pollution.
- Confusing public-sector steel plants (**SAIL**: Bhilai, Durgapur, Rourkela, Bokaro) with the private-sector TISCO.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 11: **Manufacturing Industries (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** TISCO at Jamshedpur	1907
2	**(a)** 1984	Methyl isocyanate leak
3	**(a)** Maharashtra	Farmers own the mills
4	**(b)** private sector	TISCO, Dabur
5	**(a)** manufacturing	Secondary activity
6	**(b)** Chennai in 1904	Tamil Nadu
7	**(b)** joint sector	Oil India Ltd
8	**(a)** raw material to other industries	Iron and steel
9	**(c)** Steel Authority of India Limited	Public sector
10	**(b)** air, water, thermal and noise pollution	Types

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	It modernises agriculture and creates jobs in secondary and tertiary sectors (1); It brings foreign exchange through exports and reduces regional disparities (1).	1+1
12	Manufacturing is the production of goods in large quantities after processing raw materials into more valuable products (1); Examples are making paper from wood and steel from iron ore (1).	1+1
13	Basic or key industries supply raw materials to other industries (1); Iron and steel and copper smelting are examples (1).	1+1
14	Jute is a golden fibre used for sacks, mats, ropes and carpets (1); The first jute mill was set up at Rishra near Kolkata in 1855 (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Jute is concentrated along the Hugli river (1); The first mill was at Rishra in 1855 (1); Jute is used for sacks, mats and ropes, and faces competition from synthetics (1).	1+1+1
16	Chemical industries make fertilisers, pesticides, paints, soaps and drugs (1); They include organic and inorganic chemicals (1); They are mostly near oil refineries and ports (1).	1+1+1
17	Sugar mills are located near cane growing areas (1); Maharashtra has many cooperative mills (1); The industry has shifted to south and west due to higher sugar content of cane (1).	1+1+1
	OR: Sugar is a seasonal industry (1); Mills are old and cane transport is poor (1); There is a need to use bagasse for power (1).	1+1+1
18	IT and electronics include software, telecom and computers (1); Bengaluru is the electronic capital (1); Software Technology Parks promote exports (1).	1+1+1
	OR: Treat effluents before release (1); Recycle water and install filters and precipitators (1); Use silencers and strict safety rules (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	IT and electronics include computers, telecom and software (1); Bengaluru is the electronic capital (1); Software Technology Parks promote exports (1); They create jobs for educated youth (1); They cause less pollution (1).	1+1+1+1+1
	OR: Industries cluster to share services (1); Banking, transport and labour are available (1); This lowers costs (1); Cities provide markets (1); These are agglomeration economies (1).	1+1+1+1+1
20	By raw material: agro-based and mineral-based (1); By role: basic and consumer industries (1); By capital: small scale and large scale (1); By ownership: public, private, joint and cooperative (1); By bulk: heavy and light industries (1).	1+1+1+1+1

	OR: Cement needs limestone, silica and gypsum (1); The first plant came up in Chennai in 1904 (1); It is vital for construction (1); The automobile industry makes vehicles (1); It is concentrated near Gurugram, Mumbai, Pune and Chennai (1).	1+1+1+1+1

Mistakes to avoid:

- Placing **Jamshedpur** in Odisha or West Bengal; TISCO is located in **Jharkhand**.
- Mixing classifications: industries by **raw material** (agro-based, mineral-based), by **ownership** (public, private, joint, cooperative) and by **role** (basic, consumer).
- Giving the wrong dates: first successful cotton mill in **Mumbai in 1854**; first jute mill in **1855** at Rishra near Kolkata.
- Saying sugar mills are shifting north; they are moving to **south and west** because of higher sucrose content and a longer crushing season.
- Listing only air pollution as industrial pollution; also note **water** (thermal, effluents), **noise** and **land** pollution.
- Confusing public-sector steel plants (**SAIL**: Bhilai, Durgapur, Rourkela, Bokaro) with the private-sector TISCO.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 11: **Manufacturing Industries (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** Jharkhand	SAIL
2	**(c)** Mumbai in 1854	Cotton industry
3	**(d)** fertilisers, paints and pharma	Organic and inorganic
4	**(b)** limestone, silica and gypsum	Raw materials
5	**(a)** golden fibre	Raw jute
6	**(b)** decentralised sector (handloom and powerloom)	Decentralised weaving
7	**(d)** public sector	BHEL, SAIL
8	**(d)** Hugli river	West Bengal
9	**(a)** consumer industries	Sugar, toothpaste
10	**(c)** other industries depend on it for machinery and tools	Machinery

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	SAIL is the Steel Authority of India Limited, a public sector company (1); It markets steel from public sector plants like Bhilai and Rourkela (1).	1+1
12	A joint sector industry is jointly run by the state and private individuals (1); Oil India Ltd (OIL) is an example (1).	1+1
13	A cooperative industry is owned and operated by producers or suppliers of raw materials, workers or both (1); Sugar industry in Maharashtra and coir in Kerala are examples (1).	1+1
14	Public sector industries are owned and operated by government agencies, such as BHEL and SAIL (1); Private sector industries are owned by individuals or companies, such as TISCO and Dabur (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Automobile industry provides vehicles of all kinds (1); It is concentrated near Delhi, Gurugram, Mumbai, Pune, Chennai and Bengaluru (1); It has linkages with steel, rubber and glass (1).	1+1+1
16	Cotton mills are concentrated in Maharashtra and Gujarat (1); Raw cotton, market, transport, port facilities and humid climate help (1); Weaving is mainly decentralised in handlooms and powerlooms (1).	1+1+1
17	Cement needs limestone, silica and gypsum (1); The first plant was set up in Chennai in 1904 (1); It is used in construction and is widely spread (1).	1+1+1
	OR: Cotton mills have an irregular power supply (1); They use old machinery and low labour productivity (1); They face stiff competition from synthetic fibres (1).	1+1+1
18	Plants are near iron ore, coal and manganese (1); Ports and transport help (1); Markets and labour influence location (1).	1+1+1
	OR: The Bhopal gas tragedy occurred in 1984 (1); Methyl isocyanate leaked from the Union Carbide plant (1); It killed thousands and caused lasting disability (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Iron and steel is a basic industry (1); Raw materials are iron ore, coking coal, limestone and manganese (1); Plants are at Bhilai, Durgapur, Rourkela, Bokaro and Jamshedpur (1); Visakhapatnam is port based (1); Problems are high costs and limited coking coal (1).	1+1+1+1+1
	OR: Industries cause air pollution by smoke and gases (1); Water pollution by effluents (1); Thermal pollution by hot water (1); Noise pollution by machines (1); Land pollution by solid waste (1).	1+1+1+1+1

20	Manufacturing modernises agriculture (1); It creates secondary and tertiary jobs (1); It earns foreign exchange by exports (1); Its share in GDP is about 17 per cent (1); The target of NMCC is 25 per cent by 2022 (1).	1+1+1+1+1
	OR: Treat effluents before discharge (1); Recycle water and use rainwater (1); Install filters and precipitators in chimneys (1); Use generators with silencers (1); Plant trees around factories (1).	1+1+1+1+1

Mistakes to avoid:

- Placing **Jamshedpur** in Odisha or West Bengal; TISCO is located in **Jharkhand**.
- Mixing classifications: industries by **raw material** (agro-based, mineral-based), by **ownership** (public, private, joint, cooperative) and by **role** (basic, consumer).
- Giving the wrong dates: first successful cotton mill in **Mumbai in 1854**; first jute mill in **1855** at Rishra near Kolkata.
- Saying sugar mills are shifting north; they are moving to **south and west** because of higher sucrose content and a longer crushing season.
- Listing only air pollution as industrial pollution; also note **water** (thermal, effluents), **noise** and **land** pollution.
- Confusing public-sector steel plants (**SAIL**: Bhilai, Durgapur, Rourkela, Bokaro) with the private-sector TISCO.
