ANSWER KEY & MARKING SCHEME SET 1

Chapter 11: **Manufacturing Industries (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** promote software exports	Provide infrastructure for IT
2	**(d)** availability of raw cotton, port facilities and a warm humid climate	Raw material and markets
3	**(b)** sugar mills in Maharashtra	Owned by producers
4	**(c)** many deaths and permanent disabilities	Lack of safety
5	**(b)** old and outdated machinery and irregular power supply	Low productivity
6	**(d)** recycling water and rainwater harvesting	Conserve water
7	**(d)** the process consumes a very large amount of electricity	Energy intensive
8	**(b)** iron and steel	Bulky raw materials
9	**(b)** high costs and limited availability of coking coal	Low labour productivity
10	**(d)** competition from synthetic substitutes	Synthetic fibres compete

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	They give assured buyers of cane (1); Farmers share the profit (1).	1+1
12	Imported raw material is easy to bring (1); Exports are easy by sea, as at Visakhapatnam (1).	1+1
13	Recycling reduces fresh water use (1); It lowers pollution of rivers (1).	1+1
14	They provide jobs to educated youth (1); They also create related services (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Industries use finite resources and pollute (1); Sustainable practice protects health (1); It ensures long-term growth (1).	1+1+1
16	NMCC was set up in 2006 (1); It aims to raise manufacturing's share in GDP to 25 per cent (1); It focuses on competitiveness (1).	1+1+1
17	Basic chemicals include sulphuric acid and fertilisers (1); Organic chemicals include petrochemicals (1); Others make paints, soaps and drugs (1).	1+1+1
	OR: Cotton uses cotton fibre and jute uses jute fibre (1); Cotton is in Maharashtra and Gujarat, jute near the Hugli (1); Both are agro-based and face competition (1).	1+1+1
18	Farmers who grow cane own the mills (1); Profits are shared (1); This assures them of a market (1).	1+1+1
	OR: Hot water from plants is discharged into rivers (1); It lowers oxygen (1); Aquatic life suffers (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Public: government owned (1); Private: individuals owned (1); Joint: state and private (1); Cooperative: producers own (1); Each has aims and examples (1).	1+1+1+1+1
	OR: Manufacturing creates jobs (1); It earns exports (1); It modernises farming (1); It reduces poverty (1); It adds to GDP (1).	1+1+1+1+1
20	Old technology (1); Power shortage (1); Competition (1); Pollution (1); Poor infrastructure (1).	1+1+1+1+1
	OR: Raw materials are iron ore, coking coal, limestone (1); Plants are at Bhilai, Durgapur, Rourkela, Bokaro (1); Visakhapatnam is port based (1); Problems are costs and coking coal (1); SAIL markets steel (1).	1+1+1+1+1

Mistakes to avoid:

- Placing **Jamshedpur** in Odisha or West Bengal; TISCO is located in **Jharkhand**.
- Mixing classifications: industries by **raw material** (agro-based, mineral-based), by **ownership** (public, private, joint, cooperative) and by **role** (basic, consumer).
- Giving the wrong dates: first successful cotton mill in **Mumbai in 1854**; first jute mill in **1855** at Rishra near Kolkata.
- Saying sugar mills are shifting north; they are moving to **south and west** because of higher sucrose content and a longer crushing season.
- Listing only air pollution as industrial pollution; also note **water** (thermal, effluents), **noise** and **land** pollution.
- Confusing public-sector steel plants (**SAIL**: Bhilai, Durgapur, Rourkela, Bokaro) with the private-sector TISCO.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 11: **Manufacturing Industries (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** reducing exports	Manufacturing raises exports
2	**(a)** the clustering of industries around an urban centre sharing services	Banking, transport and labour
3	**(b)** do not burn large quantities of fuel	Knowledge based
4	**(d)** reduce the cost of transporting bulky raw materials	Weight-losing raw materials
5	**(a)** joint sector	Owned by government and private shareholders
6	**(a)** smoke and toxic gases	Carbon monoxide and sulphur dioxide
7	**(d)** limestone is widely available	Raw material available widely
8	**(b)** they have big plants and machinery	Large installations
9	**(b)** cement	Buildings and roads
10	**(a)** sugar	Agro-based

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	They raise crop yields (1); They support the Green Revolution (1).	1+1
12	Smelting uses huge electricity (1); Power cost is a large part of total cost (1).	1+1
13	Industries release smoke, effluents and noise (1); Controls protect health and the environment (1).	1+1
14	Cheaper synthetic fibres compete with jute (1); Demand has fallen and machines are old (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Parks give infrastructure to firms (1); Software exports bring foreign exchange (1); They create jobs (1).	1+1+1
16	Aluminium is light and corrosion-resistant (1); It is a good conductor (1); It is cheaper and strong when alloyed (1).	1+1+1
17	Factories release untreated effluents (1); Chemicals and dyes poison water (1); Fish die and drinking water becomes unsafe (1).	1+1+1
	OR: Construction is growing fast (1); Housing and infrastructure need cement (1); Limestone is widely available (1).	1+1+1
18	Electronics needs advanced technology (1); Bengaluru is the hub (1); It includes TV, telecom and computers (1).	1+1+1
	OR: It creates demand for steel, rubber and glass (1); It gives jobs (1); It pollutes and adds to traffic (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Fertilisers raise yield (1); Chemicals produce paints, soaps, drugs (1); They support industry and farming (1); They are in Gujarat and Tamil Nadu (1); They also pollute (1).	1+1+1+1+1
	OR: Agro-based use farm raw materials (1); Examples are cotton, jute and sugar (1); Mineral-based use ores (1); Examples are iron and steel and cement (1); Locations follow raw material (1).	1+1+1+1+1
20	Air pollution from smoke and gases (1); Water pollution from effluents (1); Thermal pollution from hot water (1); Noise from machines (1); They harm health and ecology (1).	1+1+1+1+1
	OR: Cotton mills are in Maharashtra and Gujarat (1); Jute mills are on the Hugli (1); Both are old industries (1); Problems are old machines, power cuts, synthetics (1); Modernisation is needed (1).	1+1+1+1+1

Mistakes to avoid:

- Placing **Jamshedpur** in Odisha or West Bengal; TISCO is located in **Jharkhand**.
- Mixing classifications: industries by **raw material** (agro-based, mineral-based), by **ownership** (public, private, joint, cooperative) and by **role** (basic, consumer).
- Giving the wrong dates: first successful cotton mill in **Mumbai in 1854**; first jute mill in **1855** at Rishra near Kolkata.

- Saying sugar mills are shifting north; they are moving to **south and west** because of higher sucrose content and a longer crushing season.
- Listing only air pollution as industrial pollution; also note **water** (thermal, effluents), **noise** and **land** pollution.
- Confusing public-sector steel plants (**SAIL**: Bhilai, Durgapur, Rourkela, Bokaro) with the private-sector TISCO.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 11: **Manufacturing Industries (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** cane there has higher sugar content and the cooler climate gives a longer crushing season	Cooperatives are also more successful
2	**(c)** imports and exports of raw material and goods	Easy shipping
3	**(c)** finished goods earn more foreign exchange than raw materials	Value addition
4	**(b)** methyl isocyanate	From the Union Carbide plant
5	**(d)** electrostatic precipitators	Filters particulates
6	**(a)** discharge of untreated effluents	Dyes and chemicals
7	**(c)** manufacturing	Modernises agriculture
8	**(d)** other industries depend on it for machinery and tools	Backbone of manufacturing
9	**(a)** it is a port-based plant using imported raw material	Port-based
10	**(d)** joint sector	Example: Oil India Ltd

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Coking coal is a fuel and reducing agent in the blast furnace (1); It is limited in India and mostly imported (1).	1+1
12	It is needed for houses, bridges and roads (1); Its growth shows construction growth (1).	1+1
13	They create jobs in backward areas (1); They bring roads and services there (1).	1+1
14	It needs many workers in spinning, weaving and finishing (1); Most work is done by hand or semi-automatic machines (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Methyl isocyanate leaked in 1984 (1); Thousands died and many were disabled (1); It showed the need for strict safety rules (1).	1+1+1
16	Fertilisers raise crop yield (1); Plants are in Gujarat, Tamil Nadu, Uttar Pradesh, Punjab and Kerala (1); They are essential for the Green Revolution (1).	1+1+1
17	Bhilai, Durgapur, Rourkela, Bokaro and Jamshedpur are inland (1); Visakhapatnam is port-based (1); SAIL markets steel from public plants (1).	1+1+1
	OR: High costs of production (1); Limited availability of coking coal (1); Low labour productivity and irregular power (1).	1+1+1
18	Silencers on generators (1); Soundproof machines (1); Ear protection for workers (1).	1+1+1
	OR: Iron ore and coking coal are bulky (1); Plants are near them to save transport cost (1); Markets, labour and water also matter (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Treat effluents (1); Use filters and precipitators (1); Recycle water (1); Use silencers (1); Plant trees and enforce rules (1).	1+1+1+1+1
	OR: Ports help imports and exports (1); Visakhapatnam is port based (1); Cities give banks and labour (1); Industries cluster together (1); This lowers costs (1).	1+1+1+1+1
20	Cotton: cotton and port (1); Steel: iron ore and coal (1); Aluminium: power (1); Cement: limestone (1); IT: skilled labour (1).	1+1+1+1+1

	OR: IT needs skills not bulky material (1); It causes little pollution (1); Location is near skilled labour (1); Heavy industry needs raw material (1); IT has high exports (1).	1+1+1+1+1

Mistakes to avoid:

- Placing **Jamshedpur** in Odisha or West Bengal; TISCO is located in **Jharkhand**.
- Mixing classifications: industries by **raw material** (agro-based, mineral-based), by **ownership** (public, private, joint, cooperative) and by **role** (basic, consumer).
- Giving the wrong dates: first successful cotton mill in **Mumbai in 1854**; first jute mill in **1855** at Rishra near Kolkata.
- Saying sugar mills are shifting north; they are moving to **south and west** because of higher sucrose content and a longer crushing season.
- Listing only air pollution as industrial pollution; also note **water** (thermal, effluents), **noise** and **land** pollution.
- Confusing public-sector steel plants (**SAIL**: Bhilai, Durgapur, Rourkela, Bokaro) with the private-sector TISCO.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
