# ANSWER KEY & MARKING SCHEME SET 1

Chapter 12: **Lifelines of National Economy (Geography)** | Class 10 Social Science | Maximum Marks: 40

## SECTION — A (Objective Type) — Answers — 10 × 1 = 10

| Q. | Correct Option | Brief Reasoning |
|---|---|---|
| 1 | **(a)** Both A and R are true and R is the correct explanation of A. | Both true; R explains A |
| 2 | **(b)** trade, transport and communication | Link production and markets |
| 3 | **(b)** Kandla - tidal port | Kandla has tides |
| 4 | **(d)** combines the strengths of different modes | Road-rail-sea together |
| 5 | **(a)** roads are the most used mode of transport in India | Roads carry most traffic |
| 6 | **(a)** Both A and R are true and R is the correct explanation of A. | Both true; R explains A |
| 7 | **(c)** dense population and scattered settlements | Many roads needed |
| 8 | **(d)** Srinagar and Kanyakumari | About 4,000 km |
| 9 | **(b)** Both A and R are true but R is not the correct explanation of A. | Both statements are true, but the BRO's work on border roads does not explain who builds the Golden Quadrilateral. |
| 10 | **(a)** Both A and R are true and R is the correct explanation of A. | The initial cost is high but later costs are small and there is no trans-shipment, which explains why pipelines are economical. |

## SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 11 | Modern business and services need internet (1); It is like roads for the information economy (1). | 1+1 |
| 12 | Persistent deficits drain foreign exchange (1); Balanced trade keeps the economy stable (1). | 1+1 |
| 13 | Perishables spoil fast (1); Planes carry them quickly to far markets (1). | 1+1 |
| 14 | Rivers silt up and become shallow (1); Dredging keeps channels deep for ships (1). | 1+1 |

## SECTION — C (Short Answer) — Answers — 4 × 3 = 12

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 15 | Strikes or floods delay goods (1); Prices rise (1); Production and exports suffer (1). | 1+1+1 |
| 16 | Farmers cannot sell produce (1); Schools and clinics are hard to reach (1); Villages stay poor (1). | 1+1+1 |
| 17 | Better ports handle more cargo (1); Costs fall (1); Exports grow (1). | 1+1+1 |
| | **OR:** India sells more varied goods (1); Software and services grow (1); New markets open (1). | 1+1+1 |
| 18 | Industries choose well-connected places (1); Ports and highways cut costs (1); Remote areas get less industry (1). | 1+1+1 |
| | **OR:** Old tracks and trains (1); Funds are limited (1); Safety and speed need upgrading (1). | 1+1+1 |

## SECTION — D (Long Answer) — Answers — 2 × 5 = 10

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 19 | (i) The Golden Quadrilateral Super Highways (1). (ii) National Highways Authority of India (NHAI) (1). (iii) Srinagar and Kanyakumari (1). (iv) Roads provide door-to-door service, have lower construction cost, can climb gradients and pass through rough terrain, and can reach villages where rail lines cannot (2). | 1+1+1+2 |
| 20 | Vehicles burn fuel and pollute the air, and roads and railways cut through forests (1); Noise, congestion and accidents increase (1); Oil transport can cause spills (1); Solutions include public transport, CNG, more rail and waterway use (1); Cleaner fuels and efficient planning reduce the harm (1). | 1+1+1+1+1 |
| | **OR:** Some regions such as the northern plains and coastal states have dense road and rail networks, while hilly and north-eastern areas have low density (1); Kerala has high road density because of dense population, while Jammu and Kashmir has low density because of rugged terrain (1); Rural areas lack all-weather roads (1); Terrain and cost explain much of the difference (1); Policy should extend connectivity to lagging regions through schemes like PMGSY (1). | 1+1+1+1+1 |

**Mistakes to avoid:**

- Writing that Mumbai is an **artificial** harbour: it is the **biggest natural harbour**, while Chennai is an artificial port and Kandla a **tidal** port.
- Mixing up the Golden Quadrilateral (**Delhi-Kolkata-Chennai-Mumbai**) with the North-South (**Srinagar-Kanyakumari**) and East-West (**Silchar-Porbandar**) corridors.
- Saying that the **NHAI** builds state highways; state highways and district roads are built and maintained by the State Public Works Department, and the BRO builds roads in border areas.
- Confusing **balance of trade** (goods only, exports minus imports) with 'balance of payments', or calling a deficit 'favourable'.
- Forgetting that the first railway ran from **Mumbai to Thane** in 1853, and treating railways as unimportant now; they are still the principal mode for bulk freight.
- Treating communication as only the telephone: it includes **personal communication** (post, telephone, internet) and **mass communication** (radio, TV, newspapers, cinema).

**Evaluator's note:** Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

# ANSWER KEY & MARKING SCHEME SET 2

Chapter 12: **Lifelines of National Economy (Geography)** | Class 10 Social Science | Maximum Marks: 40

## SECTION — A (Objective Type) — Answers — 10 × 1 = 10

| Q. | Correct Option | Brief Reasoning |
|---|---|---|
| 1 | **(b)** local employment and income | Jobs in services |
| 2 | **(c)** helicopter | Pawan Hans serves such areas |
| 3 | **(c)** have no coastline of their own | Use ports of nearby states |
| 4 | **(a)** waterways are the fastest mode | Waterways are slow |
| 5 | **(d)** Silchar and Porbandar | About 3,300 km |
| 6 | **(a)** Both A and R are true and R is the correct explanation of A. | Both true; R explains A |
| 7 | **(a)** Both A and R are true and R is the correct explanation of A. | Both true; R explains A |
| 8 | **(a)** high cost | Costly for bulk goods |
| 9 | **(c)** A is true but R is false. | A is true: Kandla was developed to ease the pressure on Mumbai port. R is false: it lies on the western coast. |
| 10 | **(d)** A is false but R is true. | A is false, since both modes work together and roads cannot replace railways for bulk long-distance carriage. R is true. |

## SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 11 | Roads may be poorly built or overcrowded (1); Quality, capacity and links matter too (1). | 1+1 |
| 12 | Business needs quick information (1); Telecom enables orders, banking and contacts (1). | 1+1 |
| 13 | Fuel use and pollution rise with traffic (1); Sustainable transport protects the environment (1). | 1+1 |
| 14 | BRO builds roads in remote areas (1); This opens regions to trade and services (1). | 1+1 |

## SECTION — C (Short Answer) — Answers — 4 × 3 = 12

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 15 | Rivers are seasonal and shallow (1); Silting limits movement (1); Few terminals and slow speed deter users (1). | 1+1+1 |
| 16 | Speeding and poor roads cause accidents (1); Congestion adds risk (1); Safety rules and enforcement are weak (1). | 1+1+1 |
| 17 | Internet enables online trade (1); Logistics tracking improves efficiency (1); E-commerce widens markets (1). | 1+1+1 |
| | **OR:** Tourism brings income to remote areas (1); It creates jobs (1); It needs roads and safety (1). | 1+1+1 |
| 18 | Vehicles pollute air (1); Roads cut forests (1); Noise and accidents rise (1). | 1+1+1 |
| | **OR:** Exports earn foreign exchange (1); Imports use it (1); The gap is the balance of payments (1). | 1+1+1 |

## SECTION — D (Long Answer) — Answers — 2 × 5 = 10

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 19 | (i) Mormugao port (1). (ii) Jawaharlal Nehru Port (Nhava Sheva) (1). (iii) A tidal port (1). (iv) Goods for foreign countries are loaded and imported goods are unloaded at ports, so they link the country to the world by sea, and sea transport carries most of the bulk cargo of international trade cheaply (2). | 1+1+1+2 |
| 20 | Communication spreads information, news and ideas quickly, and personal communication such as letters and telephones is complemented by mass communication such as radio, TV and newspapers (1); India's postal network is the largest in the world and reaches remote villages (1); Telecom links businesses, banks and markets, and ICT created services like call centres (1); It supports education, health and governance and reduces isolation of remote areas (1); Faster information flow aids trade and national integration (1). | 1+1+1+1+1 |

| | | |
|---|---|---|
| | **OR:** The Nagpur Plan of 1943 was the first planned programme of road development (1); National highways expanded under the Central Public Works Department, and later the NHAI built the Golden Quadrilateral of 5,846 km linking Delhi, Kolkata, Chennai and Mumbai (1); The North-South corridor links Srinagar and Kanyakumari and the East-West corridor links Silchar and Porbandar (1); State highways, district roads and rural roads under PMGSY, and border roads by the BRO (formed in 1960), complete the network (1); Challenges include congestion, accidents, poor maintenance and low road density in hilly states (1). | 1+1+1+1+1 |

**Mistakes to avoid:**

- Writing that Mumbai is an **artificial** harbour: it is the **biggest natural harbour**, while Chennai is an artificial port and Kandla a **tidal** port.
- Mixing up the Golden Quadrilateral (**Delhi-Kolkata-Chennai-Mumbai**) with the North-South (**Srinagar-Kanyakumari**) and East-West (**Silchar-Porbandar**) corridors.
- Saying that the **NHAI** builds state highways; state highways and district roads are built and maintained by the State Public Works Department, and the BRO builds roads in border areas.
- Confusing **balance of trade** (goods only, exports minus imports) with 'balance of payments', or calling a deficit 'favourable'.
- Forgetting that the first railway ran from **Mumbai to Thane** in 1853, and treating railways as unimportant now; they are still the principal mode for bulk freight.
- Treating communication as only the telephone: it includes **personal communication** (post, telephone, internet) and **mass communication** (radio, TV, newspapers, cinema).

**Evaluator's note:** Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

## ANSWER KEY & MARKING SCHEME SET 3

Chapter 12: **Lifelines of National Economy (Geography)** | Class 10 Social Science | Maximum Marks: 40

### SECTION — A (Objective Type) — Answers — 10 × 1 = 10

| Q. | Correct Option | Brief Reasoning |
|---|---|---|
| 1 | **(a)** Both A and R are true and R is the correct explanation of A. | Both true; R explains A |
| 2 | **(d)** Jawaharlal Nehru Port | Container port |
| 3 | **(b)** pipeline | Continuous flow |
| 4 | **(d)** A is false but R is true. | A false; R true |
| 5 | **(d)** railways | Economical for bulk |
| 6 | **(a)** Both A and R are true and R is the correct explanation of A. | Both true; R explains A |
| 7 | **(a)** television | Mass media |
| 8 | **(c)** Bombay and Thane in 1853 | The beginning of Indian Railways |
| 9 | **(a)** Both A and R are true and R is the correct explanation of A. | Carrying people and goods over long distances for so many purposes is why they are the principal mode; R explains A. |
| 10 | **(b)** Both A and R are true but R is not the correct explanation of A. | Both are true but unrelated, so R does not explain A. |

### SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 11 | Oil and gas demand grew (1); Pipelines move them cheaply and safely (1). | 1+1 |
| 12 | Goods enter and leave through ports (1); They link home markets with the world (1). | 1+1 |
| 13 | Farmers take produce to markets (1); Good roads cut losses and raise income (1). | 1+1 |
| 14 | Tourists need roads, hotels and safe travel (1); Poor infrastructure reduces visits (1). | 1+1 |

### SECTION — C (Short Answer) — Answers — 4 × 3 = 12

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 15 | A network is linked routes of different modes (1); It connects places efficiently (1); Nodes are ports, stations, cities (1). | 1+1+1 |
| 16 | Containers speed loading (1); They reduce theft and damage (1); They lower handling cost (1). | 1+1+1 |
| 17 | Telecom links banks and villagers (1); Mobile banking reaches the poor (1); It reduces travel to branches (1). | 1+1+1 |
| | **OR:** It cut travel time (1); It brought industries along highways (1); It left some regions behind (1). | 1+1+1 |
| 18 | Roads suit short distances but congest (1); Rail is cheaper for heavy goods (1); Waterways and pipelines are needed too (1). | 1+1+1 |
| | **OR:** Coastal ships carry bulk cheaply (1); They reduce load on roads (1); They link ports (1). | 1+1+1 |

### SECTION — D (Long Answer) — Answers — 2 × 5 = 10

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 19 | (i) The difference between the value of exports and the value of imports (1). (ii) Unfavourable (adverse), because imports exceed exports (1). (iii) Rs 20 crore (1). (iv) No country can produce all it needs, so trade lets it exchange surplus goods for what it lacks; a country with a flourishing trade has strong production and demand, so trade reflects its economic health (2). | 1+1+1+2 |
| 20 | Ports are gateways of foreign trade: Mumbai, Kandla, Jawaharlal Nehru Port, Marmagao and Kochi on the west coast, and Chennai, Visakhapatnam, Paradip and Kolkata-Haldia on the east (1); Mumbai has a spacious natural harbour, Kandla is a tidal port, Chennai is an artificial harbour and Visakhapatnam is the deepest landlocked and well-protected port (1); Jawaharlal Nehru Port was built to decongest Mumbai (1); International trade lets India exchange surplus goods for what it lacks and earn foreign exchange, exporting gems and jewellery, chemicals, engineering goods and software (1); It imports petroleum, gold and machinery, and a favourable balance of trade strengthens the economy (1). | 1+1+1+1+1 |

| | | |
|---|---|---|
| | **OR:** Road transport is cheapest and most flexible for short distances and gives door-to-door service, but cost rises with distance and capacity is limited (1); Rail is economical for bulky goods and long journeys but cannot reach everywhere and needs heavy investment (1); Waterways are the cheapest for heavy goods and use less fuel, but are slow and depend on depth and season (1); Air transport is the fastest and reaches difficult areas but is costly (1); Pipelines suit liquids and gases, giving continuous low-cost flow without traffic (1). | 1+1+1+1+1 |

**Mistakes to avoid:**

- Writing that Mumbai is an **artificial** harbour: it is the **biggest natural harbour**, while Chennai is an artificial port and Kandla a **tidal** port.
- Mixing up the Golden Quadrilateral (**Delhi-Kolkata-Chennai-Mumbai**) with the North-South (**Srinagar-Kanyakumari**) and East-West (**Silchar-Porbandar**) corridors.
- Saying that the **NHAI** builds state highways; state highways and district roads are built and maintained by the State Public Works Department, and the BRO builds roads in border areas.
- Confusing **balance of trade** (goods only, exports minus imports) with 'balance of payments', or calling a deficit 'favourable'.
- Forgetting that the first railway ran from **Mumbai to Thane** in 1853, and treating railways as unimportant now; they are still the principal mode for bulk freight.
- Treating communication as only the telephone: it includes **personal communication** (post, telephone, internet) and **mass communication** (radio, TV, newspapers, cinema).

**Evaluator's note:** Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
