Mistakes to avoid:

- Writing that democracy **guarantees** prosperity and no inequality; the chapter says it does not automatically deliver faster growth or remove inequality.
- Forgetting the three expected outcomes of a democratic government: **accountable, responsive and legitimate**.
- Mixing up **political equality** (one person, one vote) with **economic equality**; democracy gives the first but has not fully achieved the second.
- Saying democracy has made no progress for women and disadvantaged groups; it has increased **dignity and freedom**, though gaps remain.
- Quoting the growth figures the wrong way round: 1950-2000 **dictatorial regimes 4.42**, **democratic regimes 3.95**, but among poor countries 4.34 vs 4.28; do not conclude that dictatorship is better.
- Forgetting that a democratic government can be slower in taking decisions, but this is the cost of **consultation and accountability**.
