ANSWER KEY & MARKING SCHEME SET 1

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** per capita income	Rich and low-income countries differ in it
2	**(b)** Rs 6,000	6,00,000 / 100 = 6,000
3	**(d)** disparities between people	Two countries with the same average can differ in the distribution
4	**(d)** income	Higher income means more goods and services
5	**(c)** assured high prices for her crops and cheap labour	Her goals differ from those of the landless
6	**(d)** Bihar	Bihar also has weaker social indicators
7	**(c)** the percentage of children in an age group attending school	A school-related indicator
8	**(c)** It does not tell how income is distributed	It hides inequalities
9	**(b)** more days of work and better wages	The goal depends on his condition
10	**(a)** rich or high-income countries	Others are placed in lower categories

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	A system of ration shops supplying foodgrains at affordable prices (1); It is important in making food available to people (1).	1+1
12	It hides disparities in the distribution of income (1); Two countries can have the same average but different well-being (1).	1+1
13	Development that meets present needs without harming future generations (1); It requires careful use of resources (1).	1+1
14	A dam benefits some by providing irrigation and power (1); It may displace others from their homes (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	On the basis of per capita income (1); Countries above a cut-off are rich and those below are low-income (1); India falls in the lower middle income category (1).	1+1+1
16	It has a well-functioning public distribution system (1); It has better schools and health facilities (1); Public spending on basic services is high (1).	1+1+1
17	Development that continues for a long time without exhausting resources (1); Present needs are met without harming future generations (1); Environment must be protected (1).	1+1+1
	OR: Facilities like schools, hospitals and ration shops provided by the government (1); They are needed by all and cannot be bought individually (1); They improve well-being (1).	1+1+1
18	Hides disparities in income distribution (1); Does not show health or education (1); Does not show whether resources are shared (1).	1+1+1
	OR: Development for one may be harmful for another (1); A dam may give power and irrigation to some (1); It may displace people and damage livelihood of others (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	They provide basic needs like food, schools, health (1); PDS makes food available at affordable prices (1); Good schools and hospitals improve literacy and reduce infant mortality (1); Individuals cannot afford them alone (1); Kerala shows their value (1).	1+1+1+1+1
	OR: Different people gain and lose from the same project (1); A dam may help farmers but displace villagers (1); Needs of all must be considered (1); Fair compensation and sustainability (1); Public discussion is required (1).	1+1+1+1+1

20	Income is a common criterion (1); Per capita income compares countries (1); World Bank classifies countries by it (1); Health and education matter too (1); Human Development Report uses all three (1).	1+1+1+1+1
	OR: Does not show distribution (1); Two countries can have the same average with different inequality (1); Does not show health and education (1); Money cannot buy a clean environment (1); Hence other indicators are needed (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** providing foodgrains at affordable prices through ration shops	Kerala has a very well functioning PDS
2	**(a)** educational levels, health status and per capita income	These are its criteria
3	**(b)** life expectancy	It shows how long people live
4	**(b)** literacy rate and infant mortality rate	They are indicators of well-being
5	**(b)** improvement in people's quality of life	Many criteria matter
6	**(a)** what is development for one may not be development for another	Aspirations depend on the person's situation
7	**(b)** is a renewable resource that is being used faster than it is replenished	Water tables are falling in many areas
8	**(c)** a pollution-free environment	Public health and environment need collective action
9	**(b)** freedom	People value non-material things
10	**(a)** development that meets present needs without damaging resources for future generations	Resources must last

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Their situations and aspirations differ (1); A landless labourer wants more work and wages while a farmer wants assured prices (1).	1+1
12	Improvement in people's quality of life and well-being (1); It depends on the goals of different persons and includes more than income (1).	1+1
13	Average income of the people of a country (1); Total income of the country divided by its total population (1).	1+1
14	Countries on the basis of educational levels, health status and per capita income (1); It is published by the UNDP (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	People have non-material goals (1); Income does not show distribution (1); Health, education and environment matter (1).	1+1+1
16	They show people's health and education (1); They are not shown by income alone (1); They capture quality of life (1).	1+1+1
17	Haryana has higher per capita income (1); Kerala has a lower infant mortality rate and higher literacy (1); Hence income alone does not show development (1).	1+1+1
	OR: Total income divided by total population (1); It gives per capita income (1); Useful for comparing countries (1).	1+1+1
18	The educational levels of the people of a country (1); The health status of the people (1); The per capita income of the country (1).	1+1+1
	OR: Renewable resources can be replenished naturally like groundwater or sunlight (1); Non-renewable resources are exhausted once used, like crude oil (1); Overuse can exhaust even renewable resources (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Averages hide inequality (1); Country with equal distribution is better off (1); Non-income goals like security and respect matter (1); Health and education matter (1); Environment and sustainability matter (1).	1+1+1+1+1
	OR: More income without health or education leaves people poor in well-being (1); More consumption may harm the environment (1); More growth for a few may increase inequality (1); Resources may be exhausted (1); Quality of life should be the aim (1).	1+1+1+1+1

20	Haryana has a higher per capita income than Kerala (1); Kerala has a better literacy and infant mortality record (1); Bihar has the lowest income and weaker indicators (1); Kerala's public facilities and PDS help (1); Income alone does not reflect well-being (1).	1+1+1+1+1
	OR: Meeting present needs without damaging future needs (1); Resources like groundwater and crude oil are limited (1); Overuse harms the environment (1); Future generations depend on them (1); Development must be carefully planned (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** infant mortality rate and literacy rate	Because of better public facilities
2	**(b)** crude oil	Once used it cannot be replenished soon
3	**(a)** a well-functioning school and hospital	Public facilities benefit all
4	**(c)** the number of children dying before the age of one year per 1000 live births	A health indicator
5	**(c)** security, respect and equal treatment	Non-material goals matter too
6	**(c)** income alone is not an adequate indicator of well-being	Quality of life depends on more
7	**(a)** UNDP	It compares countries on health, education and income
8	**(c)** the proportion of the literate population in the age group of seven years and above	An educational indicator
9	**(d)** a dam that benefits some people but displaces others	One person's development may harm another's
10	**(b)** A, because income is more equally distributed	Distribution matters

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Kerala has better public facilities like education, health and PDS (1); Its infant mortality rate and literacy are better though its income is lower (1).	1+1
12	The number of children dying before the age of one year (1); Expressed per 1000 live births in that year (1).	1+1
13	The proportion of the literate population (1); In the age group of seven years and above (1).	1+1
14	Health indicators like infant mortality rate or life expectancy (1); Education indicators like literacy rate or attendance ratio (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Persons have different goals (1); Countries have different resources and needs (1); Therefore there is no single universal criterion (1).	1+1+1
16	Regular work and better wages (1); Security, respect and equal treatment (1); Freedom and a pollution-free environment (1).	1+1+1
17	A landless labourer wants more days of work and better wages (1); A prosperous farmer wants assured high prices for crops (1); Their goals can even conflict (1).	1+1+1
	OR: A pollution-free environment cannot be bought individually (1); Protection from infectious diseases needs public health facilities (1); Unadulterated medicines need regulation (1).	1+1+1
18	An average hides how income is shared among people (1); One country may have almost equal incomes while in the other a few are rich and most are poor (1); So the well-being of the people can differ even when the average income is the same (1).	1+1+1
	OR: It is renewable only if used slowly (1); Overuse lowers the water table (1); Future generations may have less water (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Published by the UNDP (1); Compares countries on education, health and per capita income (1); Gives a broader picture than income alone (1); Helps in policy (1); Countries rank differently than by income (1).	1+1+1+1+1
	OR: People's situations and aspirations differ (1); Landless labourers want more work and better wages (1); Prosperous farmers want assured prices (1); A girl may want freedom and equal opportunities (1); Goals may conflict, as in building a dam (1).	1+1+1+1+1

20	Infant mortality shows health condition of children (1); Literacy shows education level (1); Net attendance ratio shows school participation (1); They are not shown by per capita income (1); They help compare states like Kerala and Haryana (1).	1+1+1+1+1
	OR: Renewable resources replenish naturally (1); Non-renewable resources are limited, e.g., crude oil (1); Groundwater is renewable but overused (1); Overuse harms the environment (1); Careful use is needed for sustainability (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.
