ANSWER KEY & MARKING SCHEME SET 1

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** high per capita income	Income is the criterion
2	**(a)** a pollution-free environment	Needs public action
3	**(d)** overuse of groundwater	Resources are limited
4	**(c)** improvement in the quality of life	It involves more than income
5	**(a)** the total population	It is an average
6	**(d)** Human Development Index	It ranks countries
7	**(d)** incomes are more equally distributed	Distribution matters
8	**(b)** future generations	It conserves resources
9	**(a)** Country A	Higher income criterion
10	**(c)** Human Development Report	It compares countries on health, education, income

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Average income (1); Total income divided by total population (1).	1+1
12	Goals other than money income (1); Respect, security or freedom (1).	1+1
13	Rs 5,000 crore divided by 100 crore (1); Rs 50 (1).	1+1
14	Development that does not harm future generations (1); Uses resources carefully (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Haryana has higher per capita income (1); Kerala has lower infant mortality (1); Kerala has higher literacy (1).	1+1+1
16	Development for one may harm another (1); A dam benefits irrigation and power users (1); It displaces people (1).	1+1+1
17	Healthy people are more productive (1); Infant mortality shows health condition (1); Part of HDR criteria (1).	1+1+1
	OR: Public facilities are provided by government for all (1); Private are bought individually (1); Public facilities are important for those who cannot afford (1).	1+1+1
18	Renewable resources such as sunlight and groundwater can be replenished by nature (1); Non-renewable resources such as crude oil are exhausted once used and take very long to form (1); Even renewable resources can be exhausted if they are used faster than they are replenished (1).	1+1+1
	OR: Developed countries have higher per capita income (1); They are classified rich by World Bank (1); Developing have lower (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	It is a report published by the UNDP (1); It compares countries on educational levels, health status and per capita income (1); It gives a broader picture of development than income alone (1); It helps compare the progress of countries (1); It highlights areas in which people are deprived (1).	1+1+1+1+1
	OR: A dam provides irrigation and power to many people (1); It displaces the people who live in the area that gets submerged (1); Those affected should be consulted (1); They should be compensated and resettled (1); The benefits and costs for all groups should be weighed before deciding (1).	1+1+1+1+1
20	Total income divided by population (1); Used by World Bank for classification (1); Hides distribution (1); Does not show health and education (1); Does not show environment (1).	1+1+1+1+1
	OR: Health indicators such as infant mortality rate and life expectancy (1); Education indicators such as literacy rate and net attendance ratio (1); Public facilities such as schools, hospitals and ration shops (1); A clean environment and sustainable use of resources (1); Non-material goals such as security, respect and equal treatment (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** school	Provided for all
2	**(d)** sunlight	It can be used again and again
3	**(b)** literate people in the seven years and above group	An education indicator
4	**(d)** lower middle income	As per the chapter
5	**(b)** days of work and better wages	Her goal differs from a farmer's
6	**(d)** Kerala	Because of public facilities
7	**(d)** people living in the area that gets submerged	They lose homes and livelihood
8	**(d)** Rs 10	100/10 = 10
9	**(d)** respect and security	Non-material goals matter
10	**(a)** how income is distributed	It hides inequalities

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	A report of the UNDP (1); Compares countries on health, education and income (1).	1+1
12	Because their situations differ (1); Their needs and aspirations differ (1).	1+1
13	World Bank (1); Rich countries have high per capita income (1).	1+1
14	Improvement in the quality of life (1); More than a rise in income (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	People want to be respected and treated as equals (1); Discrimination hurts dignity and opportunity (1); It is a non-income goal that money alone cannot provide (1).	1+1+1
16	Overuse lowers water tables (1); It is renewable but replenished slowly (1); Future shortage (1).	1+1+1
17	Educated people can earn better (1); Helps health and awareness (1); Part of HDR criteria (1).	1+1+1
	OR: Public Distribution System through ration shops (1); Provides foodgrains at affordable prices (1); Helps the poor (1).	1+1+1
18	It is a collective need (1); It needs public action (1); Individuals cannot buy it alone (1).	1+1+1
	OR: Infant mortality rate, which shows the health of children (1); Literacy rate, which shows the level of education (1); Net attendance ratio, which shows how many children of an age group attend school (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Averages hide inequality (1); Two countries may share the same average (1); One equal, the other unequal (1); Equality gives better well-being (1); Health and education also matter (1).	1+1+1+1+1
	OR: An improvement in the quality of life of the people (1); Higher incomes for people (1); Better health and education (1); Sustainable use of resources (1); Equal opportunities and freedom for all (1).	1+1+1+1+1
20	Haryana has higher per capita income (1); Kerala has lower infant mortality (1); Kerala has higher literacy (1); Kerala has a good PDS (1); Kerala's public facilities matter (1).	1+1+1+1+1
	OR: Sustainable development meets the needs of the present without harming the needs of future generations (1); Resources must be used so that they last (1); Groundwater is a renewable resource that is being overused in many regions (1); Crude oil is a non-renewable resource that will be exhausted (1); Protecting the environment is part of sustainable development (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.

- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** high prices for her crops	Her goals differ from those of the landless
2	**(c)** Public Distribution System	Provide foodgrains at fair prices
3	**(a)** World Bank	Its reports use per capita income
4	**(d)** benefits and costs fall on different people	Example: a dam
5	**(d)** Haryana	Higher income does not mean better indicators
6	**(b)** health status	Others are education and income
7	**(b)** non-renewable	Crude oil is an example
8	**(c)** one year	Per 1000 live births
9	**(c)** average income	Total income divided by population
10	**(a)** differ	Depend on situations

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Kerala is one of the states compared (1); Haryana or Bihar is the other state compared with Kerala (1).	1+1
12	Number of children dying before age one (1); Per 1000 live births (1).	1+1
13	Renewable: sunlight or groundwater (1); Non-renewable: crude oil (1).	1+1
14	Facilities provided by government for all (1); Schools, hospitals or ration shops (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Does not show distribution of income (1); Does not show health and education (1); Does not show environmental quality (1).	1+1+1
16	More days of work and better wages (1); Assured high prices for crops (1); Security, respect and equal treatment (1).	1+1+1
17	Public facilities improve well-being (1); Income is not the only measure (1); Education and health matter (1).	1+1+1
	OR: Total income divided by population gives average income (1); Higher average is better by this criterion (1); World Bank uses it to classify countries (1).	1+1+1
18	Comparison of countries (1); Education, health and income (1); Rank of each country (1).	1+1+1
	OR: Can be continued for long (1); Does not exhaust resources (1); Protects future generations (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Schools and hospitals improve literacy and health (1); PDS gives food at affordable prices (1); People cannot buy such goods individually (1); They reduce inequalities (1); Kerala shows their role (1).	1+1+1+1+1
	OR: People's situations and aspirations differ, so their goals differ (1); A landless labourer wants more days of work and better wages, while a prosperous farmer wants assured high prices for crops (1); A girl may want freedom and equal opportunities (1); The goals of different people can even conflict (1); Hence development means different things to different persons (1).	1+1+1+1+1
20	Money cannot buy a pollution-free environment (1); It cannot by itself buy protection from infectious diseases without public health facilities (1); Public facilities such as schools and hospitals are needed (1); Security and respect are non-material needs (1); Resources must also be used sustainably for the future (1).	1+1+1+1+1
	OR: Renewable resources can be replenished by nature, such as sunlight and groundwater (1); Non-renewable resources are exhausted once used, such as crude oil (1); Overuse can harm even renewable resources, as seen in groundwater (1); Overuse harms the environment (1); Careful planning of use is needed so that resources last for the future (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.
