ANSWER KEY & MARKING SCHEME SET 1

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** per capita income	Income is an economic indicator
2	**(c)** per capita income	Income is the criterion used in the chapter
3	**(c)** burning of crude oil	It cannot be replenished
4	**(d)** better access to schools and public education	As in Kerala
5	**(c)** It has a lower per capita income and weaker literacy	Chapter's comparison
6	**(c)** falls	Average falls
7	**(c)** human development indicators	Health and education improve
8	**(a)** sustainability	Overuse of resource
9	**(d)** income only	Only income is high
10	**(b)** per capita income	Others are health and education

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Divide income by population (1); Rs 5,000 (1).	1+1
12	Preserves resources for them (1); Avoids irreversible damage (1).	1+1
13	Strong health facilities and PDS (1); Greater public spending on basic needs (1).	1+1
14	Publishes Human Development Report (1); Ranks countries on health, education, income (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Show access to schooling (1); Improve earning and awareness (1); Part of HDR (1).	1+1+1
16	Provide basic services to the poor (1); Improve education and health (1); Reduce dependence on income (1).	1+1+1
17	Haryana has higher income than Kerala (1); Kerala has lower infant mortality and higher literacy (1); Public facilities matter (1).	1+1+1
	OR: Show well-being of children (1); Reflect health facilities (1); Not shown by income (1).	1+1+1
18	One indicator hides other aspects (1); Multiple indicators show full picture (1); Policies can be targeted (1).	1+1+1
	OR: Averages hide inequality in how income is shared (1); A poor family may earn far less than the average (1); What matters to the family is its own income and access to services, not the average (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Income and goods are material (1); Respect, freedom, security non-material (1); Both shape quality of life (1); People's goals combine both (1); A balanced approach is needed (1).	1+1+1+1+1
	OR: Identify who gains and who loses from a project (1); Consult the people who are affected (1); Provide compensation and rehabilitation (1); Put environmental safeguards in place (1); Take decisions keeping long-term sustainability in mind (1).	1+1+1+1+1
20	Haryana: high income but weaker social indicators (1); Kerala: lower income but strong public facilities (1); Bihar: low income and weak indicators (1); Differences in public spending (1); Policies matter (1).	1+1+1+1+1
	OR: Average income is a starting point for comparison (1); The distribution of income changes the level of well-being (1); Health indicators such as infant mortality should be compared (1); Education indicators such as literacy should be compared (1); Environment and sustainability should also be considered (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.

- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** freedom and equal opportunity	Non-income goals matter to her
2	**(a)** industrialists want cheap land, farmers want to keep it	Interests differ
3	**(b)** consulting and compensating those affected	Considering all goals
4	**(c)** need for public health facilities	Collective arrangements matter
5	**(c)** how many children of an age group attend school	An education indicator
6	**(b)** food availability	A measure used in comparing states
7	**(c)** health and education indicators like infant mortality and literacy	Income is not everything
8	**(d)** a school is a public facility that individual families cannot easily provide	Collective provision is needed
9	**(b)** equal, but B has more inequality	Both average Rs 10
10	**(a)** Y may be doing better on health in spite of lower income	Income alone does not decide well-being

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Good health facilities (1); Better nutrition and care (1).	1+1
12	Higher income gives more goods and services (1); It is easy to measure and compare (1).	1+1
13	Projects may displace or pollute (1); Benefits and costs fall on different people (1).	1+1
14	People seek respect, freedom, security (1); Health and education matter too (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Costs and benefits differ (1); Dams and factories displace or pollute (1); Fair decisions are needed (1).	1+1+1
16	It reduces poverty (1); It improves the well-being of most people (1); It promotes social harmony (1).	1+1+1
17	Income per person falls if population grows faster (1); Rises if income grows faster (1); Average depends on both (1).	1+1+1
	OR: Economic indicators measure income, such as per capita income (1); Human development indicators measure health and education (1); The Human Development Index combines income, health and education (1).	1+1+1
18	People living in the area may be displaced (1); The environment may be damaged (1); Local people may lose their livelihood (1).	1+1+1
	OR: It makes foodgrains available through ration shops (1); It keeps prices affordable (1); It helps poor households to get food (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Lower income than Haryana (1); Better literacy and infant mortality (1); Strong PDS and public facilities (1); Public spending on basic services (1); Lesson for other states (1).	1+1+1+1+1
	OR: Income buys private goods (1); Public facilities provide collective goods (1); Clean environment and health need public action (1); Both together improve well-being (1); Kerala example (1).	1+1+1+1+1
20	Average income hides how income is shared (1); Health and education may be poor despite high income (1); The environment may be damaged (1); People also have non-income goals (1); Hence a higher average income does not always mean more development (1).	1+1+1+1+1

	OR: It is a report of the UNDP (1); It compares countries on education, health and income (1); Countries with similar incomes can rank differently on human development, as Kerala and Haryana show within India (1); It helps identify gaps in health and education (1); It guides policy for improving people's quality of life (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** well-functioning public facilities	PDS, schools and health
2	**(a)** Rs 5,000	40,000/8 = 5,000
3	**(a)** a public facility	PDS
4	**(c)** development goals can be non-material	Non-income goals
5	**(d)** Human Development Index	Published by UNDP
6	**(b)** 30 crore	90,000 / 3,000 = 30
7	**(b)** Human Development Report	Published by UNDP
8	**(d)** conflicting developmental goals	Different groups affected differently
9	**(d)** halves	Average = income/population
10	**(a)** using resources without considering future needs	Future needs must be met

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	They have high per capita income (1); They are classified so by the World Bank (1).	1+1
12	Distribution of income differs (1); Health, education and environment differ (1).	1+1
13	Some goods like clean air cannot be bought individually (1); Collective provision is cheaper and fairer (1).	1+1
14	Groundwater is replenished by rain (1); Overuse takes out water faster than it is replenished, so water levels fall (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	A: 1,00,000/20 = Rs 5,000 (1); B: 90,000/10 = Rs 9,000 (1); B has higher per capita income (1).	1+1+1
16	Use renewable sources of energy and resources (1); Control the overuse of groundwater (1); Protect the environment from pollution (1).	1+1+1
17	Rural woman may want safety, schooling, wages (1); Urban youth may want jobs, housing (1); Goals depend on circumstances (1).	1+1+1
	OR: The job may offer better security or respect (1); It may be closer to the family (1); Non-income goals can be more important than money to the person (1).	1+1+1
18	Health depends on it (1); It is a collective need (1); Future generations need it (1).	1+1+1
	OR: India is in the lower middle income category (1); Its per capita income is below rich countries (1); Many other indicators also need to be improved (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Strength: it is simple to calculate and allows comparison of countries (1); The World Bank uses it to classify countries (1); Weakness: it hides how income is distributed (1); It ignores health and education (1); It ignores the quality of the environment (1).	1+1+1+1+1
	OR: Improve schools and hospitals (1); Strengthen the Public Distribution System (1); Increase opportunities to earn income (1); Reduce inequality in access to services (1); Protect the environment (1).	1+1+1+1+1
20	The government provides schools and hospitals (1); It runs the Public Distribution System (1); It ensures that the poor have access to basic services (1); It regulates the use of the environment (1); These reduce inequalities in well-being (1).	1+1+1+1+1
	OR: Present use should not harm the future (1); Groundwater is renewable but overused (1); Crude oil is non-renewable (1); Rapid use will exhaust stocks (1); Alternative sources and conservation needed (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.
