ANSWER KEY & MARKING SCHEME SET 1

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** Both A and R are true and R is the correct explanation of A.	Collective needs lie outside private purchase
2	**(d)** infant mortality rate	Fewer infant deaths
3	**(d)** A is false but R is true.	A is false because overuse can exhaust it faster than it is replenished; R is true
4	**(b)** availability does not ensure access for the poor	Distribution matters
5	**(c)** goals are not only about money	Non-income goals matter
6	**(c)** using renewable energy sources	Conserves a non-renewable resource
7	**(a)** Average hides distribution, so we must check how the gains are shared	Averages can be misleading
8	**(a)** Both A and R are true and R is the correct explanation of A.	Exhaustible resource
9	**(a)** Both A and R are true and R is the correct explanation of A.	Because people's situations differ, their goals differ; R explains A.
10	**(a)** Both A and R are true and R is the correct explanation of A.	Total income divided by total population gives the average income per person, which is exactly what per capita income means; R explains A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Income may not reach all (1); Public facilities may be weak (1).	1+1
12	Water table is falling (1); Future needs (1).	1+1
13	Health depends on it (1); Resources for future (1).	1+1
14	Better health facilities (1); Better care for mothers and children (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Beneficiaries get power and irrigation (1); Displaced people lose homes and livelihood (1); Different people have different goals, and the costs fall on some (1).	1+1+1
16	It uses only per capita income (1); It ignores how income is distributed (1); It ignores health, education and the environment (1).	1+1+1
17	Haryana higher income (1); Kerala better social indicators (1); Income does not capture public facilities (1).	1+1+1
	OR: They provide services free or at low cost (1); They reduce the expenses of poor households (1); They raise people's health and education and hence their opportunities (1).	1+1+1
18	HDI includes health and education as well as income (1); Per capita income is simple but narrow (1); HDI gives a more comprehensive picture (1).	1+1+1
	OR: Future generations need resources too (1); Overuse by the present generation harms them (1); Sustainable development protects their needs (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Total Rs 50,000 divided by 5 = Rs 10,000 (1). (ii) Rs 10,000 (1). (iii) No (1). (iv) Averages hide the differences in income between people: the first village has more unequal incomes and some families earn much less than the average, though the averages are equal (2).	1+1+1+2
20	It is published by the UNDP (1); It uses education, health and income (1); It is broader than income alone (1); It still does not capture every aspect such as the environment (1); It is useful for comparing countries (1).	1+1+1+1+1

	OR: Different groups have different goals (1); A dam is an example: it helps some and displaces others (1); Costs and benefits are unevenly spread (1); Affected people should be consulted (1); Compensation and sustainability should guide decisions (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** 1-C, 2-A, 3-D, 4-B	Definitions
2	**(a)** Both A and R are true and R is the correct explanation of A.	Public facilities explain it
3	**(a)** Both A and R are true and R is the correct explanation of A.	Distribution matters
4	**(d)** (i) and (ii) only	Income is not an education indicator
5	**(a)** literacy rate	Higher literacy is better
6	**(c)** includes health and education	It is a composite measure
7	**(c)** A is true but R is false.	A true; R false (Haryana has higher income)
8	**(d)** A is false but R is true.	A false; R true
9	**(c)** A is true but R is false.	A is true. R is false: Kerala does better than Haryana on infant mortality and literacy.
10	**(d)** A is false but R is true.	A is false because income does not show everything. R is true.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	To show conflicting goals (1); Benefits to some and costs to others (1).	1+1
12	Includes health and education (1); Gives a fuller picture (1).	1+1
13	It provides food security to households (1); It makes food available at affordable prices (1).	1+1
14	Individuals cannot buy them alone (1); They benefit all (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	X: 2,40,000 / 30 = Rs 8,000 per person; Y: 1,00,000 / 10 = Rs 10,000 per person (1); Y has the higher per capita income (1); The difference is Rs 2,000 per person (1).	1+1+1
16	A few people may earn very high incomes (1); The majority may earn very little (1); The very high incomes raise the average even though most people are poor (1).	1+1+1
17	A landless labourer wants work and wages while a farmer wants high crop prices (1); A girl may seek freedom and equal opportunity (1); People in rural and urban areas have different needs (1).	1+1+1
	OR: Spending on schools and hospitals raises literacy and health (1); A well-run PDS ensures food for the poor (1); This explains why a state like Kerala has better indicators despite lower income (1).	1+1+1
18	Income and jobs available (1); Schools and health facilities (1); Environment and how equally resources are shared (1).	1+1+1
	OR: Poor do not share (1); Access to services unequal (1); Social tension (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Haryana (1). (ii) Kerala (1). (iii) Bihar (1). (iv) Income alone does not show other aspects of development: Kerala has a lower IMR than Haryana despite its lower income, because money cannot buy all goods and services needed to live well; health and education facilities matter too (2).	1+1+1+2
20	Present needs should be met without harming the future (1); Groundwater is overused in many areas (1); Crude oil is a non-renewable resource (1); Conservation of both is needed (1); Alternative sources of energy should be developed (1).	1+1+1+1+1
	OR: Development is an improvement in the quality of life (1); People have different goals of development (1); It includes income and non-income aspects (1); Public facilities matter (1); It must be sustainable (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 18: **Development (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** fallen	2/3 of the earlier average
2	**(c)** it is developed only in terms of income	Other indicators matter
3	**(b)** (i) and (iii) only	Rich countries have high income
4	**(c)** A is true but R is false.	A true; R false
5	**(b)** (i) and (iii) only	Non-renewable cannot be replenished
6	**(d)** consider all affected persons' goals and compensate/resettle	Goals conflict
7	**(c)** their opportunities and constraints differ	Equal opportunity and freedom matter
8	**(a)** Both A and R are true and R is the correct explanation of A.	Collective provision
9	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true statements about two different reports, but R does not explain A.
10	**(a)** Both A and R are true and R is the correct explanation of A.	Overuse that harms future generations makes sustainability a necessity; R explains A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	They are simple and make comparison easy (1); They hide differences in the distribution of income (1).	1+1
12	High consumption of resources (1); Environmental damage (1).	1+1
13	Poor may get little (1); Inequality hinders well-being (1).	1+1
14	Distribution may be unequal (1); Health, education and environment may be poor (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Stocks of the resource decline (1); Costs of using it rise (1); Future generations may not have enough to meet their needs (1).	1+1+1
16	Resources such as groundwater and crude oil are limited (1); The environment is being damaged (1); Future generations also have needs (1).	1+1+1
17	First increases purchasing power (1); Second improves health and education (1); Both needed (1).	1+1+1
	OR: They improve people's productivity and income (1); They reduce inequality (1); The poor cannot buy them privately, so public provision is needed (1).	1+1+1
18	It includes income, health and education (1); It includes a clean environment and respect (1); Kerala shows that a state with lower income can do well on health and education (1).	1+1+1
	OR: The goals of different groups often conflict (1); Resources are limited (1); Benefits and costs are unevenly shared (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Development that meets present needs without harming the needs of future generations (1). (ii) It is renewable but gets exhausted if used faster than it is replenished (1). (iii) Any one: crude oil, coal, minerals (1). (iv) Falling water levels hurt farmers' output and livelihoods and the environment, so the gains of one group come at the cost of others and of the future (2).	1+1+1+2
20	A landless labourer and a prosperous farmer have different goals (1); A girl's goals can differ from those of her brother (1); Nations differ in resources and needs (1); So the criteria of development vary (1); Hence more than one indicator is needed (1).	1+1+1+1+1

	OR: Improve schools to raise literacy (1); Improve health services (1); Strengthen the PDS (1); Reduce infant mortality (1); Spend public money efficiently on basic services (1).	1+1+1+1+1

Mistakes to avoid:

- Defining development only as **higher income**; the chapter also counts health, education, equal treatment, freedom and sustainability.
- Treating **per capita income** as showing how income is distributed; it is only the **average** (total income / total population) and hides inequality.
- Mixing up the organisations: the **World Bank** classifies countries by income (World Development Report), the **UNDP** publishes the Human Development Report.
- Assuming that higher income means better health and education: **Kerala** has a lower per capita income than Haryana but a lower infant mortality rate (6 vs 28).
- Forgetting that for people the goals differ: what is development for **a rich person** may not be development for **a landless labourer**, and one person's gain may harm another.
- Writing that sustainable development means no use of resources; it means using them so that **future generations** are not deprived.
