(iii) India has educated English-speaking youth and skilled engineers (1). Mistakes to avoid:

- Defining an MNC as any big company; an MNC is one that **owns or controls production in more than one nation**.

- Mixing up **foreign trade** (buying and selling goods across borders) with **foreign investment** (money spent on assets by an MNC in another country).
- Writing that liberalisation means **adding** trade barriers; it means **removing** barriers or restrictions, as India did from about 1991.
- Saying globalisation benefited everyone equally; the chapter shows gains for consumers and some producers but stress for **small producers and workers**.
- Listing only trade as the link between countries: also **investment, technology and the movement of people**.
- Thinking that trade barriers are always bad or only developing countries use them: developed countries also kept them, and the WTO's rules are **not applied fairly**.
