ANSWER KEY & MARKING SCHEME SET 1

Chapter 22: **Sectors of the Indian Economy (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** Rearing cattle for milk	Dairy products come directly from natural resources
2	**(c)** final goods and services	Only final goods and services are counted
3	**(b)** Development of agriculture and industry increasing the demand for transport and trade	More production needs more trade and transport
4	**(c)** people seem employed but are not fully used and some could be withdrawn without a fall in output	Also called disguised unemployment
5	**(a)** organised sector	Registration and rules mark it
6	**(a)** public sector	The government owns it
7	**(a)** secondary sector	Natural product is changed by manufacturing
8	**(a)** Wheat flour bought by a biscuit maker	It is used up in making another good
9	**(b)** information and communication technology	Newer services depend on IT
10	**(b)** agriculture	Too many people work on small farms

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Activities that are carried on to produce goods or provide services (1); They earn a living and add to the national income (1)	1+1
12	The value of all final goods and services produced within a country (1); In a particular year (1)	1+1
13	People appear to be employed but are not fully used (1); Removing some of them would not reduce total output (1)	1+1
14	Primary, secondary and tertiary sectors (1); They are also called agriculture, industrial and service sectors (1)	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Cotton is grown on farms in the primary sector (1); It is spun and woven into cloth in mills of the secondary sector (1); Traders and transporters in the tertiary sector carry and sell the cloth (1)	1+1+1
16	Some services such as software and finance grow fast and pay well (1); Others such as small shops and repair work employ many on low pay (1); The skills required and the security of the jobs differ widely (1)	1+1+1
17	Their pay is low and irregular and jobs are insecure (1); They do not get leave, holidays or benefits (1); Rules exist but are not followed by employers (1)	1+1+1
	OR: Intermediate goods are used up in making final goods (1); Their value is already included in the value of final goods (1); Counting them separately would be double counting and overstate GDP (1)	1+1+1
18	Other sectors have not created enough jobs (1); Agriculture is the main employer, about half of all workers (1); A large number of workers share a small part of national income (1)	1+1+1
	OR: Farmers need timely seeds, credit and marketing outlets (1); Small units need raw materials, finance and markets (1); Without support they cannot earn a fair income (1)	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Primary: use of natural resources directly; e.g. farming, dairy (1); Secondary: natural products changed by manufacturing; e.g. sugar, cloth (1); Tertiary: activities that help others and give services; e.g. transport, banking (1); The three sectors are interdependent (1); Together they make up the economy's total production (1)	1+1+1+1+1
	OR: Registration: organised is registered; unorganised is largely outside government control (1); Jobs: regular in organised, irregular in unorganised (1); Benefits: paid leave, provident fund and gratuity only in organised (1); Rules: laws are followed in organised but ignored in unorganised (1); Examples: government offices and big firms versus casual labour and street vending (1)	1+1+1+1+1

20	GDP is the value of all final goods and services produced in a year (1); Values of the three sectors are added up (1); Intermediate goods are used up in making final goods (1); Adding them would cause double counting (1); A central government ministry collects data and estimates GDP (1)	1+1+1+1+1
	OR: Wages are low and jobs insecure (1); No leave, holidays or benefits are available (1); Rules should be enforced and wages ensured (1); Farmers need credit and marketing support (1); Small units need raw materials, finance and markets (1)	1+1+1+1+1

Mistakes to avoid:

- Mixing up the sectors: **primary** (natural products: agriculture, dairy, fishing, forestry), **secondary** (manufacturing), **tertiary** (services); cotton growing is primary but making cloth from it is secondary.
- Counting **intermediate goods** along with final goods in GDP; this is double counting.
- Saying the tertiary sector employs most people: it produces the most, but **primary** still employs the largest share of workers.
- Confusing **disguised unemployment** (many working, but some surplus, hidden) with open unemployment (no work at all).
- Using 'organised/unorganised' for 'public/private': **organised vs unorganised** is about registration and rules; **public vs private** is about ownership of assets.
- Calling the unorganised sector 'illegal'; it is a sector of small, scattered units where rules are **not followed**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 22: **Sectors of the Indian Economy (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** Jobs are not secure and wages are low	Rules exist but are not followed
2	**(d)** private sector	Owned by private persons or companies
3	**(c)** industrial sector	Manufacturing is its main activity
4	**(c)** double counting	Their value is already in the final good
5	**(b)** Primary sector	Agriculture still employs about half of all workers
6	**(b)** agriculture	Farm work depends on seasons
7	**(d)** organised sector workers	Organised workers get such benefits
8	**(b)** earn profit	Sale of goods and services earns profit
9	**(c)** service sector	It produces services, not goods
10	**(d)** a ministry of the Central Government	Data are collected and estimated centrally

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Counting the value of the same good more than once (1); It happens if intermediate goods are added to the value of final goods (1)	1+1
12	Regular terms of employment and assured work (1); Benefits such as paid leave, provident fund and gratuity (1)	1+1
13	Primary: farming, fishing or dairy (1); Secondary: manufacturing of cloth or sugar (1)	1+1
14	Goods used up in producing other goods and services (1); Example: wheat flour used to make biscuits (1)	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Primary: goods obtained directly from natural resources (1); Secondary: natural products changed into other forms by manufacturing (1); Tertiary: services that help the other sectors and serve people directly (1)	1+1+1
16	A family of five works on two hectares of land and all seem busy (1); Two members could leave without lowering output (1); These two members are under-employed or disguised unemployed (1)	1+1+1
17	Many of them work in the unorganised sector (1); They get low wages and insecure jobs (1); They also face social discrimination, so protection is especially needed (1)	1+1+1
	OR: At first the primary sector was the largest producer (1); With factories the secondary sector became more important (1); In recent decades the tertiary sector has become the largest in many countries (1)	1+1+1
18	Building irrigation so that a second crop can be grown (1); Giving cheap credit and storage facilities (1); Setting up processing and marketing support (1)	1+1+1
	OR: Factories Act and Minimum Wages Act (1); Payment of Gratuity Act (1); Shops and Establishments Act (1)	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Production in all sectors has risen (1); The tertiary sector has grown fastest and is now the largest in GDP (1); The share of employment has not moved in the same way (1); Agriculture still employs about half of all workers (1); This gap shows that too many people depend on a small share of national income (1)	1+1+1+1+1
	OR: Public sector assets are owned by the government; e.g. Indian Railways (1); Private sector assets are owned by individuals or companies; e.g. TISCO, Reliance (1); Public sector aims at welfare of all (1); Private sector works to earn profit (1); The government provides services that private firms may not find profitable (1)	1+1+1+1+1
20	Basic services like hospitals, schools and administration are needed (1); Banks and insurance are needed in a developing economy (1); Growth of agriculture and industry raises demand for transport, trade and storage (1); Higher incomes raise demand for tourism, shopping and eating out (1); IT-based services such as call centres and software have emerged (1)	1+1+1+1+1

	OR: Roads, bridges, ports and dams need huge investment (1); Benefits of these facilities are shared by all (1); It supports farmers through minimum support prices and ration shops (1); It must provide health and education to the poor (1); It looks after backward regions and unprofitable but needed services (1)	1+1+1+1+1

Mistakes to avoid:

- Mixing up the sectors: **primary** (natural products: agriculture, dairy, fishing, forestry), **secondary** (manufacturing), **tertiary** (services); cotton growing is primary but making cloth from it is secondary.
- Counting **intermediate goods** along with final goods in GDP; this is double counting.
- Saying the tertiary sector employs most people: it produces the most, but **primary** still employs the largest share of workers.
- Confusing **disguised unemployment** (many working, but some surplus, hidden) with open unemployment (no work at all).
- Using 'organised/unorganised' for 'public/private': **organised vs unorganised** is about registration and rules; **public vs private** is about ownership of assets.
- Calling the unorganised sector 'illegal'; it is a sector of small, scattered units where rules are **not followed**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 22: **Sectors of the Indian Economy (Economics)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** Hospitals and schools	Hospitals and schools are services
2	**(d)** 2005	It is a law, not just a scheme
3	**(c)** unorganised sector	Work is irregular and has no security
4	**(d)** They need heavy spending and serve the whole society	Common facilities need public investment
5	**(b)** Carrying goods by truck	Transport is a service
6	**(a)** Secondary sector	Industrialisation raised the importance of manufacturing
7	**(c)** tourism and eating-out services	Higher income raises demand for services
8	**(d)** 100 days of wage employment in a year	It is a legal right to work
9	**(a)** Minimum Wages Act	It deals with wages and conditions at work
10	**(d)** minimum support price	It also stocks grain for ration shops

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Low pay and irregular work (1); No paid leave or security; employers can ask workers to leave (1)	1+1
12	Its activities produce services rather than goods (1); It helps the primary and secondary sectors, e.g. transport and banking (1)	1+1
13	Agriculture employs about half of all workers (1); Its share in GDP is much smaller than its share in employment (1)	1+1
14	In the public sector the government owns most assets and provides services (1); In the private sector private individuals or companies own the assets (1)	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Production of all sectors has risen (1); The tertiary sector has grown fastest (1); It has become the largest producing sector, replacing the primary sector (1)	1+1+1
16	Small-scale industries and food processing (1); Tourism and education (1); Health services and IT-related work (1)	1+1+1
17	They need very large sums of money (1); They benefit the whole society and users cannot be charged individually (1); Private firms may not invest where returns are low (1)	1+1+1
	OR: Basic services like hospitals, schools and banks are needed (1); Growth of agriculture and industry raises demand for transport and trade (1); Rising incomes and new IT-based services increase demand (1)	1+1+1
18	It guarantees 100 days of wage employment a year to a rural household (1); An unemployment allowance is given if work is not provided (1); Work done should create lasting assets such as roads and ponds (1)	1+1+1
	OR: It pays a minimum support price so that farmers get a fair income (1); It stocks the grain for ration shops (1); This helps poor consumers get food at affordable prices (1)	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Many workers on small farms are not fully used (1); Irrigation can allow a second crop and more work (1); Cheap credit and storage help farmers (1); Small industries and services create jobs nearby (1); Tourism, education and IT can create more jobs (1)	1+1+1+1+1
	OR: Organised jobs have fixed terms and assured work (1); They offer provident fund, gratuity, leave and medical benefits (1); Unorganised jobs are insecure and low-paid (1); Too few organised jobs exist for all job seekers (1); Poor people take any available work to earn a living (1)	1+1+1+1+1
20	It makes work a legal right for rural households (1); Each household gets 100 days of wage employment in a year (1); The government must pay an unemployment allowance if work is not given (1); Work should build lasting assets such as roads, canals and ponds (1); It aims to reduce poverty and rural distress (1)	1+1+1+1+1

	OR: Transport carries farm produce and factory goods (1); Banks give credit to farmers and industrialists (1); Trade sells their products to consumers (1); Storage and warehousing keep goods safe (1); A fall in production reduces demand for such services (1)	1+1+1+1+1

Mistakes to avoid:

- Mixing up the sectors: **primary** (natural products: agriculture, dairy, fishing, forestry), **secondary** (manufacturing), **tertiary** (services); cotton growing is primary but making cloth from it is secondary.
- Counting **intermediate goods** along with final goods in GDP; this is double counting.
- Saying the tertiary sector employs most people: it produces the most, but **primary** still employs the largest share of workers.
- Confusing **disguised unemployment** (many working, but some surplus, hidden) with open unemployment (no work at all).
- Using 'organised/unorganised' for 'public/private': **organised vs unorganised** is about registration and rules; **public vs private** is about ownership of assets.
- Calling the unorganised sector 'illegal'; it is a sector of small, scattered units where rules are **not followed**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
