## ANSWER KEY & MARKING SCHEME SET 1

Chapter 22: **Sectors of the Indian Economy (Economics)** | Class 10 Social Science | Maximum Marks: 40

### SECTION — A (Objective Type) — Answers — 10 × 1 = 10

| Q. | Correct Option | Brief Reasoning |
|---|---|---|
| 1 | **(a)** primary and secondary sectors | Milk is natural produce; butter is processed |
| 2 | **(c)** Rs 90,000 | Only the final value of Rs 90,000 is counted |
| 3 | **(d)** agriculture workers earn a small share of national income | Many workers share a small part of GDP |
| 4 | **(b)** 2 | 6 minus 4 |
| 5 | **(c)** A clerk in a government office | Regular government jobs are organised |
| 6 | **(d)** who owns and runs them | Ownership separates public and private |
| 7 | **(c)** tertiary sector | Trade is a service |
| 8 | **(d)** Rs 15,000 | 55,000 minus 40,000 |
| 9 | **(b)** A call centre | IT-based services are recent |
| 10 | **(d)** lets farmers grow more crops and gives labour work | More crops need more labour |

### SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 11 | Silk farm is primary (1); Weaving unit is secondary and the shop is tertiary (1) | 1+1 |
| 12 | Manufacturing makes more goods than hand production (1); Natural products are converted into more valuable goods (1) | 1+1 |
| 13 | Building ponds or wells (1); Constructing roads or canals (1) | 1+1 |
| 14 | Each sector uses outputs of the others (1); Tractors from factories are used in farms, and traders sell farm produce (1) | 1+1 |

### SECTION — C (Short Answer) — Answers — 4 × 3 = 12

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 15 | Poultry farm: primary, uses natural resources (1); Sweet factory: secondary, manufacturing (1); Courier service: tertiary, a service (1) | 1+1+1 |
| 16 | Seasonal: no work for some months after harvest (1); Disguised: all work all year but some are not needed (1); Example: fewer farm jobs in dry season versus five members on a small field needing three (1) | 1+1+1 |
| 17 | Timely supply of seeds and credit at fair rates (1); Storage and marketing facilities (1); Fair prices for their crops (1) | 1+1+1 |
| | **OR:** Factories get less raw material such as cotton and sugarcane (1); Less farm produce means lower demand for transport and trade (1); Farmers' lower income reduces their demand for goods and services (1) | 1+1+1 |
| 18 | Small plots cannot keep all family members fully employed (1); Farm work is seasonal (1); Off-farm work such as small industry gives steady income (1) | 1+1+1 |
| | **OR:** Organised units are registered (1); They keep records and are inspected (1); Unorganised units are small, scattered and unregistered (1) | 1+1+1 |

### SECTION — D (Long Answer) — Answers — 2 × 5 = 10

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 19 | Primary sector: farming, dairy, mining (1); Secondary sector: textile, sugar, steel (1); Tertiary sector: transport, banking, teaching (1); Cotton grown, spun into cloth and sold shows the link (1); A change in one sector affects the others (1) | 1+1+1+1+1 |
| | **OR:** Organised: registered and follows rules (1); Unorganised: small and scattered, outside control (1); Organised workers get job security and benefits (1); Unorganised workers have low wages and no benefits (1); Rules should be enforced and credit and marketing support given (1) | 1+1+1+1+1 |
| 20 | GDP contribution = Rs 90,000 (final value); Value added by farmer = Rs 40,000 (taking no intermediate input); Value added by mill = 55,000 - 40,000 = Rs 15,000 (1); Value added by biscuit maker = 90,000 - 55,000 = Rs 35,000 (1); Sum 40,000 + 15,000 + 35,000 = Rs 90,000; counting all sales (1,85,000) would be double counting (1) | 1+1+1+1+1 |

| | | |
|---|---|---|
| | **OR:** No assured work or fixed hours (1); Employer can end work without reason (1); No leave, provident fund or gratuity (1); Example: casual labourers and street vendors (1); Rules exist but are not followed (1) | 1+1+1+1+1 |

**Mistakes to avoid:**

- Mixing up the sectors: **primary** (natural products: agriculture, dairy, fishing, forestry), **secondary** (manufacturing), **tertiary** (services); cotton growing is primary but making cloth from it is secondary.
- Counting **intermediate goods** along with final goods in GDP; this is double counting.
- Saying the tertiary sector employs most people: it produces the most, but **primary** still employs the largest share of workers.
- Confusing **disguised unemployment** (many working, but some surplus, hidden) with open unemployment (no work at all).
- Using 'organised/unorganised' for 'public/private': **organised vs unorganised** is about registration and rules; **public vs private** is about ownership of assets.
- Calling the unorganised sector 'illegal'; it is a sector of small, scattered units where rules are **not followed**.

**Evaluator's note:** Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

## ANSWER KEY & MARKING SCHEME SET 2

Chapter 22: **Sectors of the Indian Economy (Economics)** | Class 10 Social Science | Maximum Marks: 40

### SECTION — A (Objective Type) — Answers — 10 × 1 = 10

| Q. | Correct Option | Brief Reasoning |
|---|---|---|
| 1 | **(a)** unorganised sector | No security of job |
| 2 | **(a)** Building roads in remote villages | Private firms avoid low-profit work |
| 3 | **(a)** secondary sector | Clay is turned into pots by manufacturing |
| 4 | **(c)** Rs 50,000 | Final value only |
| 5 | **(a)** many services such as small shops pay low wages | Some services employ many people at low pay |
| 6 | **(c)** Rs 25,000 | 100 times 250 |
| 7 | **(b)** Rules exist but are not enforced and pay is low | Workers are vulnerable |
| 8 | **(d)** protect farmers from low market prices | It assures farmers a fair price |
| 9 | **(d)** Forestry - primary sector | Forestry uses natural resources directly |
| 10 | **(a)** Steel is an intermediate good whose value is part of the car | Avoids double counting |

### SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 11 | Some services employ many people on low pay (1); Only some such as software and finance pay well (1) | 1+1 |
| 12 | Unorganised sector (1); Jobs are insecure and rules are not followed (1) | 1+1 |
| 13 | Value added = value of output minus intermediate goods (1); 30,000 - 20,000 = Rs 10,000 (1) | 1+1 |
| 14 | Workers needed = 5 (1); Disguised unemployed = 7 - 5 = 2 (1) | 1+1 |

### SECTION — C (Short Answer) — Answers — 4 × 3 = 12

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 15 | GDP contribution is the final value Rs 12,000 (1); Value added: farmer 5,000, mill 2,000 (1); Value added by bakery 5,000; the total of 12,000 matches the final value (1) | 1+1+1 |
| 16 | Tourism creates work for guides, hotels and transport (1); Schools and training centres need teachers and staff (1); Both raise local income and demand for other services (1) | 1+1+1 |
| 17 | Employers hire workers on a temporary or contract basis (1); Such workers get no leave or provident fund (1); The job offers no security, as in the unorganised sector (1) | 1+1+1 |
| | **OR:** GDP = 600 + 1,000 + 2,400 = Rs 4,000 crore (1); Share of tertiary = 2,400/4,000 (1); = 60 per cent (1) | 1+1+1 |
| 18 | Households get 100 days of paid work (1); Allowance if work is not provided (1); Assets such as roads and ponds benefit the whole village (1) | 1+1+1 |
| | **OR:** Many poor families cannot pay market prices (1); Private providers go where profit is high (1); Government provides services at low cost for the welfare of all (1) | 1+1+1 |

### SECTION — D (Long Answer) — Answers — 2 × 5 = 10

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 19 | All sectors have grown (1); Tertiary is the fastest growing and the largest (1); Basic services such as schools, hospitals and banks are needed (1); Growth of farming and industry raises demand for transport and trade (1); Rising incomes and IT-based services add to demand (1) | 1+1+1+1+1 |
| | **OR:** Provides common facilities such as roads and dams (1); Runs railways and post offices (1); Supports farmers through minimum support prices (1); Provides health and education at low cost (1); Looks after backward areas (1) | 1+1+1+1+1 |
| 20 | Agriculture still employs about half of workers (1); Industry and services have not created enough jobs (1); Agriculture has under-employment (1); Productivity and incomes in farming remain low (1); Income inequality between sectors is large (1) | 1+1+1+1+1 |

| | | |
|---|---|---|
| | **OR:** Public sector: government owned, aims at welfare (1); Private sector: privately owned, aims at profit (1); Examples: Indian Railways and TISCO (1); Public sector provides services private firms avoid (1); Private sector brings investment and many goods and jobs (1) | 1+1+1+1+1 |

**Mistakes to avoid:**

- Mixing up the sectors: **primary** (natural products: agriculture, dairy, fishing, forestry), **secondary** (manufacturing), **tertiary** (services); cotton growing is primary but making cloth from it is secondary.
- Counting **intermediate goods** along with final goods in GDP; this is double counting.
- Saying the tertiary sector employs most people: it produces the most, but **primary** still employs the largest share of workers.
- Confusing **disguised unemployment** (many working, but some surplus, hidden) with open unemployment (no work at all).
- Using 'organised/unorganised' for 'public/private': **organised vs unorganised** is about registration and rules; **public vs private** is about ownership of assets.
- Calling the unorganised sector 'illegal'; it is a sector of small, scattered units where rules are **not followed**.

**Evaluator's note:** Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

## ANSWER KEY & MARKING SCHEME SET 3

Chapter 22: **Sectors of the Indian Economy (Economics)** | Class 10 Social Science | Maximum Marks: 40

### SECTION — A (Objective Type) — Answers — 10 × 1 = 10

| Q. | Correct Option | Brief Reasoning |
|---|---|---|
| 1 | **(b)** The tertiary sector produces the most, the primary sector employs the most | A gap between production and employment exists |
| 2 | **(a)** Building a village pond | It should create durable assets |
| 3 | **(a)** organised sector | It follows government rules |
| 4 | **(c)** Returns are low there | Profit motive |
| 5 | **(b)** depend on each other | Tractors are used in farming |
| 6 | **(c)** more final goods and services are produced | More production raises GDP |
| 7 | **(c)** rising incomes | Higher incomes raise demand for services |
| 8 | **(d)** Few other jobs are available to them | Alternative employment is limited |
| 9 | **(c)** Employer can end a job without reason | Job security is a feature of organised work |
| 10 | **(b)** They serve the whole country and need heavy investment | Infrastructure serves the public |

### SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 11 | They give regular pay and job security (1); They offer benefits like provident fund and leave (1) | 1+1 |
| 12 | Seeds are used up in producing the crop (1); Their value is included in the value of the crop (1) | 1+1 |
| 13 | A second crop can be grown in the dry season (1); Farm work then continues in more months (1) | 1+1 |
| 14 | To help poor families buy food at affordable prices (1); Grain is bought from farmers at minimum support price (1) | 1+1 |

### SECTION — C (Short Answer) — Answers — 4 × 3 = 12

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 15 | Production in services has grown very rapidly (1); Many services need few skilled workers (1); Agriculture still employs about half of workers (1) | 1+1+1 |
| 16 | Factory tailor: organised, regular pay and benefits (1); Roadside tailor: unorganised, irregular income (1); He has no leave or security and is not covered by labour laws (1) | 1+1+1 |
| 17 | It buys wheat and rice at a minimum support price (1); It stores the grain (1); It sells it at affordable prices through ration shops (1) | 1+1+1 |
| | **OR:** New services like call centres and software have emerged (1); ATMs and online services have made banking easier (1); Such services create new kinds of jobs (1) | 1+1+1 |
| 18 | There are too few organised jobs (1); Many workers lack the education required for such jobs (1); They need an income immediately (1) | 1+1+1 |
| | **OR:** Railways in remote areas are not profitable (1); Irrigation dams need heavy investment and benefit many (1); So the government invests for public welfare (1) | 1+1+1 |

### SECTION — D (Long Answer) — Answers — 2 × 5 = 10

| Q. | Expected Answer / Value Points | Marks |
|---|---|---|
| 19 | People seem employed but are not fully used (1); A farm family of five on two hectares needing only three (1); Irrigation facilities for more crops (1); Cheap credit, storage and marketing (1); Small industries, services and rural works (1) | 1+1+1+1+1 |
| | **OR:** They need huge investment (1); Returns come slowly (1); Benefits go to many people and cannot be priced easily (1); Private firms look for quick profits (1); Government must ensure development for all (1) | 1+1+1+1+1 |
| 20 | 100 days of work a year to rural households (1); Unemployment allowance if work is not given (1); Work in drought can include ponds and water conservation (1); It gives income when farm work is scarce (1); Assets built help the village in future (1) | 1+1+1+1+1 |

| | | |
|---|---|---|
| | **OR:** Transport carries produce to markets (1); Banks lend to farmers and industrialists (1); Storage protects crops and goods (1); Trade connects producers and consumers (1); Communication helps in decisions (1) | 1+1+1+1+1 |

**Mistakes to avoid:**

- Mixing up the sectors: **primary** (natural products: agriculture, dairy, fishing, forestry), **secondary** (manufacturing), **tertiary** (services); cotton growing is primary but making cloth from it is secondary.
- Counting **intermediate goods** along with final goods in GDP; this is double counting.
- Saying the tertiary sector employs most people: it produces the most, but **primary** still employs the largest share of workers.
- Confusing **disguised unemployment** (many working, but some surplus, hidden) with open unemployment (no work at all).
- Using 'organised/unorganised' for 'public/private': **organised vs unorganised** is about registration and rules; **public vs private** is about ownership of assets.
- Calling the unorganised sector 'illegal'; it is a sector of small, scattered units where rules are **not followed**.

**Evaluator's note:** Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
