THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SOCIAL SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 2

Chapter 1: **Locating Places on the Earth** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Time is ahead in places 1

(a) west of Greenwich **(b)** at the Equator
(c) east of Greenwich **(d)** at the poles

2. Which direction is opposite to south-east? 1

(a) north-west **(b)** east **(c)** south-west **(d)** north-east

3. A school is to the north-east of a park. The park is to the 1

(a) south-west of the school **(b)** north-west
(c) north-east **(d)** south-east

4. The parallels of latitude become smaller away from the Equator because 1

(a) the Sun is far **(b)** the Earth is a cylinder
(c) the Earth is round **(d)** the Earth is flat

5. Why is 1 degree of latitude about the same distance everywhere? 1

(a) parallels are equally spaced **(b)** the Earth is square
(c) they differ greatly **(d)** the Earth is flat

6. Why is a globe better than a map for showing shapes of continents? 1

(a) it is also spherical so there is no distortion
(b) it is big
(c) it is flat
(d) it is cheap

7. Meridians of longitude are all of equal length because 1

(a) they are curves of different size **(b)** they are half circles from pole to pole
(c) they are lines **(d)** they are circles

8. A traveller moves from 0 degrees longitude to 15 degrees E. Her watch should be set 1

(a) 1 hour ahead **(b)** the same **(c)** 15 hours ahead **(d)** 1 hour behind

9. Why are maps useful even though they distort a sphere? 1

(a) they are easy to carry and show detail **(b)** they are round
(c) they are heavy **(d)** they are accurate

10. Which map would you use to see the rainfall of India? 1

(a) a thematic map **(b)** a political map
(c) a sketch of your school **(d)** a globe only

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. What is a thematic map? 2

12. Why can't we see the whole Earth on a map in true shape? 2

13. What is the use of the key of a map? 2

14. What do the Equator and Prime Meridian form? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. A student is facing north. Describe the directions to her left, right and back. 3

16. Explain how the ancient Indian prime meridian reflects India's astronomy. 3

17. Explain why maps are updated regularly. 3

OR

Explain how time varies with longitude. 3

18. Describe how an atlas is used to find a place. 3

OR

Explain the importance of directions in daily life. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain how the rotation of the Earth leads to time differences, with a worked example. 5

OR

Solve and explain: A distance of 9 cm on a map is 45 km. Find the scale and the distance for 14 cm. 5

20. Differentiate between a map and a globe and describe the merits of each. 5

OR

Explain how the Equator and Prime Meridian divide the Earth into four parts and give examples. 5

END OF QUESTION PAPER — Total: 40 Marks
