THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 8: **Life Processes in Animals** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. In body tissues, blood gains: 1

(a) carbon dioxide **(b)** oxygen **(c)** amylase **(d)** bile

2. After heavy exercise, muscles ache because: 1

(a) blood clots
(b) muscles are cold
(c) water is lost
(d) partial breakdown of glucose without oxygen forms lactic acid

3. An athlete's resting pulse is 60 per minute and a normal person's is 72. The athlete's heart: 1

(a) is weaker **(b)** beats more
(c) is smaller **(d)** beats less often but pumps more per beat

4. Urea is formed in the: 1

(a) stomach **(b)** lung **(c)** kidney **(d)** liver

5. The correct sequence for the flow of blood in a human from the heart is: 1

(a) capillaries, arteries
(b) arteries, heart, veins
(c) heart, veins, capillaries, arteries
(d) heart, aorta, arteries, capillaries, veins, heart

6. Which of the following correctly lists the blood vessels in order of size from the heart outward? 1

(a) aorta, arteries, capillaries **(b)** veins, capillaries
(c) capillaries, arteries, aorta **(d)** arteries, aorta, capillaries

7. Urine contains mainly: 1

(a) water, urea and salts **(b)** proteins
(c) sugar **(d)** blood cells

8. In a kidney failure patient, dialysis is used to: 1

(a) remove wastes from blood **(b)** add oxygen
(c) digest food **(d)** add bile

9. Total length of the small intestine in an adult is about: 1

(a) 60 m **(b)** 60 cm **(c)** 6 to 7 m **(d)** 1 m

10. Which part of the digestive system is not involved in breaking food chemically? 1

(a) stomach **(b)** pancreas **(c)** small intestine **(d)** teeth

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is it unhealthy to eat very hot or very spicy food regularly? 2

12. Why is it not advisable to swim just after a heavy meal? 2

13. Explain why blood must circulate continuously. 2

14. What is the difference between aerobic and anaerobic respiration? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain why a long-distance runner takes deep breaths. 3

16. Explain the term 'balanced circulation' with a mention of oxygen-rich and oxygen-poor blood. 3

17. Suggest reasons for the breathlessness of a person with low haemoglobin. 3

OR

Compare the digestion in the stomach and in the small intestine with pH conditions. 3

18. How does the structure of a capillary suit its function? 3

OR

Explain why we should not eat food from open stalls in rainy season. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Evaluate the diets of a herbivore and carnivore with respect to teeth, stomach and intestine. 5

OR

Discuss the health problems of the digestive system (acidity, ulcers, constipation, diarrhoea) and their prevention. 5

20. A patient's blood test shows low haemoglobin and low white cell count. Discuss possible effects and suggest remedies. 5

OR

Explain the energy changes in the body from the food we eat to the energy used in activity. 5

END OF QUESTION PAPER Total: 40 Marks
