THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 2

Chapter 9: **Life Processes in Plants** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A plant wilts when it loses more water than it absorbs. This is because: 1

(a) it grows **(b)** it gets more light
(c) cells lose turgidity **(d)** it makes more food

2. In lichen, the alga: 1

(a) makes food by photosynthesis **(b)** attacks the fungus
(c) fixes nitrogen **(d)** gives shelter

3. Plants kept in sunlight release bubbles of oxygen in water. A hydrilla plant in a funnel shows: 1

(a) bubbles only in dark **(b)** more bubbles in sunlight
(c) no bubbles **(d)** constant bubbles

4. Plants that grow in deserts have fewer stomata or spines to: 1

(a) increase light **(b)** reduce water loss
(c) increase CO2 **(d)** increase food

5. In lichen, the fungus: 1

(a) makes food **(b)** gives shelter and absorbs water
(c) eats insects **(d)** makes oxygen

6. The volume of oxygen released increases with: 1

(a) more light **(b)** less CO2 only **(c)** no light **(d)** cold only

7. Which of these helps a tall tree to lift water to the top? 1

(a) gravity **(b)** wind only
(c) transpiration pull **(d)** pumping by heart

8. Which of the following is an example of mutual benefit? 1

(a) mushroom and wood **(b)** Cuscuta and host
(c) Rhizobium and pea plant **(d)** pitcher plant and insect

9. Which of the following is not required for photosynthesis? 1

(a) oxygen **(b)** water **(c)** sunlight **(d)** carbon dioxide

10. Stomata mostly close at night because: 1

(a) no air **(b)** no roots
(c) no water **(d)** no photosynthesis and water is saved

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why does Cuscuta not need chlorophyll? 2

12. Explain why plants growing in water-logged soil may die. 2

13. How does the removal of chlorophyll before the iodine test help? 2

14. Why do plants release carbon dioxide at night? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how the pitcher plant is adapted for trapping insects. 3

16. Write the role of starch in a seed. 3

17. Explain how roots respire. 3

OR

Compare parasitic and saprotrophic nutrition with examples. 3

18. Explain why plants growing in shade have larger leaves. 3

OR

Why is it better to water plants in the morning? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the movement of water from soil to leaf and then to the atmosphere. 5

OR

Describe how plants can be grown with less water and what they teach about stomata. 5

20. Explain how nitrogen cycle links the atmosphere, bacteria, plants and animals. 5

OR

Explain the storage of food in different plant parts with examples. 5

END OF QUESTION PAPER — Total: 40 Marks
