CLASS 7 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 3

Chapter 11: **Earth, Moon and the Sun** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The lunar eclipse is visible: 1

(a) only in the day **(b)** only in India
(c) only at the poles **(d)** wherever the Moon is above the horizon

2. The Sun appears to be directly overhead at the Tropic of Cancer on: 1

(a) 23 September **(b)** 22 December **(c)** 21 June **(d)** 21 March

3. The time from one full moon to the next is about: 1

(a) 365 days **(b)** 27 days **(c)** 7 days **(d)** 29.5 days

4. A solar eclipse can occur only at new moon, but not every new moon because: 1

(a) the Moon's orbit is tilted **(b)** the Sun hides
(c) the Earth tilts **(d)** the Moon stops

5. The Sun is directly overhead at the Tropic of Capricorn on: 1

(a) 21 June **(b)** 23 September **(c)** 22 December **(d)** 21 March

6. The Moon rotates on its axis once in about: 1

(a) 60 days **(b)** 1 day **(c)** 365 days **(d)** 27 days

7. During a solar eclipse, it becomes: 1

(a) windy **(b)** dark in the day **(c)** brighter **(d)** hotter

8. The Sun is directly overhead at the equator on: 1

(a) 1 January **(b)** 15 August **(c)** solstices **(d)** equinoxes

9. The Moon's gravity is smaller since: 1

(a) it is cold **(b)** its mass is less
(c) it has an atmosphere **(d)** it is far

10. Animals are confused during a solar eclipse because: 1

(a) sudden darkness **(b)** sound **(c)** heat **(d)** cold

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is Sun's light needed for Moon's phases? 2

12. Explain why a solar eclipse is seen only from a small region. 2

13. Why do we have a calendar with leap years? 2

14. Why does the Pole star not move? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. Why is the Moon visible during the day sometimes? 3

16. Why does the Moon look red in a total lunar eclipse? 3

17. Explain why we cannot feel the Earth rotating. 3

OR

Explain why the Earth is slightly warmer in January in the southern hemisphere though it is closest to the Sun then. 3

18. Explain the Indian lunar calendar and festivals based on Moon phases. 3

OR

Explain how the Earth's tilt would change the climate if it were 0°. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Discuss the effect of Earth's rotation and revolution on time, calendar and agriculture. 5

OR

Explain how the length of the day changes through the year for a place at 28° N. 5

20. Explain with data why Mumbai and Srinagar differ in day length in June and December. 5

OR

Explain why a total solar eclipse is a rare sight at one place. 5

END OF QUESTION PAPER Total: 40 Marks
