THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE · EASY LEVEL CHAPTER TEST SET 2

Chapter 10: **Light: Mirrors and Lenses** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Easy level: direct, single-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A concave lens makes rays: 1

(a) diverge **(b)** converge **(c)** stop **(d)** stay parallel

2. An object 5 cm from a plane mirror has its image at: 1

(a) 5 cm behind the mirror **(b)** at the mirror
(c) 10 cm behind **(d)** 5 cm in front

3. Plane mirror image size is: 1

(a) smaller **(b)** zero **(c)** equal to object **(d)** bigger

4. A magnifying glass is a: 1

(a) prism **(b)** plane mirror **(c)** convex lens **(d)** concave lens

5. Rough surface gives: 1

(a) diffuse reflection **(b)** regular reflection
(c) refraction **(d)** no reflection

6. A mirror with a flat surface is: 1

(a) curved **(b)** concave **(c)** plane **(d)** convex

7. Spectacles for short-sightedness use: 1

(a) plane glass **(b)** convex lens **(c)** concave lens **(d)** prism

8. Smooth surface gives: 1

(a) regular reflection **(b)** diffuse reflection
(c) absorption **(d)** dispersion

9. The mirror that converges light is: 1

(a) convex **(b)** plane **(c)** concave **(d)** none

10. Camera has a: 1

(a) prism only **(b)** concave mirror only
(c) convex lens **(d)** plane mirror only

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Name two types of spherical mirrors. 2

12. Name two uses of convex lenses. 2

13. What is a normal? 2

14. Name two types of lenses. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. State three uses of concave mirrors. 3

16. Find the radius if f = 12 cm. 3

17. Why can't we see an image in a rough wall? 3

OR

State three uses of convex mirrors. 3

18. Differentiate between a real and a virtual image (three points). 3

OR

How can the focal length of a convex lens be found roughly? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Compare concave and convex mirrors with uses. 5

OR

Describe the terms: pole, centre of curvature, principal axis, focus, focal length. 5

20. Describe how a kaleidoscope works. 5

OR

Explain the use of mirrors in vehicles and in shops. 5

END OF QUESTION PAPER — Total: 40 Marks
