THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE · EASY LEVEL CHAPTER TEST SET 3

Chapter 5: **Describing Motion Around Us** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Easy level: direct, single-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The equation v = u + at gives v when u = 0, a = 2 and t = 3: 1

(a) 6 m/s **(b)** 3 m/s **(c)** 5 m/s **(d)** 2 m/s

2. A body at rest has speed: 1

(a) zero **(b)** 10 m/s **(c)** 100 m/s **(d)** 1 m/s

3. A freely falling body starts with velocity: 1

(a) 10 m/s **(b)** zero **(c)** equal to g **(d)** infinite

4. The retardation is: 1

(a) distance **(b)** positive acceleration

(c) speed **(d)** negative acceleration

5. A car moving at constant speed on a straight road has acceleration: 1

(a) positive **(b)** negative **(c)** infinite **(d)** zero

6. A body thrown upward has velocity zero at: 1

(a) never **(b)** the start

(c) the highest point **(d)** the ground

7. If velocity is constant, the v-t graph is: 1

(a) a curve **(b)** a horizontal line

(c) a vertical line **(d)** a sloping line

8. The slope of an s-t graph gives: 1

(a) force **(b)** speed **(c)** mass **(d)** acceleration

9. In circular motion at uniform speed, velocity is: 1

(a) constant **(b)** zero **(c)** same direction **(d)** changing

10. If a body is at rest, the s-t graph is: 1

(a) a sloping line **(b)** a horizontal line

(c) a vertical line **(d)** a curve

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. What is g? State its value. 2

12. Define velocity. 2

13. Write the first equation of motion. 2

14. What is the displacement after one full circle? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. A car at 10 m/s accelerates at 2 m/s squared for 5 s. Find the final velocity. 3

16. State the nature of the v-t graph for 3
(a) uniform velocity
(b) uniform acceleration
(c) retardation.

17. A train of 100 m crosses a pole in 5 s. Find its speed. 3

OR

A body starts from rest with an acceleration of 2 m/s squared. Find the distance in 5 s. 3

18. Give three examples of uniform circular motion. 3

OR

Write the SI units of distance, speed, acceleration. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain the graphs for rest, uniform velocity and acceleration. 5

OR

A boy runs 400 m around a circular track of radius 63.7 m in 100 s. Find the speed and the displacement after one round. 5

20. Explain uniform circular motion. 5

OR

State five differences between scalars and vectors with examples. 5

END OF QUESTION PAPER — **Total: 40 Marks**

MASTERMIND
