THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 1

Chapter 10: **Tissues in Action** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A group of similar cells performing a specific function is called a: 1

(a) organism **(b)** tissue **(c)** organ **(d)** organelle

2. The tissue that makes the husk of a coconut is the: 1

(a) parenchyma **(b)** collenchyma **(c)** phloem **(d)** sclerenchyma

3. Animal tissue that covers or lines the body surfaces is: 1

(a) nervous tissue **(b)** epithelial tissue
(c) muscular tissue **(d)** connective tissue

4. Muscles attached to bones and used in running and writing are: 1

(a) smooth muscles **(b)** striated (voluntary) muscles
(c) cardiac muscles **(d)** none

5. The tissue responsible for the growth of plants is the: 1

(a) nervous tissue **(b)** epithelial tissue
(c) permanent tissue **(d)** meristematic tissue

6. Water and minerals are conducted upward in plants by the: 1

(a) collenchyma **(b)** parenchyma **(c)** xylem **(d)** phloem

7. The epithelium lining the blood vessels and alveoli is: 1

(a) cuboidal epithelium **(b)** columnar epithelium
(c) squamous epithelium **(d)** ciliated epithelium

8. Muscles in the walls of the intestine are: 1

(a) smooth (involuntary) muscles **(b)** cardiac muscles
(c) striated muscles **(d)** none

9. Grass regrows after being cut because of the: 1

(a) intercalary meristem **(b)** lateral meristem
(c) apical meristem **(d)** cork cambium

10. Food is transported to different parts of the plant by the: 1

(a) epidermis **(b)** phloem **(c)** cork **(d)** xylem

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. What is a tissue? Why do multicellular organisms need tissues? 2

12. Differentiate between xylem and phloem in function. 2

13. State the functions of the epithelial tissue. 2

14. Differentiate between meristematic and permanent tissues. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain with an activity how roots grow at their tips. 3

16. Describe the structure of a neuron with a labelled description. 3

17. Differentiate between voluntary and involuntary muscles with examples. 3

OR

Describe the structure and functions of the epidermis in a leaf and in a root. 3

18. List three types of epithelial tissue with their location and function. 3

OR

What is meant by lignin and where is it found? What does it do? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the meristematic tissues: types, location and functions with the way they differ from permanent tissues. 5

OR

Describe the muscular tissue with the three types, structure and function of each in a table of five points. 5

20. Describe the simple permanent tissues with structure and function: parenchyma, collenchyma and sclerenchyma. 5

OR

Describe the nervous tissue and the structure of a neuron with the path of an impulse. 5

END OF QUESTION PAPER — Total: 40 Marks
