THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 3

Chapter 10: **Tissues in Action** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The outermost protective layer in young plants is the: 1

(a) epidermis **(b)** cork **(c)** phloem **(d)** xylem

2. Stomata are surrounded by: 1

(a) cork cells **(b)** companion cells **(c)** fibres **(d)** guard cells

3. Ciliated epithelium is found in the: 1

(a) stomach **(b)** respiratory tract
(c) skin **(d)** bones

4. The joint between the skull and the first vertebra, which lets us turn the head side to side, is a: 1

(a) fixed joint **(b)** hinge joint
(c) pivot joint **(d)** ball and socket joint

5. Cork is formed by the activity of the: 1

(a) intercalary meristem **(b)** apical meristem
(c) vascular cambium **(d)** cork cambium

6. Stomata help in: 1

(a) conduction of water **(b)** protection only
(c) storage **(d)** exchange of gases and transpiration

7. Tissue that connects, supports and binds other tissues is: 1

(a) connective tissue **(b)** muscular tissue
(c) epithelial tissue **(d)** nervous tissue

8. The knee and elbow are: 1

(a) ball and socket joints **(b)** hinge joints
(c) fixed joints **(d)** pivot joints

9. Parenchyma with air spaces helping aquatic plants float is called: 1

(a) chlorenchyma **(b)** sclerenchyma **(c)** aerenchyma **(d)** collenchyma

10. The waxy layer on the epidermis is the: 1

(a) cork **(b)** xylem **(c)** cambium **(d)** cuticle

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is cork formed in older stems? State its function. 2

12. Differentiate between parenchyma and collenchyma. 2

13. Compare bone and cartilage. 2

14. What is the function of a neuron? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Compare the three types of simple permanent tissue. 3

16. Describe the types of joints with one example each. 3

17. Name the tissues present in the stem of a plant from outside to inside in a young dicot stem. 3

OR

Differentiate between the three types of muscle tissue. 3

18. State three functions of the connective tissue. 3

OR

State three differences between plant and animal tissues. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the epithelial tissues of the animal body with types, structure, location and function. 5

OR

Compare plant and animal tissues in a table of five points with examples. 5

20. Describe the connective tissues: blood, bone, cartilage, ligament, tendon, areolar and adipose, with function. 5

OR

Explain how the structure of the xylem, phloem, epidermis and root hairs suits their functions. 5

END OF QUESTION PAPER — Total: 40 Marks
