THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 2

Chapter 12: **Reproduction: How Life Continues** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The cell formed by fusion of gametes is the: 1

(a) zygote **(b)** gamete **(c)** seed **(d)** spore

2. Fertilisation in humans takes place in the: 1

(a) ovary **(b)** oviduct (fallopian tube)
(c) uterus **(d)** vagina

3. Hydra reproduces by: 1

(a) budding **(b)** seeds **(c)** spore formation **(d)** binary fission

4. The ovary contains: 1

(a) pollen **(b)** sepals **(c)** ovules **(d)** nectar

5. The seed germinates when it gets: 1

(a) only light **(b)** water, air and suitable temperature
(c) only soil **(d)** only fertiliser

6. The fertilised egg gets implanted in the: 1

(a) oviduct **(b)** uterus **(c)** ovary **(d)** vagina

7. Moulds on bread reproduce by: 1

(a) seeds **(b)** spores **(c)** budding **(d)** binary fission

8. Transfer of pollen from anther to stigma is: 1

(a) germination **(b)** fertilisation **(c)** dispersal **(d)** pollination

9. External fertilisation occurs in: 1

(a) human **(b)** frog and fish **(c)** hen **(d)** cow

10. The organ through which the embryo gets nutrition from the mother is the: 1

(a) placenta **(b)** vagina **(c)** oviduct **(d)** ovary

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why does sexual reproduction lead to variation? 2

12. What is regeneration? Give one example. 2

13. Name the four whorls of a complete flower. 2

14. Differentiate between self-pollination and cross-pollination. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Name the parts of a flower and write the function of each. 3

16. Describe the male reproductive system of a human with the parts. 3

17. Describe how a seed germinates with the conditions needed. 3

OR

Describe the process from pollination to the formation of seeds and fruit. 3

18. Describe the female reproductive system of a human with the parts. 3

OR

Differentiate between the zygote, the embryo and the foetus. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the process of sexual reproduction in flowering plants, from pollination to the formation of fruit and the dispersal of seeds. 5

OR

Describe the types of pollination and the agents of pollination with the adaptations in flowers. 5

20. Describe the human male and female reproductive systems with the functions of each part. 5

OR

Describe the vegetative propagation of plants in nature and through artificial methods and the advantages. 5

END OF QUESTION PAPER — Total: 40 Marks
